SECTION C

There are six (6) spelling errors in the following passage. Read the passage first. Then fill in the ovals under the words which have been spelt INCORRECTLY.

Fill in only SIX ovals. If you fill in more than six ovals, only the first six will be marked.

People have always been fascinated by the unseen depths of the seas and the
 misterious creatures that exist there. Early sailers spread terrifying tails of
 monsters that destroyed large ships. Such stories were believed to be the result of
 vivid imaginations until the colossal squid was discovered in the Southern Osean
 in 1925.

By studying preserved samples, scientists have estimated that the colossal squid
 could grow to a length of around 14 metres. It has the biggest eyes of any animal,
 an enormous beak and tentacels armed with layers of wicked roatating hooks at
 their ends. The colossal squid is a serious predator.

The words in the shaded boxes are spelt incorrectly. Print each word **CORRECTLY** next to the matching number.

One hundred years ago in 1915, one of Australia's great **32. advencherers**, Nancy Bird-Walton, was born. Have you heard about her **33. acheivements**? In the pioneering days of aviation, aeroplanes were flimsy craft **34. construkted** with wood and fabric. Flying was almost **35. exclusivly** a male activity. However, this was no **36. obsticle** for Nancy who, at the age of seventeen, became the youngest Australian woman to **37. aquire** a pilot's licence. She had to sit on a pillow to reach the controls!

32.

33.

34.

35.

36.

37.

The words in the shaded boxes are spelt incorrectly. Print each word **CORRECTLY** next to the matching number.

Nancy **38. imbarked** on a tour of the country, visiting local agricultural shows, giving joy rides and **39. exhibition** flights. She also flew an air ambulance, transporting **40. pashents** from the outback to hospital.

38.

39.

40.

Nancy was a pioneer for women who wanted to fly.
