

PAPER B

2018 ENGLISH

**DO NOT OPEN THIS BOOKLET
UNTIL INSTRUCTED.**

45 QUESTIONS

TIME ALLOWED: 45 MINUTES

STUDENT'S NAME:

Read the instructions on the **ANSWER SHEET** and fill in your **NAME, SCHOOL** and **OTHER INFORMATION**.

Use a pencil. Do **NOT** use a coloured pencil or a pen.

Rub out any mistakes completely.

You **MUST** record your answers on the **ANSWER SHEET**.

Mark only **ONE** answer for each question.

Your score will be the number of correct answers.

Marks are **NOT** deducted for incorrect answers.

There are **45 MULTIPLE-CHOICE QUESTIONS** (1–45).

Use the information provided to choose the **BEST** answer from the four possible options.

On your **ANSWER SHEET** fill in the oval that matches your answer.

Questions may sometimes be placed next to each other. Make sure you read **ACROSS** the page and answer the questions in the correct order.

You are **NOT** allowed to use a dictionary or an electronic translator.

Read the text and answer the questions that follow.

Holly to the rescue!

Holly lay in her sleeping bag staring at the canvas directly above her. The night was silent apart from the rustle of the trees outside and the gentle sleeping sounds of her parents and little brother.

She had looked forward to the sleepover at the zoo for such a long time. She thought back over the evening and ticked off on her fingers all the animals she had held or touched: the tortoise (her favourite!), the adorable baby koala, the possum, those huge stick insects and then the diamond python. There was an early start tomorrow morning too because they had to feed the giraffes!

The problem was, the more she thought about the day ahead and the more she tried to get to sleep, the more she couldn't. And in fact, the longer she stayed awake, the more convinced she became that she could hear an animal in need of help. Maybe it was the baby koala, separated somehow from its mother and wandering the zoo alone in terrible danger from the other larger animals!

Something definitely had to be done and she was just the person to do it! She unzipped the tent as quietly as she could and stepped out of it and into her boots. She switched on her torch and started tiptoeing across the open lawn. Looking back, the tent had already blended into the darkness and Holly had to admit it all looked very different without anybody around.

Before she had time to take another step, the night was filled with a terrible noise and a

RRRRRROOOAAAARRRRRRRRRRRR

echoed in the distance. Holly froze but her mind was racing. That was surely a lion. There was no other sound quite like it. She shone her torch around but no one had stirred and nothing had moved. Suddenly she couldn't think of anything except how lovely it would be to be back in her sleeping bag.

Holly turned around and ran.

1. What was keeping Holly awake?
 - (A) her excitement about being at the zoo
 - (B) her family's snoring
 - (C) the movement of the trees outside
 - (D) the noise from the animals

2. Which event mentioned in the narrative has not happened yet?
 - (A) Holly arrived at the zoo.
 - (B) Holly fed the giraffes.
 - (C) Holly touched a diamond python.
 - (D) Holly heard noises in the night.

3. What caused Holly to leave the tent?
 - (A) She was worried about waking the rest of her family.
 - (B) She hoped a walk outside would help her to sleep.
 - (C) She thought there was an animal in danger.
 - (D) She wanted to see the tortoise again.

4. 'she ... stepped out of it and into her boots' (paragraph 4)
The underlined words in this phrase are both
 - (A) adverbs.
 - (B) prepositions.
 - (C) adjectives.
 - (D) verbs.

5. 'Holly froze but her mind was racing.' (paragraph 5)
What does this sentence tell us about Holly?
 - (A) She suddenly felt so cold that she couldn't think straight.
 - (B) She was too scared to sleep but her body was tired.
 - (C) She looked around and wondered which way to go.
 - (D) She stood still but her mind was full of many different thoughts.

6. 'RRRRROOOAAAARRRRRRRRRR' (paragraph 5)
Why is the word 'roar' written in this way?
 - (A) to show how close the lion was to Holly when it roared
 - (B) to show that the sound went from soft to loud
 - (C) to emphasise how long and loud the lion's roar was
 - (D) to demonstrate what a roaring lion looks like

7. At the end of the narrative Holly felt
 - (A) brave and ran towards the source of the noise.
 - (B) anxious but continued running towards the baby koala.
 - (C) terrified and ran straight back to the tent.
 - (D) exhausted so she ran back to her sleeping bag.

Read the text and answer the questions that follow.

Ears are a m-ear-acle

Bang! Pop! Crack! Crunch! Snap!

You hear sounds almost every moment of every day, but how often do you actually stop to think about how that happens? How does all that noise out there actually get inside your head to be recognised as a certain sound?

Satellite dishes for your head

Everyone already knows about the *pinna*, that funny-looking flap on the side of the head. The *pinna* is like a tiny satellite dish that catches the soundwaves around us, but that's really only the start of the hearing process.

A sticky situation

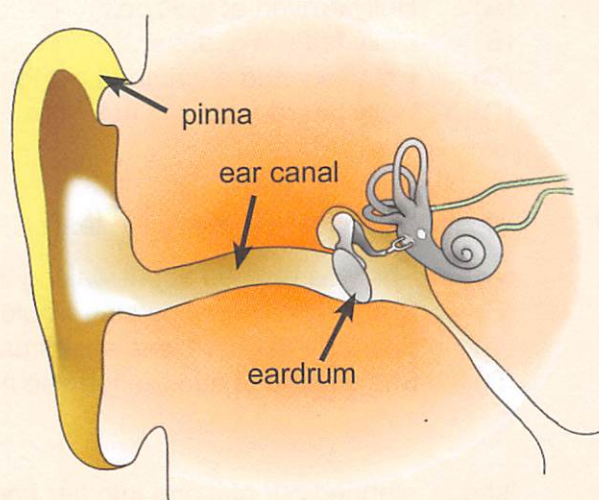

Next, those soundwaves pass into the ear canal, a 2.5 centimetre-long tube containing sticky earwax. It may be gross, but earwax is very useful: it helps to trap dirt and keep the ear canal clean so that we can hear clearly.

Bang the drum

Did you know you've got a drum inside your head? That's the eardrum, a very thin piece of skin at the end of the ear canal that turns soundwaves into vibrations and then transmits them into the middle ear. And what, you might ask, is in the middle ear? Three tiny bones, the tiniest in your body: the *malleus* (ma-lee-us), *incus* (in-kus) and *stapes* (stay-pee-z). The names of these bones mean 'hammer', 'anvil' and 'stirrup' in Latin. The vibrations from the eardrum cause these bones to move one after another. As they move, they pass those vibrations along to the inner ear where the next stage of 'hearing' actually occurs.

The snail with a direct line to your brain

Once vibrations reach the inner ear, they enter the *cochlea* (kok-lee-uh), a small, liquid-filled chamber shaped like a snail shell. Within the *cochlea*, the vibrations passing through the liquid move tiny hair-like cells that cover its inside. These cells are connected to the auditory nerve, which transmits the movements directly to your brain as signals. Your brain interprets these signals and tells you what you are hearing. This, finally, is how you experience sound, whether it's the whoosh of a car passing by or your favourite song! All this happens in the blink of an eye (but that's another story!).

8. 'Bang! Pop! Crack! Crunch! Snap!'

Why did the writer choose these words to begin the text?

- (A) to show sounds that are easiest for humans to hear
- (B) to provide examples of common sounds
- (C) to demonstrate sounds that annoy people
- (D) to describe the sounds made by the middle ear

9. What does the word 'transmits' mean?

- (A) sends
- (B) interprets
- (C) connects
- (D) vibrates

10. The movement of hair-like cells in the *cochlea* is directly caused by the movement of

- (A) the bones in the middle ear.
- (B) the skin of the eardrum.
- (C) the soundwaves caught by the *pinna*.
- (D) the fluid within the chamber.

11. The main role of the *cochlea* is

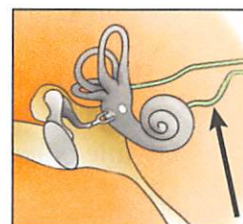

- (A) to help us understand what we are hearing.
- (B) to help vibrations reach the inner ear.
- (C) to turn soundwaves into vibrations.
- (D) to turn vibrations into nerve signals.

12. Which option gives a correct sequence of events in the hearing process?

- (A) *pinna* catches soundwaves → *malleus* moves → soundwaves travel through ear canal
- (B) *stapes* moves → eardrum vibrates → brain interprets nerve signals
- (C) soundwaves travel through ear canal → eardrum vibrates → brain interprets nerve signals
- (D) *malleus* moves → brain interprets nerve signals → cells pass movements to auditory nerve

13. What is the arrow pointing to in the diagram?

- (A) the *malleus*
- (B) the *cochlea*
- (C) the eardrum
- (D) the auditory nerve

14. In the title of the text, the word 'm-ear-acle' is written in this way for two reasons. What are they?

- (A) to show how many syllables the word has AND to show its correct pronunciation
- (B) to link the title of the text to its content AND to make a joke using words
- (C) to make a joke using words AND to demonstrate the importance of hearing
- (D) to give an acceptable alternative spelling AND to link the title of the text to its content

Read the text and answer the questions that follow.

Sally Spangles was the popular young star of a TV show called *Happy Families*. She loved being recognised wherever she went. One day a new boy came into her class at school. Sally waited for him to ask for her autograph but he just said, 'Hi, I'm Melvin. What's your name?'

Sally was astounded. 'You mean you don't *know* who I am? *Seriously?!*'

Melvin blinked at her through his large glasses. 'No, why should I?'

'Because I am *the* one and only Sally Spangles, star of *Happy Families!*'

Melvin stared blankly at her. 'What's *that?*'

'Well, it's *only* one of the *most popular* shows on television!'

But Melvin simply shrugged his shoulders. 'Is that all? We don't have a TV at our place.'

By this time, a crowd of classmates had gathered. Surrounded by an audience, Sally instantly put on her standard act, pretending to faint. 'Quick, give me air!'

However, the rest of the class were so used to Sally's over-acting that they ignored her. They all stared at Melvin. Some gasped with disbelief, while others shook their heads with pity. *A boy who didn't have a TV!!*

Sally wasn't used to being ignored—and she didn't like it. She glared at the newcomer but (annoyingly) Melvin stared straight back. 'Is that really so weird?' he asked mildly. 'Anyhow, I'd never have time to watch it.'

'Oh, I *see!* So what *do* you spend all your time doing then?' said Sally, her eyebrows raised.

Melvin blushed with embarrassment as he said, 'I'm guessing you don't play chess. Otherwise, you'd know that I'm *the* Melvin Preston: National Primary School Chess Champion!'

15. Sally Spangles is described as a 'popular' TV star.
This means that she is
(A) up-to-date. (B) friendly. (C) talented. (D) well-known.
16. Italics are used in texts for a number of purposes. In this text, italics are mostly used for dramatic effect. Which of the following uses is different?
(A) '*Happy Families*'
(B) '*Seriously*'
(C) '*that*'
(D) '*most popular*'
17. Why did Sally pretend to faint?
(A) She was trying to be the centre of attention.
(B) She wanted people to know she was unwell.
(C) She was shocked that Melvin did not have a TV.
(D) She wanted her classmates to move away from her.
18. In the third last paragraph, the word 'annoyingly' describes
(A) how Sally felt about Melvin's behaviour.
(B) how the writer felt about Melvin's behaviour.
(C) how the writer felt about Sally's behaviour.
(D) how the class felt about Melvin's behaviour.
19. Which question shows that Melvin was not impressed by Sally being on TV?
(A) 'What's your name?' (B) 'No, why should I?'
(C) 'Is that all?' (D) 'Is that really so weird?'
20. 'Anyhow, I'd never have time to watch it.'
Which option could be correctly added to the sentence?
(A) 'because I was always busy.' (B) 'because I am always busy.'
(C) 'because I have always been busy.' (D) 'because I will always be busy.'
21. 'Otherwise, you'd know that I'm *the* Melvin Preston'
Which of the following is **NOT** a reason why Melvin stresses '*the*' in the quotation?
(A) to copy the way Sally speaks
(B) to highlight how important he is
(C) to compare being a chess champion with being a TV star
(D) to bring attention to his title as champion
22. Which option best describes the personalities of Sally and Melvin?
(A) Sally is confident and Melvin is quiet.
(B) Sally is insincere and Melvin is simple.
(C) Sally is selfish and Melvin is generous.
(D) Sally is dramatic and Melvin is calm.

What's the tallest mountain in the world?

That's a pretty silly question, right?

Everybody knows that Mount Everest is the world's tallest mountain. In fact we all know a lot about Mount Everest for that very reason. Most people know that it is in the Himalayas and that in 1953 Sir Edmund Hillary and Sherpa Tenzing Norgay were the first people to climb to the top. Climbing it is still the ultimate dream of mountaineers and adventurers all over the world. However, only a fraction of those people will ever make it to the top.

Expeditions to Everest take huge amounts of training, planning, time and money, as well as serious mountaineering expertise. It can take about two months to complete the climb as climbers have to adjust to the ever-reducing amount of oxygen as they go higher. In addition, the weather conditions are extreme and changeable. These conditions make the climb one of the most challenging possible.

Imagine if just anybody could hike up the tallest mountain in the world and be back down again in time for dinner, with no special equipment or training needed. Well, perhaps they can, because it seems that when it comes to measuring mountains the playing field is far from level. Traditionally, mountains have been measured from sea level to peak. So Everest, with a peak 8848 metres above sea level, is undoubtedly the tallest.

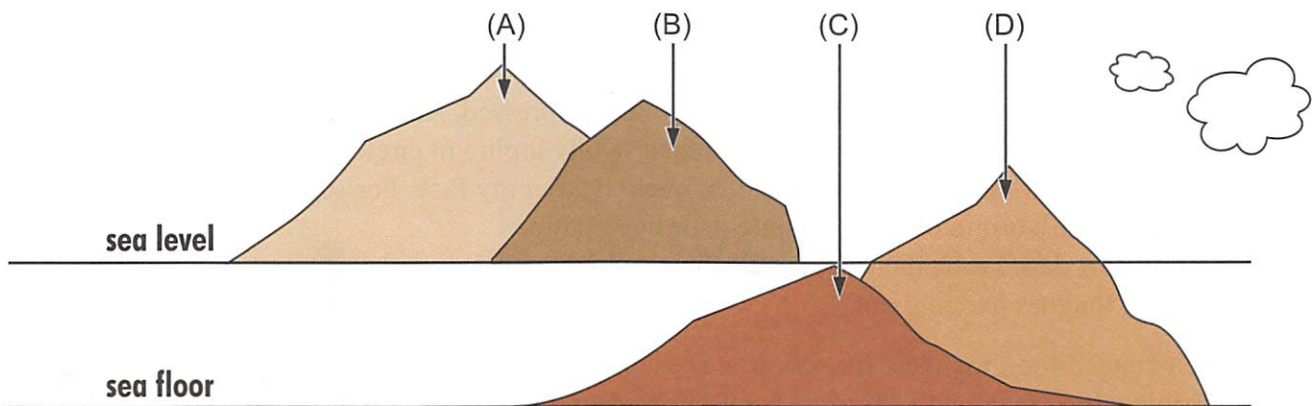

But what about mountains that do not begin at sea level?

If we were to measure mountains from top to bottom, then the tallest mountain on Earth would be Mauna Kea on the island of Hawaii. Measured from sea level, Mauna Kea is only 4207 metres tall; that's less than half the height of Mount Everest. BUT the base of Mauna Kea lies deep down on the floor of the Pacific Ocean and that's a really long way down! From top to bottom, Mauna Kea stands a huge 10 210 metres tall.

Preparing for *that* expedition is a lot more civilised. How about driving to the Visitor Centre? It sits at the 2800-metre mark. From there you could hike—it's an 8-hour trip there and back—to the summit. Or, if you're pushed for time, why not drive all the way to the top? Just remember that starting from the bottom is not a great idea!

23. Who does the word 'we' refer to in the second paragraph?
- (A) 'Everybody'
 - (B) 'Most people'
 - (C) 'the first people'
 - (D) 'mountaineers and adventurers all over the world'
24. In the third paragraph, what does 'expertise' refer to?
- (A) being highly motivated
 - (B) having considerable skill and knowledge
 - (C) being fully prepared
 - (D) having great physical strength and courage
25. What is meant by the quotation, 'when it comes to measuring mountains the playing field is far from level' (paragraph 4)?
- (A) It is not possible to measure mountains that are not side by side.
 - (B) The mountains have not been measured accurately.
 - (C) It is not useful to compare the heights of mountains.
 - (D) There is more than one way to describe how tall a mountain is.
26. In this diagram of four mountains, which one is Mount Everest?

27. Where is the Mauna Kea Visitor Centre situated?
- (A) 4207 metres from the base of the mountain
 - (B) at the summit
 - (C) 2800 metres above sea level
 - (D) at sea level
28. 'Just remember that starting from the bottom is not a great idea!' (paragraph 7)
Why would it be a bad idea to start climbing Mauna Kea from the bottom?
- (A) The bottom is thousands of metres below the ocean's surface.
 - (B) It would take a very long time to get to the summit.
 - (C) The altitude would be dangerous even for experienced climbers.
 - (D) The bottom is thousands of metres below the ground.
29. In the last paragraph, the writer encourages readers to climb Mauna Kea by emphasising
- (A) how tall it is compared to Mount Everest.
 - (B) how easy it is to reach the summit compared to Mount Everest.
 - (C) how few people have climbed it compared to Mount Everest.
 - (D) how difficult the climb is compared to Mount Everest.

Dog-sitting for beginners

I was lying on my bed reading a library book when my mother told me there was someone asking for me on the telephone.

‘I didn’t recognise the voice,’ she said, looking rather puzzled.

It was the summer holidays and I had been trying to find ways to make money. I had decided to put up a notice in the window of the local newsagent: ‘Pet Minder’ with our home phone number. I had waited and waited but nobody had called. Until now. I picked up the phone.

‘We have five German Shepherds,’ rapped out the voice on the other end, ‘and we are going away for three weeks. We need someone to come and feed them every day, and check their water. Are you willing?’

I was willing. Especially for ten dollars a day. So I was put in charge of five German Shepherds: mother, auntie and three offspring. I never met the father. I had to go every day to feed them and also to administer medicine for some mystery condition, little blue pills which I had to hide in their dog food.

The dogs had a huge yard to run around in, but each day when I arrived they would all be lying together in the laundry, looking depressed. At the sight of me, though, they were transformed, and began wildly loping in circles, barking, and then they all jumped all over me all at once, licking my face. For some reason, I wasn’t afraid of them, despite their huge paws, their narrow dark faces, their wild eyes, their yellow teeth and their tongues hanging out.

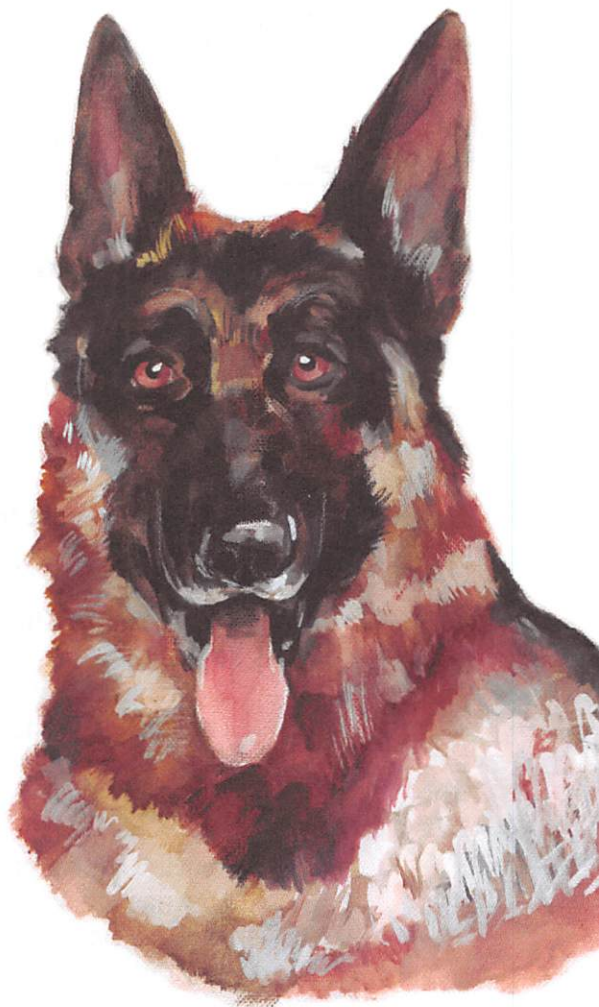

Their canned food was kept on a shelf in the laundry, horrible jellied meat with a terrible smell. Every day I put it in their bowls, hiding the pills inside the mess as I had been instructed. They gulped it down in seconds as though they hadn’t eaten for weeks. As soon as the food was gone they would gaze at me intently, all those desperate eyes (ten of them), just in case there was more to come. Giving up at last, they would gallop away, up and down the length of the backyard.

As I say, this happened every day, exactly the same routine. I was doing so well.

Until ...

On the fifteenth day, when I arrived at the house, the dogs were not there. All of them were gone. Mother, auntie, and the three daughters. Vanished.

Looking down the yard, I could see at once what had happened. They’d dug a tunnel under the fence, just like prisoners of war in the movies. When I inspected the hole, I had to admire their initiative. Grudgingly. Because clearly now, I had a BIG problem.

30. The dog-sitter's mother was puzzled because
- (A) the dog-sitter seldom used the phone.
 - (B) the caller's voice was unfamiliar to her.
 - (C) the dog-sitter was unable to take the call.
 - (D) the caller rang while she was sleeping.
31. 'I had waited and waited but nobody had called.' (paragraph 3)
Which option could replace this sentence?
- (A) I had waited and waited. However, nobody had called.
 - (B) I had waited and waited since nobody had called.
 - (C) I had waited and waited. Somehow, nobody had called.
 - (D) I had waited and waited when nobody had called.
32. The dogs have a 'mystery condition'. This means that their condition
- (A) has strange symptoms.
 - (B) has not been explained.
 - (C) is difficult to treat.
 - (D) is not yet diagnosed.
33. 'they would all be lying together in the laundry, looking depressed' (paragraph 6)
The words 'looking depressed' form an adverbial clause which gives more information about the verb 'lying'. What type of information does the clause provide?
- (A) manner (B) time (C) place (D) frequency
34. The dogs usually look depressed. What changes their mood?
- (A) the dog-sitter filling their food bowls
 - (B) the arrival of the dog-sitter
 - (C) the dogs swallowing their pills
 - (D) the dogs running around the yard
35. Which word is an **ANTONYM** of 'intently'?
- (A) sharply (B) firmly (C) dreamily (D) closely
36. The dog-sitter's initial attitude to the dogs' escape was one of
- (A) hostile praise.
 - (B) unwilling criticism.
 - (C) reluctant respect.
 - (D) prickly complaint.
37. Which of the following is **NOT** a reason the writer uses capital letters for the word 'BIG'?
- (A) to indicate the size of the problem
 - (B) to emphasise the seriousness of the situation
 - (C) to match the meaning of the word
 - (D) to suggest the size of the dogs

Plastic but not fantastic

Remember that cute plastic fire engine you got for your sixth birthday? No? What about the doll that Auntie Ada gave you on her last visit? Chances are that a quick sweep of your house would yield a bag full of unwanted plastic toys. And chances are that you haven't seen or thought of those gifts and trinkets for a while.

These few examples certainly don't constitute an environmental disaster, but when multiplied by many millions of discarded plastic toys over many decades, it is obvious that we have significantly contributed to a global plastic pollution problem! In fact, a quick search of environmental websites commonly suggests that up to 80% of the trash in our oceans is made of plastic and a substantial part of that rubbish is composed of discarded plastic toys—a miniature plastic fleet circling the Pacific Ocean.

Plastic took the world by storm in the 1940s. Ever since, plastics have dominated the toy industry. Metal, previously used to create toys, was a scarce commodity and far too expensive to be used for something as frivolous as a child's toy. However, unlike materials such as wood, cotton and natural rubber, plastics do not break down and have proved almost impossible to recycle.

While some plastic items, such as drink bottles, are made from recyclable plastics, toys tend to be difficult to recycle as they contain a number of ingredients. The cost of separating out the multiple compounds that comprise a plastic toy means that recycling costs are prohibitive. Couple this with the enormous volume of cast-off toys around the world and the size of the problem becomes frighteningly apparent. In fact, in 2014 about 33 million tonnes worth of plastic was discarded in America alone, of which only 9.5% was recycled, according to the US Environmental Protection Agency.

As if this information isn't alarming enough, there's more bad news in the form of the *Trouble in Toyland* report about dangerous or toxic toys, published in 2014. The report reveals that plastic toys contain toxic chemicals, such as lead and chromium, which could be ingested by children. Furthermore, some plastic toys present choking hazards while others, which make those loud noises we have come to know and love, can actually harm hearing.

Some toy manufacturers are producing environmentally friendly toys, but they are in the minority. The outlook, while bleak, is not impossible to remedy. Next time, think about giving your toys to others rather than disposing of them. Think about purchasing toys made from environmentally friendly materials. Or at the very least, think about purchasing plastic toys that are recyclable. It's simple. Just think about it!

38. Why does the writer use questions at the beginning of the text?
- (A) to compare birthday presents from the past with modern gifts
 - (B) to encourage readers to connect personally with the topic
 - (C) to make known the many problems to be solved
 - (D) to show readers both sides of an argument
39. The quotation 'many millions of discarded plastic toys' (paragraph 2) is an example of
- (A) a noun group.
 - (B) an adjectival phrase.
 - (C) a verb group.
 - (D) an adverbial phrase.
40. According to the text, how do plastic toys contribute to the global plastic pollution problem?
- (A) Most plastic toys cannot be recycled and so they get thrown into the ocean.
 - (B) Most miniature plastic toys are discarded into the Pacific Ocean as trash.
 - (C) Toys are a large portion of the rubbish that exists in the oceans across the world.
 - (D) Toy manufacturers are producing environmentally friendly toys.
41. What was the most important feature of plastic that enabled it to dominate the toy industry?
- (A) its recyclability
 - (B) its affordability
 - (C) its useability
 - (D) its durability
42. What does the word 'frivolous' (paragraph 3) mean?
- (A) of little importance
 - (B) extremely common
 - (C) small in size
 - (D) of poor quality
43. What makes most plastic toys too expensive to recycle?
- (A) the toxic chemicals used to make toys
 - (B) the types of ingredients found in toys
 - (C) the volume of toys found around the world
 - (D) the process of separating the toys' components
44. What is the main purpose for including the details from the *Trouble in Toyland* report?
- (A) to add evidence to the case against plastic toys
 - (B) to warn parents against giving plastic toys to children
 - (C) to prove how plastic toys contribute to pollution
 - (D) to provide an example of how things we love can be harmful
45. What is the main reason the words 'think about' are repeated in the final paragraph?
- (A) to help readers remember that the problem needs to be addressed immediately
 - (B) to suggest that readers should be punished for creating the problem
 - (C) to emphasise that readers have some responsibility for fixing the problem
 - (D) to remind readers that thought is more important than action in solving the problem

ANALYSIS BY QUESTION

The following table shows the questions you answered correctly ☒ and shades the questions that you answered incorrectly ☐. The questions are ranked from hardest at the top to easiest at the bottom.

	Question content	Area assessed	Question number	Correct answer
Difficult Questions	Analyse a text to identify a crucial piece of information in an opinion piece	Text comprehension	43	D
	Locate specific information in an opinion piece	Text comprehension	40	C
	Describe the first person narrator's attitude to other characters in a narrative	Text comprehension	36	C
	Explain the purpose of using 'sources' in an opinion piece	Writer's craft	44	A
	Identify key information in an opinion piece	Text comprehension	41	B
	Make a judgement about a character's decision in a narrative	Text comprehension	21	C
	Interpret the meaning of a word in an opinion piece: frivolous	Vocabulary	42	A
	Identify a noun group in an opinion piece	Syntax	39	A
	Examine the purpose of repetition in an opinion piece	Writer's craft	45	C
	Identify the main role of a structural feature in a text which describes and explains	Text comprehension	11	D
	Identify an antonym for a word in a narrative: intently	Vocabulary	35	C
	Identify the multiple purpose of italics in a narrative	Writer's craft	16	A
	Locate directly stated information in a text which describes and explains	Text comprehension	10	D
	Explain the meaning of a metaphor used in a factual text	Writer's craft	25	D
	Identify a correct sequence of events in a text which describes and explains	Text comprehension	12	C
	Interpret the use of capital letters to create tension in a narrative	Writer's craft	37	D
	Infer the reasons for the idiosyncratic spelling of a text which describes and explains	Writer's craft	14	B
	Identify the word class of a word in context in a narrative	Syntax	33	A
	Interpret the meaning of a phrase in a narrative: mystery condition	Vocabulary	32	B
	Analyse a paragraph in a factual text to state its main idea	Text comprehension	29	B
	Identify specific information in a factual text	Text comprehension	27	C
	Identify prepositions in a narrative	Syntax	4	B
	Identify a pronoun reference in a factual text	Syntax	23	A
	Explain the reason for a character's change in mood in a narrative	Text comprehension	34	B
	Explain the purpose of rhetorical questions in an opinion piece	Writer's craft	38	B
	Interpret a character's actions in a narrative	Text comprehension	17	A
	Analyse speech from a narrative to determine a character's attitude	Text comprehension	19	C
	Identify the meaning of a word in a factual text: expertise	Vocabulary	24	B
	Interpret a text which describes and explains to identify a feature in a diagram	Text comprehension	13	D
	Make an inference from information in a factual text	Text comprehension	28	A
Easy Questions	Recognise a character's actions in a narrative	Text comprehension	1	A
	Identify the sequencing in a series of events in a narrative	Text comprehension	2	B
	Contrast the actions of characters in a narrative	Text comprehension	22	D
	Understand the correct use of tense in a narrative	Syntax	20	B
	Interpret a character's feelings in a narrative	Text comprehension	18	A
	Infer the choice of onomatopoeic words in a text which describes and explains	Writer's craft	8	B
	Explain a character's decision in a narrative	Text comprehension	7	C
	Identify a connective to replace 'but' in a sentence in a narrative	Syntax	31	A
	Match information to a diagram in a factual text	Text comprehension	26	A
	Identify the meaning of a word in a text which describes and explains: transmits	Vocabulary	9	A
	Explain the purpose of a feature of a narrative	Writer's craft	6	C
	Identify the reason for a character's reaction in a narrative	Text comprehension	30	B
	Interpret the meaning of a sentence used in a narrative	Writer's craft	5	D
	Identify the meaning of a word in a narrative: popular	Vocabulary	15	D
	Interpret a character's actions in a narrative	Text comprehension	3	C
