and Assessments for Schools

ENGLISH

Educational Assessment Australia
eaa.unsw.edu.au

DO NOT OPEN THIS BOOKLET UNTIL INSTRUCTED.

45 QUESTIONS

TIME ALLOWED: 45 MINUTES

STUDENT'S NAME:

Read the instructions on the **ANSWER SHEET** and fill in your **NAME, SCHOOL** and **OTHER INFORMATION**.
Use a 2B or B pencil.
Do **NOT** use a pen.
Rub out any mistakes completely.

You **MUST** record your answers on the **ANSWER SHEET**.

Mark only **ONE** answer for each question.
Your score will be the number of correct answers.
Marks are **NOT** deducted for incorrect answers.

There are **45 MULTIPLE-CHOICE QUESTIONS** (1–45).
Use the information provided to choose the **BEST** answer from the four possible options.
On your **ANSWER SHEET** fill in the oval that matches your answer.

Questions may sometimes be placed next to each other.
Make sure you read **ACROSS** the page and answer the questions in the correct order.

You are **NOT** allowed to use a dictionary or an electronic translator.

TRAVIS

I have to tell you that these last summer holidays have not exactly supplied me with wonderful memories that I will treasure forever. In fact, quite the contrary.

My mother had some important work to do at the headquarters of her company in Europe, and since I was on school holidays, I thought that I would be going with her. No such luck! Mum and Dad announced they would be going on their own, and that I would have the 'time of my life' at a summer camp here instead.

That wouldn't be too bad, I thought: swimming, surfing, camping and lots of time without parents breathing down my neck. And the activities were great. I learned to surf on a golden beach; I trekked in the mountains and slept under a stunning starry sky; I learned to build shelters and rope bridges, to make a raft and sail it across the river. I ran and paddled and climbed.

But ... in amongst it all was Travis. Travis was quite small. Travis was as quiet as a mouse. Travis was trouble. And Travis was always around.

If there was any trouble near me, somehow I got the blame. When chairs went missing from around the campfire, people thought I had moved them. When they found spiders in the breakfast cereal, everyone blamed me. When the camp commander found his sleeping bag was full of slimy worms—my fault again. All the while, Travis just smiled and said nothing ... but he was always right there.

Eventually—finally!—my parents returned home, and I was off to a new year and a fresh start at a new school. Unfamiliar faces jostled in corridors as I made my way to my new classroom. I crashed through the door and took the last seat. I looked around at all the other kids gazing expectantly at the teacher. And there, to my right, smiling that little smile, was Travis.

1. Why does the writer begin with the words 'I have to tell you'?
 - (A) to engage the reader more personally in the story
 - (B) to emphasise that the events in the story actually happened
 - (C) to indicate that there is an important message in the story
 - (D) to show that he has so much to tell the reader about the holidays
2. The word 'contrary' in the text can be best replaced with
 - (A) opposite.
 - (B) problem.
 - (C) negative.
 - (D) argument.
3. What did the writer mean when he said, 'No such luck!'
 - (A) He thought his parents were unfortunate to be travelling in summer.
 - (B) He was disappointed not to be going to Europe.
 - (C) He was not really looking forward to summer camp.
 - (D) He felt unlucky because he wanted to spend time with his parents.
4. The writer loved all the activities at camp but disliked
 - (A) putting spiders in the cereal.
 - (B) having to be responsible for Travis.
 - (C) taking orders from the camp commander.
 - (D) being blamed for causing trouble.
5. Which quotation about Travis best supports the conclusion that he was responsible for the problems at camp?
 - (A) 'quite small'
 - (B) 'quiet as a mouse'
 - (C) 'just smiled'
 - (D) 'always right there'
6. The last paragraph begins 'Eventually—finally!'
Why does the writer use two words with the same meaning?
 - (A) to prove how much he had missed his parents
 - (B) to show that he was excited about starting at his new school
 - (C) to stress that he was relieved that summer camp was over
 - (D) to indicate that he is about to conclude the story
7. When the writer saw Travis smiling at him in his new classroom, he probably felt
 - (A) disgusted.
 - (B) dismayed.
 - (C) bored.
 - (D) regretful.

Read the text and answer the questions that follow.

Ears are a m-ear-acle

Bang! Pop! Crack! Crunch! Snap!

You hear sounds almost every moment of every day, but how often do you actually stop to think about how that happens? How does all that noise out there actually get inside your head to be recognised as a certain sound?

Satellite dishes for your head

Everyone already knows about the *pinna*, that funny-looking flap on the side of the head. The *pinna* is like a tiny satellite dish that catches the soundwaves around us, but that's really only the start of the hearing process.

A sticky situation

Next, those soundwaves pass into the ear canal, a 2.5 centimetre-long tube containing sticky earwax. It may be gross, but earwax is very useful: it helps to trap dirt and keep the ear canal clean so that we can hear clearly.

Bang the drum

Did you know you've got a drum inside your head? That's the eardrum, a very thin piece of skin at the end of the ear canal that turns soundwaves into vibrations and then transmits them into the middle ear. And what, you might ask, is in the middle ear? Three tiny bones, the tiniest in your body: the *malleus* (ma-lee-us), *incus* (in-kus) and *stapes* (stay-pee-z). The names of these bones mean 'hammer', 'anvil' and 'stirrup' in Latin. The vibrations from the eardrum cause these bones to move one after another. As they move, they pass those vibrations along to the inner ear where the next stage of 'hearing' actually occurs.

The snail with a direct line to your brain

Once vibrations reach the inner ear, they enter the *cochlea* (kok-lee-uh), a small, liquid-filled chamber shaped like a snail shell. Within the *cochlea*, the vibrations passing through the liquid move tiny hair-like cells that cover its inside. These cells are connected to the auditory nerve, which transmits the movements directly to your brain as signals. Your brain interprets these signals and tells you what you are hearing. This, finally, is how you experience sound, whether it's the whoosh of a car passing by or your favourite song! All this happens in the blink of an eye (but that's another story!).

8. 'Bang! Pop! Crack! Crunch! Snap!'

Why did the writer choose these words to begin the text?

- (A) to show sounds that are easiest for humans to hear
- (B) to provide examples of common sounds
- (C) to demonstrate sounds that annoy people
- (D) to describe the sounds made by the middle ear

9. What does the word 'transmits' mean?

- (A) sends
- (B) interprets
- (C) connects
- (D) vibrates

10. The movement of hair-like cells in the *cochlea* is directly caused by the movement of

- (A) the bones in the middle ear.
- (B) the skin of the eardrum.
- (C) the soundwaves caught by the *pinna*.
- (D) the fluid within the chamber.

11. The main role of the *cochlea* is

- (A) to help us understand what we are hearing.
- (B) to help vibrations reach the inner ear.
- (C) to turn soundwaves into vibrations.
- (D) to turn vibrations into nerve signals.

12. Which option gives a correct sequence of events in the hearing process?

- (A) *pinna* catches soundwaves → *malleus* moves → soundwaves travel through ear canal
- (B) *stapes* moves → eardrum vibrates → brain interprets nerve signals
- (C) soundwaves travel through ear canal → eardrum vibrates → brain interprets nerve signals
- (D) *malleus* moves → brain interprets nerve signals → cells pass movements to auditory nerve

13. What is the arrow pointing to in the diagram?

- (A) the *malleus*
- (B) the *cochlea*
- (C) the eardrum
- (D) the auditory nerve

14. In the title of the text, the word 'm-ear-acle' is written in this way for two reasons. What are they?

- (A) to show how many syllables the word has AND to show its correct pronunciation
- (B) to link the title of the text to its content AND to make a joke using words
- (C) to make a joke using words AND to demonstrate the importance of hearing
- (D) to give an acceptable alternative spelling AND to link the title of the text to its content

Read the text and answer the questions that follow.

THE WHALE

'I just swam near a whale!' Jack shouted as he burst through the kitchen door. Everyone looked at him. His wetsuit was still dripping.

'Don't be ridiculous!' Grandad growled.

Grandma smiled, 'That sounds like a tall story, Jack. Now go outside and dry yourself before you come inside.'

'I want to see it!' Ella squealed.

'Maybe it's sick,' Sophie added quietly.

It was the weekend and the children were visiting their grandparents who lived by the beach. 'You'd better show us,' Grandad said as he climbed reluctantly out of his deep, comfortable chair and ambled towards the door. Jack raced ahead of Grandad back to the beach. His sisters scrambled to keep up. Grandma wiped her hands, took off her apron and hurried after them.

A crowd of excited people was huddled together on the cliff top watching the whale. Overhead, a black helicopter hovered, cameras rolling. In the water, surf lifesavers on surfboards made a circle around the whale to keep swimmers and boats away. The whale was huge and swimming lazily, close to the shore.

'It's a humpback,' said Grandma.

'No,' someone in the crowd answered, 'it's a southern right.' People moved up and down trying to get a better view.

'I saw it yesterday when it first arrived,' another man said.

'Hope it's OK,' Ella whispered as she began to cry.

Grandad spoke to a man who seemed to know what was going on.

'It's a female. She might be having a baby soon,' the man said.

Sophie and Ella hugged each other. 'Can we watch it being born?' Ella asked.

'I don't think so,' the man replied shaking his head. 'Whales usually give birth at night.'

That night the children could hardly sleep. Early next morning just before dawn, they crept out and rushed down to the beach. Before them swam the great whale with her new calf.

15. 'That sounds like a tall story, Jack.'

These words tell readers that Grandma thought Jack's story was

- (A) long.
- (B) hard to believe.
- (C) enjoyable.
- (D) difficult to understand.

16. 'You'd better show us'

The word 'You'd' in this sentence is made up of two words. The first word is 'You' and the second is

- (A) 'did'.
- (B) 'would'.
- (C) 'had'.
- (D) 'could'.

17. The word 'ambled' means that Grandad moved

- (A) nervously.
- (B) quietly.
- (C) carefully.
- (D) slowly.

18. To the people watching, the arrival of the whale is best described as

- (A) unusual.
- (B) shocking.
- (C) dangerous.
- (D) inconvenient.

19. According to information in the text, when whales give birth they normally

- (A) like to hide.
- (B) go into deep water.
- (C) do so at night.
- (D) are very hungry.

20. The children 'crept out' of the house so that they did not

- (A) wake their grandparents.
- (B) get delayed by the crowd.
- (C) frighten the baby whale.
- (D) miss out on seeing the sunrise.

21. The last sentence leaves readers with a sense of

- (A) fun.
- (B) loneliness.
- (C) impatience.
- (D) amazement.

Wolfgang Mozart

Can you imagine being a performer from the age of seven, away from home for years at a time, with no time for school, friends or games? This was the extraordinary childhood experience of Wolfgang Mozart (1756–1791), famous composer and child prodigy. He was called a child prodigy because even as a young child, he exhibited musical skills far beyond his age. He was a gifted performer and composer, playing the *clavier** at the age of four and composing short pieces of music when he was five. His older sister, nicknamed Nannerl, was also a talented musician but has been overshadowed in history by her more famous brother Wolfgang, known simply as Mozart.

Mozart and Nannerl had no experience of a carefree childhood. Their father Leopold neglected his own career and devoted his days to teaching his children and nurturing their talents. Music was their life. Leopold considered he had a duty to show off their astonishing musical gifts, and of course their performances made an important contribution to the family's income.

The children's extreme youth and talent were what made them remarkable as performers, so their father was determined to exploit the situation. When Mozart was six and Nannerl ten, the two prodigies started performing in royal courts across Europe. In 1763, when Mozart was eight, the whole family set out from their home in Salzburg on an extended tour of Europe. During the three years they were away from home, the children played in royal courts, in public and in churches. Leopold reported to a friend: 'We are being talked of everywhere. Everyone is amazed, especially at the boy, and everyone whom I have heard says that his genius is incomprehensible.'

Travelling in Mozart's time was very different to travelling today. Progress in their unheated horse-drawn carriage on badly maintained roads was slow, and the family had to wait for letters of invitation (no phones or emails then) before they could organise their schedule. They had to arrange their own lodgings, and rely on the generosity of their patrons for money. The children often performed twice a day, an exhausting schedule when they were so young. At various times all the members of the family fell dangerously ill.

Despite what we might consider a demanding childhood, Mozart seemed to delight in the attention he received. It was the only life he knew, and the music he composed in his relatively short life is still beloved around the world.

* an early keyboard instrument

22. Which word from the text is **OPPOSITE** in meaning to *concealed*?

- (A) 'exhibited'
- (B) 'overshadowed'
- (C) 'neglected'
- (D) 'devoted'

23. Which underlined word, as it is used in the third paragraph, is correctly matched to its part of speech?

	Word	Part of speech
(A)	'extreme'	adverb
(B)	'royal'	noun
(C)	'During'	preposition
(D)	'everyone'	adjective

24. 'In 1763, when Mozart was eight, the whole family set out from their home in Salzburg on an extended tour of Europe.'

Which part of this sentence is the main clause?

- (A) 'In 1793'
- (B) 'when Mozart was eight'
- (C) 'the whole family set out from their home in Salzburg'
- (D) 'on an extended tour of Europe'

25. Which quotation from the fourth paragraph shows how different things were in Mozart's time compared with today?

- (A) 'badly maintained roads'
- (B) 'no phones or emails'
- (C) 'arrange their own lodgings'
- (D) 'an exhausting schedule'

26. Mozart is famous because

- (A) he had a very difficult childhood.
- (B) he held many public performances.
- (C) the music he composed is still popular.
- (D) his father gave up his own career for him.

27. The main purpose of this text is

- (A) to examine the effects of fame on children.
- (B) to inform the reader about Mozart's early life.
- (C) to describe what life was like in the late 1700s.
- (D) to discuss how Mozart's father controlled Mozart's life.

My rant: Tablets vs Textbooks

As a parent, I've embraced the idea that technology has become an important aspect of children's lives, and school is no exception. Yet even though teachers today use smart boards and internet videos to enrich their lessons, and even though students complete classroom activities using computers every day, a major remnant persists from the bad old days: traditional textbooks. They're heavy, expensive, wasteful and difficult to update, and it's time that old-fashioned printed-paper textbooks were eliminated.

Why carry a huge, heavy lump of paper around when the same textbook can be produced as an e-book and delivered on a lightweight tablet computer? Heavy backpacks full of school texts cause more than 10 000 documented student injuries a year in the United States alone. Surely there's no need for our children to go through this in the digital age!

Opponents may criticise the initial cost of purchasing a tablet, but with prices for the devices already affordable for most families (and falling by nearly 25% each year), who can justify spending \$65 on a printed science textbook that will be obsolete a few years after it is bought? That same text can be bought as an e-book for just 50% of the cost of the printed version and updated with ease. Better still, not a single tree is cut down in the process.

Nor is this reduction in paper waste strictly limited to the elimination of textbooks. With a tablet computer, for example, not only can students hold thousands of separate texts on a single device, but teachers too can deliver homework, quizzes, notes and activities to their students in electronic form. Such work can easily be stored in the digital 'cloud' and downloaded to any tablet from anywhere with an internet connection, eliminating excuses for lost homework. Taking textbooks and other schoolwork online therefore not only reduces waste, but streamlines the entire educational process as well.

Perhaps the strongest argument for getting rid of textbooks is the increasingly technology-dominated world in which students will find themselves. Computer and information technology is one of the fastest-growing and highest-paid fields of employment in the world, and this trend is likely to continue. Students schooled in a high-tech environment, therefore, will be better prepared for the workforce. For this and so many other reasons, we owe it to our kids to ditch the traditional textbook once and for all.

28. What is the writer's point of view about electronic technology in the first paragraph?
- (A) It is overused in schools.
 - (B) It should be balanced with traditional teaching.
 - (C) It is a familiar feature in classrooms.
 - (D) It has not been adequately tested by teachers.
29. The writer suggests that some people might object to replacing textbooks with tablets because they think that
- (A) students learn better from textbooks.
 - (B) tablets are too expensive.
 - (C) tablets are too hard to update.
 - (D) students prefer textbooks.
30. The word 'obsolete', as it is used in the text, means
- (A) outdated.
 - (B) unwanted.
 - (C) worn-out.
 - (D) unused.
31. The writer places the word 'cloud' in inverted commas to show that
- (A) the word is important.
 - (B) a definition will be given for the word.
 - (C) the word is quoted from another source.
 - (D) the word is being used in an unusual way.
32. Which quotation from the text best shows that the writer has negative feelings about textbooks?
- (A) 'traditional textbooks'
 - (B) 'a huge, heavy lump of paper'
 - (C) 'That same text can be bought as an e-book'
 - (D) 'eliminating excuses for lost homework'
33. Which two aspects of tablets are the focus of the fourth paragraph?
- (A) affordability and reliability
 - (B) efficiency and safety
 - (C) environmental impact and reliability
 - (D) convenience and efficiency
34. The writer feels that the best reason to switch from textbooks to tablets is
- (A) to reduce the potential for student injury.
 - (B) to get students ready for the workforce.
 - (C) to decrease the number of trees that need to be cut down.
 - (D) to engage students who like to use computers.
35. What type of text is this?
- (A) narrative
 - (B) persuasive
 - (C) descriptive
 - (D) informative

Storm Coming

When Dorothy stood in the doorway and looked around, she could see nothing but the great grey prairie on every side. Not a tree nor a house broke the broad sweep of flat country that reached to the edge of the sky in all directions. The sun had baked the ploughed land into a grey mass, with little cracks running through it. Even the grass was not green, for the sun had burned the tops of the long blades until they were the same grey colour to be seen everywhere. Once, the house had been painted, but the sun blistered the paint and the rains washed it away, and now the house was as dull and grey as everything else.

When Aunt Em came there to live she was a young, pretty wife. The sun and wind had changed her, too. They had taken the sparkle from her eyes and left them a sober grey; they had taken the red from her cheeks and lips, and they were grey also. She was thin and gaunt, and never smiled now. When Dorothy, who was an orphan, first came to her, Aunt Em had been so startled by the child's laughter that she would scream and press her hand upon her heart whenever Dorothy's merry voice reached her ears; and she still looked at the little girl with wonder that she could find anything to laugh at.

Uncle Henry never laughed. He worked hard from morning till night and did not know what joy was. He was grey also, from his long beard to his rough boots, and he looked stern and solemn, and rarely spoke.

It was Toto that made Dorothy laugh, and saved her from growing as grey as her other surroundings. Toto was not grey; he was a little black dog, with long silky hair and small black eyes that twinkled merrily on either side of his funny, wee nose. Toto played all day long, and Dorothy played with him, and loved him dearly.

Today, however, they were not playing. Uncle Henry sat upon the doorstep and looked anxiously at the sky, which was even greyer than usual. Dorothy stood in the door with Toto in her arms, and looked at the sky too. Aunt Em was washing the dishes.

From the far north they heard a low wail of the wind, and Uncle Henry and Dorothy could see where the long grass bowed in waves before the coming storm. There now came a sharp whistling in the air from the south, and as they turned their eyes that way they saw ripples in the grass coming from that direction also.

Suddenly Uncle Henry stood up.

'There's a cyclone coming, Em,' he called to his wife. 'I'll go look after the stock.' Then he ran toward the sheds where the cows and horses were kept.

36. Which word could replace the phrase 'edge of the sky in all directions'?
- (A) horizon
 - (B) equator
 - (C) plains
 - (D) heaven
37. 'Once, the house had been painted, but the sun blistered the paint and the rains washed it away, and now the house was as dull and grey as everything else.'
- This sentence creates an atmosphere that is
- (A) mysterious.
 - (B) angry.
 - (C) suspenseful.
 - (D) dreary.
38. The first paragraph describes the effects of the harsh climate on the land and house whereas the second paragraph emphasises
- (A) how lack of food has affected Aunt Em.
 - (B) Dorothy's response to the difficult living conditions.
 - (C) the effects of a hard life on Aunt Em.
 - (D) Dorothy's ability to find beauty in her surroundings.
39. What is Dorothy's relationship to Aunt Em and Uncle Henry?
- (A) Dorothy has no other family and lives with them.
 - (B) Dorothy is a friend who is staying for a holiday.
 - (C) Dorothy is a stranger who pays to live with them.
 - (D) Dorothy is a neighbour's child who enjoys visiting.
40. How did Dorothy's laughter cause Aunt Em to feel, and why?
- (A) irritated because Dorothy laughed at everything
 - (B) annoyed because Dorothy laughed so loudly
 - (C) suspicious because she thought Dorothy was laughing at her
 - (D) surprised because Dorothy found something to laugh about
41. What is Toto's role in Dorothy's life?
- (A) He keeps her safe by alerting her about storms.
 - (B) He comforts her with his playfulness.
 - (C) He provides her and Aunt Em with protection.
 - (D) He helps her with tasks around the farm.
42. How did Uncle Henry know a cyclone was approaching?
- (A) He had read the weather forecast in the newspaper.
 - (B) He noticed that Toto was unusually quiet.
 - (C) He made a judgment based on his observations.
 - (D) He had seen Dorothy's worried face.

For each question below, choose the best option to complete the passage.

Everyone knows that elephants are huge, land-dwelling animals that roam the grasslands and forests of Africa and Asia. ____ (43) ____, you may be surprised to learn that elephants are actually closely related to a very different animal: the dugong. Both this aquatic mammal and the elephant ____ (44) ____ a common ancestor that lived between 56 and 39 million years ago. The two look very different now, but have similar characteristics: both dugongs and elephants, for example, grow long teeth known as tusks. In another 50 million years, who knows what strange creatures ____ (45) ____ found to be descended from these animals!

43. (A) Likewise
(B) Because
(C) However
(D) Besides
44. (A) share
(B) have shared
(C) had shared
(D) shares
45. (A) can be
(B) must be
(C) might be
(D) ought to be
