How to make a thaumatrope

The thaumatrope was a favourite children's toy over 175 years ago. It was one of the first inventions to make moving pictures and is often seen as the first step towards the movies of today.

John Paris, an English scientist, is believed by many to have invented the thaumatrope in 1825. Paris hoped that the invention would spark children's interest in science. Early thaumatropes had a picture of a bird on one side, and an empty cage on the other. By spinning the thaumatrope quickly, a child would see a picture of a bird in a cage.

So how does it work? It is thought that thaumatropes create an illusion due to something called 'persistence of vision'. What happens when we see an image, like the empty cage, is that our eyes send the information to our brain and this image stays in our brain for about 1/10th of a second. If we see another image, like the bird, in that time, our brain puts the two images together and the bird would appear as if it were inside the cage.

Thaumatrope means 'wonder turner' in Ancient Greek. Make your own simple thaumatrope, and see why.

Materials

- a piece of plain card
- scissors
- colour pens or pencils for drawing
- a wooden skewer or paper straw
- tape

Back

ICAS.

Next

Method

1. First, cut the card into a small rectangle. Make sure the edges are straight and even.
2. Fold the card in half. Then unfold the card.
3. Now, draw a picture on each half of the unfolded card. For example: a fish on one side, and an empty fish bowl on the other.
4. Turn over your card so the blank side faces up.
5. Tape the skewer in the middle of one half of the unfolded card. Make sure to leave a long 'handle' sticking out of the bottom edge.
6. Now, fold the other half of the card over the skewer. Tape the edges shut.
7. Hold the skewer in between the palms of your hands. Rub your palms back and forth. Watch your drawings, and see what happens when the card spins!

ICAS.

Next

Why was the thaumatrope invented?

- ☐ to get children interested in movies
- ☐ to inspire people to create new toys
- ☐ to increase interest in science
- ☐ to increase interest in John Paris's other inventions

In the text, the word 'favourite' is used as

- ☐ a noun.
- ☐ an adjective.
- ☐ an article.
- ☐ an adverb.

Which of the following is closest in meaning to ‘an illusion’?

- ☐ a reflected image
- ☐ an image that is complicated
- ☐ an image that tricks the eye
- ☐ a copied image

‘this image stays in our brain for about 1/10th of a second’

What does the quotation tell us about the image?

- ☐ The image does not last long.
- ☐ The image is not important.
- ☐ The image moves slowly.
- ☐ The image spins around.

The word **Materials** is written this way to show that it is

- ☐ a title.
- ☐ a label.
- ☐ a subheading.
- ☐ an index.

Which step needs to happen directly before this image?

- ☐ Draw a picture on either side.
- ☐ Tape a skewer to the card.
- ☐ Cut the card into a rectangle.
- ☐ Hold the skewer and rub your palms.

What is the main purpose of the text?

☐

to inform

☐

to narrate

☐

to argue

☐

to recount

TRAP

I was walking home with Grandad when I spotted a huge, bright green caterpillar wriggling along the path. It was the biggest caterpillar I had ever seen. I was crouching down for a better look, when all of a sudden a kookaburra swooped down, picked it up and flew off. I couldn't believe it. The caterpillar was there one minute and gone the next!

Grandad started going on about letting nature take its course. I sometimes think he watches too many nature shows.

He was clearly still thinking about it when we got home because he decided that we had to go out into the garden right away and check it for carnivorous predators. I didn't know what he was planning to do with any that he did find. Maybe demonstrate nature taking its course by getting eaten by a bear? It's unlikely in our suburb, but as Grandad often says, 'You can't be too careful'.

Once the dog was safely discounted from our carnivore survey, I must admit I wasn't too confident about us finding any more. I figured most birds would eat insects, so they'd count, but there wasn't a single bird in the garden. I was pretty surprised then when, just a few minutes later, I heard Grandad calling out.

'Found one!' he yelled and I ran over.

'Look here,' he said. But I couldn't see anything except for some new plants that Granny had planted.

'It's a Venus flytrap!' said Grandad and he looked very pleased with himself.

Back

ICAS.

Next

8 'It's hardly a predator, Grandad,' I said. As we stood there, a beetle walked up the stem of one of the leaves. It stood still for a second but nothing happened. 'See?' I said.

9 'Just watch,' said Grandad. So we both did.

10 Another second and I would have missed it. The beetle continued marching up the stem and onto the red fleshy centre of the leaf. As quick as a flash, the two sides of the trap slammed shut. I could see two sets of tiny spikes, like the teeth of a comb, which slotted together perfectly.

11 'Wow,' I said.

12 'Not too fussy about food, is it?' said Grandad.

'I couldn't believe it.'

The narrator couldn't believe

- ☐ that the caterpillar would be wriggling along a path.
- ☐ that the caterpillar could be so bright.
- ☐ how quickly a kookaburra could fly with the caterpillar.
- ☐ how quickly the caterpillar had disappeared.

Which of the following quotations from the first paragraph reveals the narrator's thoughts?

- ☐ 'I was walking home with Grandad when I spotted a huge, bright green caterpillar wriggling along the path.'
- ☐ 'It was the biggest caterpillar I had ever seen.'
- ☐ 'I was crouching down for a better look, when all of a sudden a kookaburra swooped down, picked it up and flew off.'
- ☐ 'The caterpillar was there one minute and gone the next!'

‘Maybe demonstrate nature taking its course by getting eaten by a bear?’ (paragraph 3)

What is the narrator’s tone in the quotation?

- ☐ angry
- ☐ bored
- ☐ cheeky
- ☐ confused

The word ‘discounted’ means

- ☐ returned.
- ☐ removed.
- ☐ reduced.
- ☐ replaced.

The word 'figured' means that the narrator had

- ☐ counted the birds already.
- ☐ guessed the answer.
- ☐ checked the information first.
- ☐ thought about the problem.

Why wasn't the narrator feeling confident about finding a carnivorous predator in the garden?

- ☐ There were very few animals in the garden.
- ☐ The dog had chased all the animals away.
- ☐ It was the wrong time to look for such animals.
- ☐ The Venus flytrap had killed all the animals.

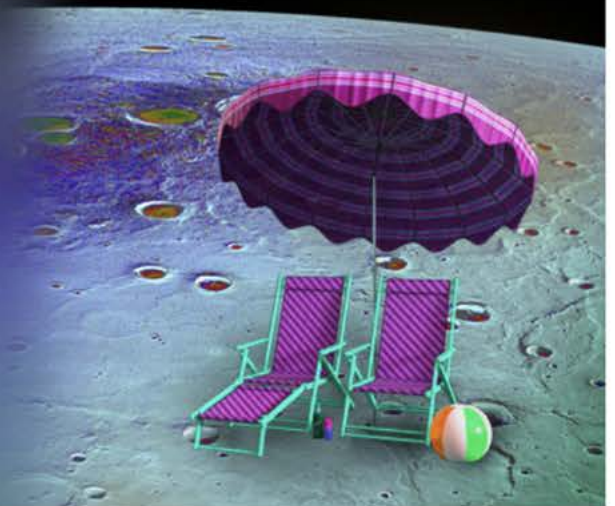

The descriptions of both the kookaburra and the Venus flytrap emphasise their

- ☐ wildness.
- ☐ speed.
- ☐ hunger.
- ☐ craftiness.

Using the information in the text, readers can conclude that the kookaburra is a 'carnivorous predator'. What information in the text supports this?

- ☐ The kookaburra is a bird and all birds eat insects.
- ☐ The kookaburra cannot be found in the narrator's garden.
- ☐ The kookaburra picked up a caterpillar and flew away with it.
- ☐ The kookaburra was in a show that Grandad watched about such animals.

Travel Mercury

Looking for a holiday with a difference?

A trip that is completely out of this world?

What about Mercury? It's a brand-new holiday destination that ticks all the boxes!

Getting there: With the Sun a mere 58 million kilometres away, Mercury is one of the hottest destinations in the galaxy. Sit back, relax and let us take you there. At about 77 million kilometres from Earth, our flight time of 7.5 years will pass in the blink of an eye.

What to pack: Clothes for every possible climate. Temperatures on Mercury can be extreme. Expect daytime highs of over 400 °C (don't forget the sunscreen!), cooling off at night to a fresh -170 °C. Bring your own spacesuit as well as enough oxygen, food and water to keep you going.

Things to do: Just relax. Let each day stretch away in front of you ... bliss. All those long summer days. And they *are* long. One day on Mercury is as long as 59 Earth days; you'll feel like you're on a permanent holiday with nothing to do. Actually there really is *nothing* to do—unless craters interest you. Thousands of craters decorate Mercury's surface and they're ripe for exploring. Become a geologist and uncover the history of Mercury's comet-collision craters and asteroid-avalanche landscapes. Stunning. Do watch out

Back

ICAS.

Next

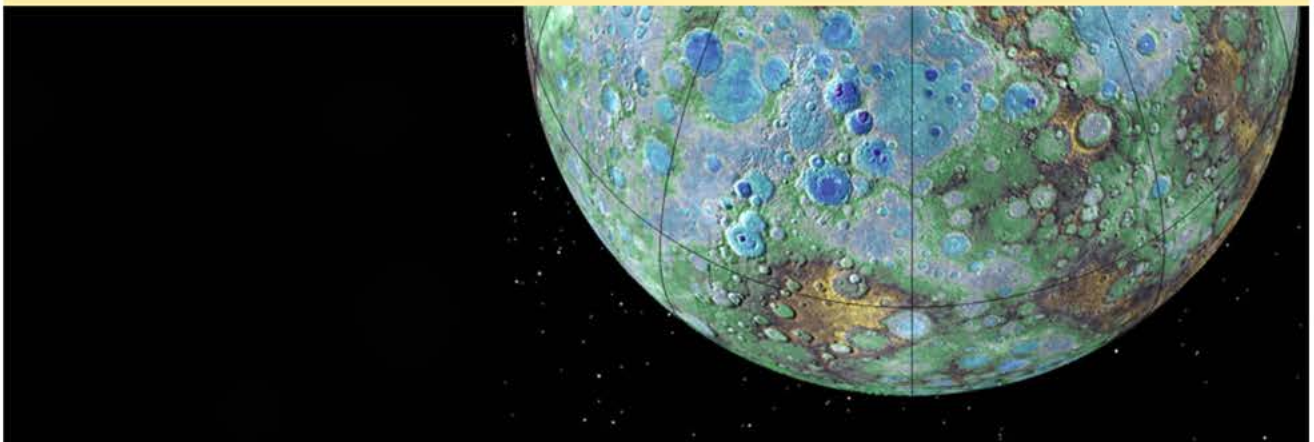

for those incoming space rocks though, as we accept no responsibility for travellers stunned by them.

Things to see: There are great opportunities all over this amazing moonscape of a planet—craters and dust as far as the eye can see. Just don't expect to see an actual moon because Mercury doesn't have one. Or water for that matter. Or weather—not even wind.

Best time to travel: Right now. You could be first aboard the Travel Mercury mission departing 2020 for anticipated arrival in 2027.

Book today and get on board with us tomorrow! Just remember that arrival is not guaranteed.

For information, prices and bookings go to
www.travelmercury.com.zz

According to the text, there are 77 million kilometres between

- ☐ Earth and Mercury.
- ☐ Mercury and the Sun.
- ☐ Earth and the Sun.
- ☐ the Moon and Mercury.

In the text, what are the **two** different meanings of the word 'hottest'?

- ☐ most precious
- ☐ having high temperatures
- ☐ having great variety
- ☐ most popular

‘One day on Mercury is as long as 59 Earth days; you’ll feel like you’re on a permanent holiday with nothing to do.’

Which connective could replace the semicolon (;) without changing the meaning of the sentence?

☐

until

☐

although

☐

because

☐

so

An understatement is when something is presented as being less important or smaller than it really is.

Which quotation is an understatement?

☐

‘It’s a brand-new holiday destination’
(paragraph 3)

☐

‘With the Sun a mere
58 million kilometres away’
(paragraph 4)

☐

‘Thousands of craters decorate
Mercury’s surface’ (paragraph 6)

☐

‘uncover the history of Mercury’s
comet-collision craters’ (paragraph 6)

In the seventh paragraph, Mercury is described as a 'moonscape'

- ☐ to reveal its closeness to the Moon.
- ☐ to explain why it has no moon of its own.
- ☐ to suggest its surface looks similar to that of the Moon.
- ☐ to encourage readers who have visited the Moon to visit Mercury.

Which option suggests that something is done extremely quickly?

- ☐ 'out of this world' (paragraph 2)
- ☐ 'ticks all the boxes' (paragraph 3)
- ☐ 'in the blink of an eye' (paragraph 4)
- ☐ 'as far as the eye can see' (paragraph 7)

Which question about the holiday is **not** answered by the text?

- ☐ What holiday activities are available on Mercury?
- ☐ How do people make a booking for the holiday?
- ☐ Why is it ideal to travel to Mercury now?
- ☐ How much will the holiday cost?

What is the underlying purpose of the whole text?

- ☐ to promote a new and unusual holiday destination
- ☐ to provide details of the unique features of a planet
- ☐ to ensure that all potential passengers are suitably prepared
- ☐ to advertise the Travel Mercury website

Storm

The wind hissed at my window and I shrank beneath the bedcovers. A storm was coming. I snatched up my old teddy bear—now only used for such emergencies. My room flashed ghostly white, then *boom, crash, rumble*. Were the clouds bumping together? Then *flack, flack, flack* knocked the rain at my window. Each drop was looking for a way in. *Yoooooooooooo*. The wind joined in, moaning and groaning and screeching. I peeked out from behind my curtains just as the backyard was lit up by a flash of lightning: the trampoline and the swings were bleached white. The trees thrashed wildly.

‘It’s just a storm,’ I said to no-one in particular. My voice wobbled and I squeezed poor teddy tighter. His other eye was sure to pop off soon.

The air smelt damp and I had a bitter taste in my mouth. The thunder blasted again. Was it a giant stomping in the clouds?

No. I had to stop thinking like this! I shook my head and I raised my chin at the storm. I was safe in my house. ‘It’s *just* a storm,’ I said, pelting out the words. In fact, it wasn’t just a storm. Flash, *boom!* It was a light-and-sound show just for me. At that moment lightning lit up the night sky as if it was day—everything was brilliant white, each detail of the backyard intensified. The trees whipped about in the wind. I could feel the power of the storm.

I watched the performance for a while longer, captivated by the fury of it all. Before long, the rain increased its drumming and the thunder and lightning trailed off. The steady rhythm of the deluge comforted me and I soon found sleep tugging at my eyes and leading me back to my dreams.

The writer's teddy bear was 'now only used for such emergencies' (paragraph 1).

What is the most likely explanation for this?

- ☐ The old bear had been replaced by a newer teddy bear.
- ☐ The writer considered herself too grown up for teddy bears.
- ☐ The writer did not like her old teddy bear anymore.
- ☐ The teddy bear was too fragile to be held anymore.

In the first paragraph, the storm is mainly described in terms of how it

- ☐ sounds.
- ☐ smells.
- ☐ looks.
- ☐ feels.

What is the purpose of the questions in the text?

- ☐ to give an insight into what the writer is thinking
- ☐ to show that the writer doesn't know everything
- ☐ to highlight that the writer has no one to ask
- ☐ to emphasise the writer's curiosity

'I shook my head and I raised my chin at the storm.' (paragraph 4)

This sentence signals the writer's mood changed from

- ☐ surprise to acceptance.
- ☐ confusion to rage.
- ☐ terror to happiness.
- ☐ fear to defiance.

Personification is a way of using human qualities to describe something that is not human.

Which quotation from the text is an example of personification?

- ☐ 'Each drop was looking for a way in.'
(paragraph 1)
- ☐ 'I said, pelting out the words'
(paragraph 4)
- ☐ 'lightning lit up the night sky as if it was day' (paragraph 4)
- ☐ 'I could feel the power of the storm.'
(paragraph 4)

In the final paragraph, what does the 'steady rhythm' refer to?

- ☐ the wind
- ☐ the thunder
- ☐ the lightning
- ☐ the rain

Hatched

- 1 'No,' said Mum without even looking up from her book.
- 2 'But you don't even know what I was going to ask!' I protested.
- 3 'Marty, I can tell by the sound of your footsteps that it's going to cost me money,' she said, glancing up with a knowing smile.
- 4 What is it about mums? They *always* know!
- 5 'No *cost* to you!' I said. 'It would be an investment! A *very wise* investment because I'd pay you back, *plus extra*, you know, with interest!'
- 6 Mum sighed heavily, put her book down and looked at me. 'How much?' she asked.
- 7 'Not that much ... for an *investment*,' I said hesitantly. 'Maybe \$20 ...?'
- 8 Mum raised an eyebrow in a way that suggested she was not yet convinced. I pressed on. 'It'll be educational and profitable!' I said. 'You should have your money back, *with* interest, within a week! Two at the most!'
- 9 'Ri...i...ight,' said Mum, 'well, go on.' She crossed her arms like she was preparing for a saga. It was a bit unnerving.
- 10 I wondered for a second if she remembered last summer's stick insect incident. All those stick insect eggs for just \$5! It had been too good a deal to miss. There were hundreds! Admittedly it had not been a success. *Nobody* could have predicted that they'd all hatch at once. Or that they would then escape such a secure-looking enclosure. Just think of the huge profit I'd have made if I'd sold them all! But it hadn't quite

Back

ICAS.

Next

worked out like that. Not only did I not sell any, but stick insects of all shapes and sizes still turned up, even now, in the oddest places, like Dad's sock drawer and Mum's hair that one time. But surely she'd forgotten all that?

11 Mum's eyebrow popped up again. 'So ...?' she said.

12 'Okay, well ... You know Ben's dad keeps chickens?' Mum's raised eyebrow barely moved. 'Well, surprisingly, it turns out they're not all girls. The other day when Ben went to collect the eggs, there was a whole heap of newly hatched chicks! I mean, loads! There are far too many for them to keep. So I thought if I bought a few, maybe 7 or 8 chicks, then in a few weeks, when they grow up and start laying, I could sell the eggs on a little stall out the front. I'd make a fortune!'

13 Mum was smiling broadly now, which was surely a good sign.

Text: © Janison Solutions Pty Limited. Image: Photo of baby chickens by HerbertT https://upload.wikimedia.org/wikipedia/commons/7/74/Take_five.jpg CC BY-SA 3.0

The word 'investment' means that you contribute money

☐

to make money.

☐

as a donation.

☐

as a form of savings.

☐

to recover lost money.

How does Marty try to convince his mum to give him the money?

☐

by promising that he will pay it back quickly

☐

by suggesting that he only needs to borrow the interest

☐

by stressing how well the stick insects hatched

☐

by emphasising how wise he has been in the past

The narrator's use of the word 'saga' (paragraph 9) shows that Mum thinks that Marty's speech will

- ☐ be extremely funny.
- ☐ make her fall asleep.
- ☐ go on for a long time.
- ☐ persuade her to say yes.

'*Nobody* could have predicted that they'd all hatch at once.'

What is the effect of the word '*Nobody*' being in italics?

- ☐ to indicate that Marty thought the stick insect incident wasn't his fault
- ☐ to show that Marty lied about the stick insect incident to his mum
- ☐ to emphasise Marty's past failure
- ☐ to show that Marty was being serious

What should Marty have done to make his stick insect plan successful? Choose **two** actions.

- ☐ kept all the stick insect eggs in one place
- ☐ sold all the stick insects after they had hatched
- ☐ tested the enclosure to make sure stick insects could not escape
- ☐ bought a lot more stick insect eggs

The stick insect incident is likely to influence Mum's opinion of Marty's latest proposal because

- ☐ Marty let the stick insects loose after they hatched.
- ☐ the stick insects were more expensive than the chicks.
- ☐ there were stick insects in her house for a long time.
- ☐ she feels that Marty has learned his lesson.

Which of these words is **least** likely to describe Marty?

☐

impulsive

☐

optimistic

☐

resourceful

☐

practical

Sweet recipes for life

Rated: PG

Starring: Emma McKellar, Paula Knox, Gabriel Eliason

Based on the novel *My sweet life* by Margot Riviere, this film has all the ingredients for a popular family movie: ambitious young girl, ruthless competition and tasty cooking.

Young and old alike will enjoy this inspiring story about the young life of Simone Miller (played by Emma McKellar) and her passion to become a pastry chef. Now a world-renowned pastry chef, Simone thinks back to her childhood when she is interviewed by a feisty reporter (Paula Knox).

The time shifts are easy to follow as the movie switches between Simone's early years and the present time in the restaurant where the interview occurs. Each shift in time is cleverly matched to follow the sequence of the meal taking place during the interview. During the entrée the reporter asks Simone the predictable question: 'What were the major influences on your decision to become a pastry chef?' Simone's reply is anything but predictable as she reveals her past.

The first flashback shows how Simone's tastebuds are awakened when she eats at the home of her wealthy school friend, Max (Jack White), and his father, French restaurateur Bruno (Gabriel Eliason). She is entranced by a dessert made by Bruno called croquembouche ('crisp in the mouth'), made from custard-filled cream puffs piled high and covered

Back

ICAS.

Next

with spun sugar. When she returns home to her mother's (Ellen Bas) indifference to food, the tension between mother and daughter is evident. What follows is Simone's quest to create the perfect dessert and find a way to add beauty to her life. It's a journey which entails making custard hundreds of times. As Bruno says, 'Ze difference between try and triumph is a leetle umph!', while Simone's mother just says 'Umph!'

During the main course we find out life's not all plain sailing. As Simone warms to her interviewer, she sheds light on her attempts to get into Junior Top Chef. Things come unstuck in a hilarious scene with her archenemy Sue-Ann (Devina Shaw) which involves lashings of cream, egg whites and sticky sugar. As dessert is served, the camera lingers lovingly over the dishes created by the young Simone: fondants, éclairs and tartlets. You can almost taste the chocolate and smell the strawberries.

Though only 13, Emma McKellar's performance is an intelligent interpretation of the young Simone, and Jack White as Max is equally believable. The adult voice-over by Angelina Johns is charming and convincing. Some of the minor characters are a little lame compared to the strength of Simone's character, but fortunately their appearances are fleeting.

For a low-budget film, *Sweet recipes for life* is a treat—delicious but not sickly sweet. Despite following a tried-and-true formula—passion and persistence pay off—the film never becomes corny.

Who inspired Simone to become a pastry chef?

☐

Max

☐

Bruno

☐

Sue-Ann

☐

her mother

According to the text, the time shifts in the movie are matched by

☐

the unpredictability of Simone's replies.

☐

the type of food that Simone learns to prepare.

☐

the order of the meal being served during the interview.

☐

the increasing closeness between Simone and her interviewer.

What do the words 'crisp in the mouth' explain?
(paragraph 4)

- ☐ a slang word
- ☐ a poetic word
- ☐ a foreign term
- ☐ a scientific term

'Bruno says, "Ze difference between try and triumph is a leetle umph!"'

What do we know about Bruno from this quotation?

- ☐ He likes to boast.
- ☐ He never went to school.
- ☐ He is a difficult character.
- ☐ He has a sense of humour.

Which of the following words is used as a verb in the fifth paragraph?

☐

'sailing'

☐

'attempts'

☐

'lashings'

☐

'taste'

In the quotation '*Sweet recipes for life* is a treat', the word 'treat' is an example of

☐

a pun.

☐

a simile.

☐

alliteration.

☐

onomatopoeia.

Which feature of the movie particularly impressed the reviewer?

☐

the witty dialogue

☐

the choice of setting

☐

the originality of the plot

☐

the casting of the main characters
