DO NOT OPEN THIS BOOKLET UNTIL INSTRUCTED.

45 QUESTIONS

TIME ALLOWED: 45 MINUTES

STUDENT'S NAME:

Read the instructions on the **ANSWER SHEET** and fill in your **NAME, SCHOOL** and **OTHER INFORMATION**.

Use a 2B or B pencil.

Do **NOT** use a pen.

Rub out any mistakes completely.

You **MUST** record your answers on the **ANSWER SHEET**.

Mark only **ONE** answer for each question.

Your score will be the number of correct answers.

Marks are **NOT** deducted for incorrect answers.

There are **45 MULTIPLE-CHOICE QUESTIONS** (1–45).

Use the information provided to choose the **BEST** answer from the four possible options.

On your **ANSWER SHEET** fill in the oval that matches your answer.

Questions may sometimes be placed next to each other.

Make sure you read **ACROSS** the page and answer the questions in the correct order.

You are **NOT** allowed to use a dictionary or an electronic translator.

Read the text and answer the questions that follow.

Nutshell boats

Walnut shells make marvellous little boats. With attention to detail and a good dose of imagination, they can be made to resemble miniature pirate ships or even ancient warships!

You will need to gather the following items:

- a few walnuts in their shells (just in case some get broken during assembly)
- a small hammer
- a piece of lightweight paper
- scissors
- coloured pencils or pens
- stickers or markers for decoration
- a toothpick
- a small piece of modelling clay
- glue (optional).

Method

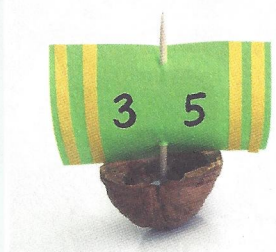

1. Gently use a small hammer to crack one of the walnuts open. Carefully split the shell into its two halves, so that each half remains intact, and remove the contents. Some walnuts open easily, while you may need to use more strength with others.

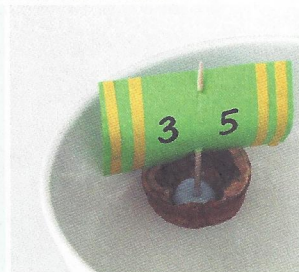

2. Cut a shape (about 3 cm x 4 cm) out of paper to create your sail. You can experiment with sail shapes: rectangles, squares or triangles can all work as long as they are symmetrical (can be divided to form equal halves). Decorate your sail to match the idea you have for your boat. For example, a pirate ship might have a skull and crossbones on the sail. If your boat is to be entered into a walnut shell boat race, you might consider putting a number on the sail or the boat shell.

3. Using the toothpick, make two tiny holes in your sail along a line of symmetry, one at the top of the sail and one at the bottom. Thread the toothpick through the holes to make the mast. You could also glue the toothpick to your sail.

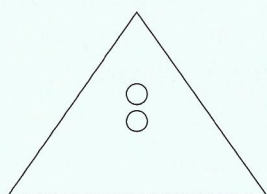

4. Attach your mast to the bottom of the walnut shell using a small piece of modelling clay. Float your boat in a small amount of water to check that your mast is straight, the sail is in the correct position, and that your boat is balanced.

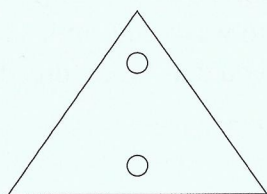

Note

Once you have mastered the basics of making a walnut shell boat, you can experiment with your design and the materials that you use. You might also like to create wind, using a fan for example, to test how well your boat floats and moves.

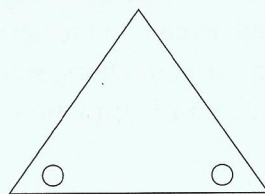

1. The words 'a good dose of imagination' refer to using
 - (A) luck.
 - (B) creativity.
 - (C) thoughtfulness.
 - (D) logic.
2. The word 'resemble' means to
 - (A) act in the same way.
 - (B) glue together.
 - (C) look similar.
 - (D) group together.
3. Glue is listed as an 'optional' item because
 - (A) it is possible to complete the walnut shell boat without using glue.
 - (B) how to glue the sail to the mast is up to the individual.
 - (C) it is not recommended to use glue on some types of walnut shell boats.
 - (D) glue is not the best material to use for attaching the sail to the mast.
4. The text suggests numbering the sail or the shell so that the boat
 - (A) is colourful.
 - (B) can float.
 - (C) looks like a warship.
 - (D) can be identified.
5. The main purpose of the section entitled 'Method' is to
 - (A) explain how the boats are able to float.
 - (B) provide instructions about how to build the boats.
 - (C) explain some of the problems of building the boats.
 - (D) recount some experiences of building the boats.
6. Why is it important to have the mast positioned in the middle of the shell?
 - (A) to make sure that the sail can be clearly seen
 - (B) to make it easier to attach the sail correctly
 - (C) to make sure that the boat is balanced
 - (D) to make it easier to attach the mast to the shell
7. If you made a nutshell boat with a triangular sail, what should the sail look like?

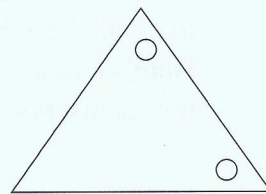

(A)

(B)

(C)

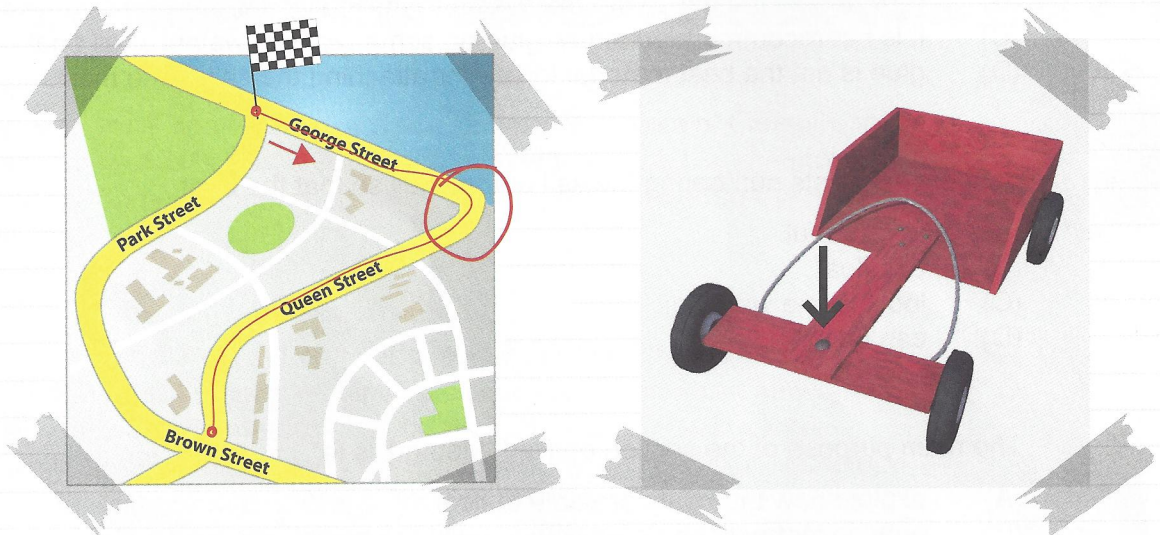

(D)

Dear Diary

Thursday 22 June

I can hardly write about the dreadfulness of it all. You know the story so far, Diary: weeks spent planning my billycart, just a couple of days building it, and only a few hours last night painting it, ready for the big race. Yes, I realise that 'dreadfulness' is an unhappy sounding word, but it describes today's events perfectly.

At 9 am exactly we lined up at the starting point on George Street. Mrs Digby waved her chequered flag around as if her life depended on it, and we took off. Thirty-two homemade billycars tore down the hill. I was in front. I was smug. Have you heard the expression 'Pride comes before a fall'? In my case it wasn't so much a fall, as a head-on collision with the hay bale barrier at the end of George Street.

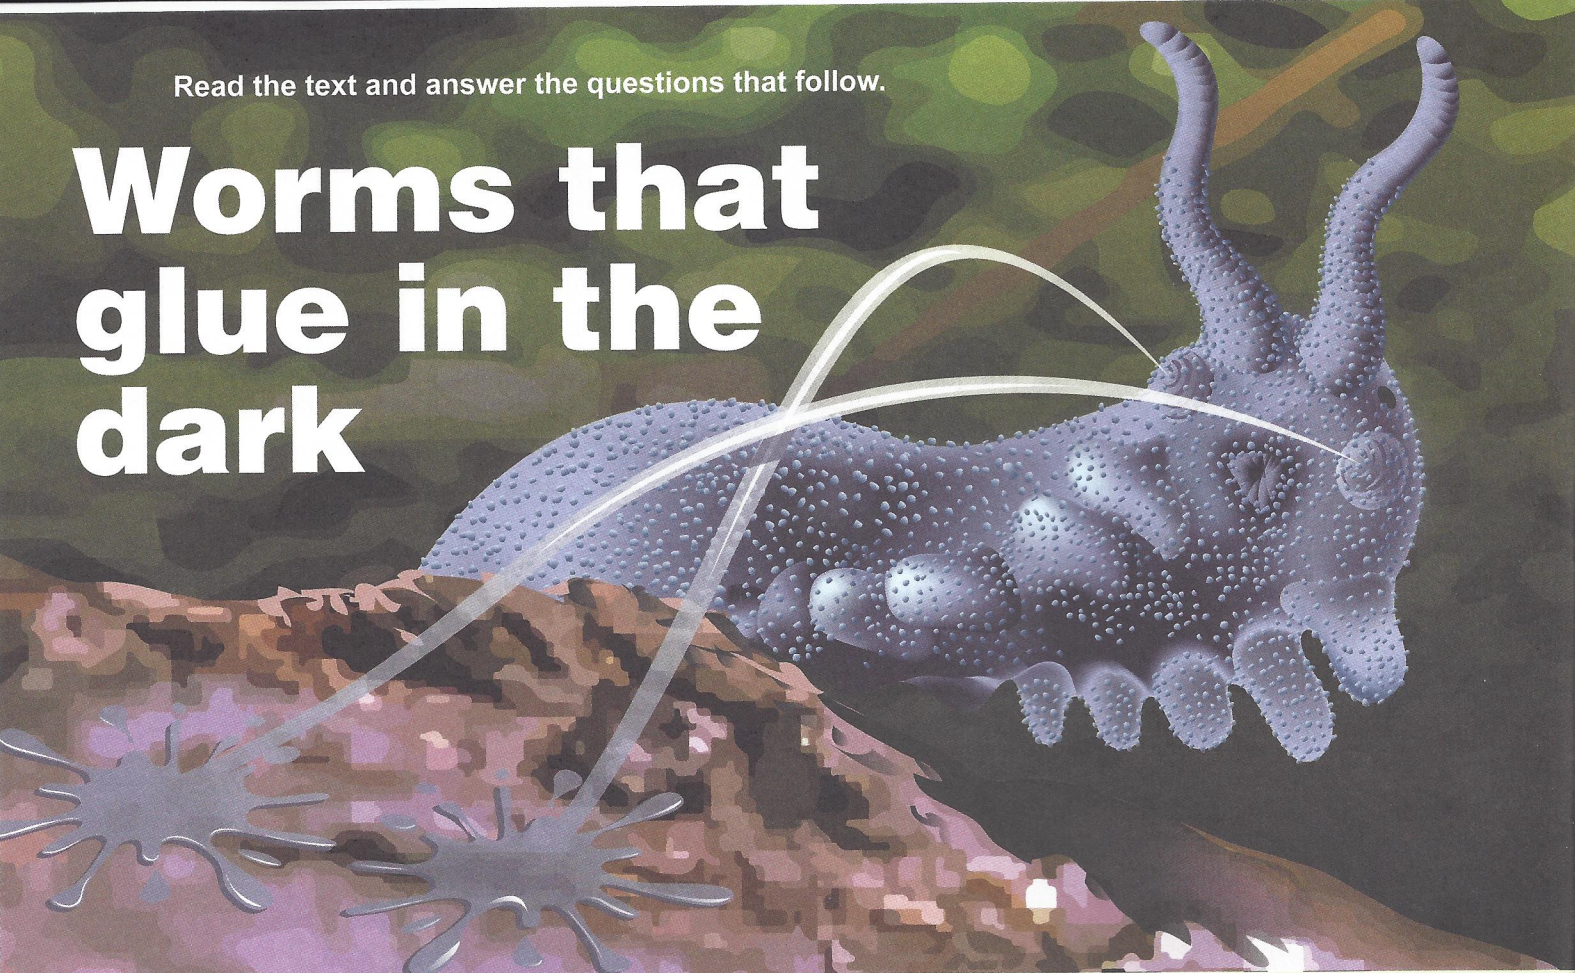

I've drawn the racetrack on the map. See that sharp right-hand bend into Queen Street? I've circled it on the map. Well, Diary, I missed it completely. Sailed straight ahead into the hay bales, didn't I? And why, you ask, did I miss the turn? Well, for that explanation we need to return to the plans. It seems that I made an error with the steering mechanism: it didn't steer! In my effort to make sure that the cart held together, I had over-tightened the bolt holding the front axle (I've marked it with an arrow on the picture). I know what you're thinking, Diary. I agree that a test run would've indicated the problem, but I'd hardly had time to put the wheels on, let alone have a test run.

So, there I was. Me, the cart and the hay bales. I sat among the mess and watched 31 fully-functioning carts successfully turn the corner. Sally Harris, who is supposed to be my best friend, even had the nerve to wave and smile at me as she went past. Here's a new word for you, Diary, since you don't like 'dreadfulness': chagrin. It means disappointment or humiliation.

~Anna

8. Anna wrote her diary in a way that suggested she was
- (A) hiding her feelings.
 - (B) planning for the next race.
 - (C) sharing the day's events.
 - (D) defending her decisions.
9. 'Mrs Digby waved her chequered flag around as if her life depended on it'
- This description suggests that Mrs Digby waved her flag
- (A) fearfully.
 - (B) carefully.
 - (C) suddenly.
 - (D) energetically.
10. The word 'smug' means that Anna
- (A) was determined to do her best.
 - (B) felt cosy in her cart.
 - (C) felt confident that she would do well.
 - (D) was proud to be taking part in the race.
11. Anna missed the turn into Queen Street because
- (A) the cart was travelling too fast.
 - (B) the right-hand bend was too sharp.
 - (C) there were hay bales in her way.
 - (D) there was a fault with her cart.
12. Anna drew the circle on the map to show
- (A) where the race started.
 - (B) where the cart crashed.
 - (C) where George Street is.
 - (D) where the race finished.
13. Anna accepted that her accident could have been prevented by
- (A) spending more time building the cart.
 - (B) trying out the cart before the race.
 - (C) tightening the bolts and screws before the race.
 - (D) becoming more familiar with the racetrack.
14. 'Sally Harris, who is supposed to be my best friend, even had the nerve to wave and smile at me as she went past.'
- This quotation tells readers that Anna thought Sally was
- (A) being disloyal to her.
 - (B) cheating in the race.
 - (C) partly responsible for her accident.
 - (D) desperate to win the race.

Worms that glue in the dark

Don't be fooled by this strange little worm with its soft-looking skin and cute stubby feet. This velvety-looking little creature has an iron fist: it is a lethal night-time predator that ambushes its prey, then glues it to death!

The velvet worm is a reclusive little animal that inhabits moist dark places. The body of the velvet worm is covered with papillae (tiny bulges with bristles that are sensitive to touch and smell). These papillae give the worm's skin its velvety appearance.

Glue-gun hunting

The velvet worm's hunting success relies on a highly specialised technique: it squirts a fast-hardening glue at its prey. Gonzalo Giribet, a biologist at Harvard University, likens this mechanism to 'casting a very broad and sticky net in front of your head'. The worm squirts the liquid glue from glands located on the sides of its head. It sprays in an overlapping snake-like pattern, similar to the way two unrestrained garden hoses would spray if they were connected side-by-side and the taps opened fully. The glue can be propelled up to 10 centimetres; there are some reports of sprays reaching 30 centimetres.

The worm targets the limbs of its prey with its 'glue guns', rapidly immobilising them. A few more squirts provided at close range ensure that the prey will stick around. Spiderman, eat your heart out!

Glue composition

The glue comprises 90% water, proteins, sugars, fats and a chemical called nonylphenol. It is thought that the fat and nonylphenol components prevent the worm from gluing itself. These two chemicals are also thought to slow down the drying process long enough for the glue to spray through the air and onto its target.

Glue recycling: crispy on the outside!

After gluing its prey into submission, the velvet worm bites it, injecting digestive saliva which liquefies the helpless victim's insides. The worm uses a lot of energy to produce glue and it can take about 24 days to replenish its supplies, so the worm recycles ingredients by eating the dried glue when it consumes its prey. Yum, crispy on the outside with lovely gooey insides!

15. The writer uses contrast in the opening paragraph in order to
- emphasise that the worm's appearance is misleading.
 - describe how the worm disguises itself.
 - emphasise the worm's colour.
 - explain how the worm traps its prey.
16. The words 'lethal' and 'predator' mean that the worm
- uses camouflage when it hunts.
 - is a highly effective hunter.
 - attacks its prey from a distance.
 - has an unusual defence mechanism.
17. In the third paragraph, the writer makes a comparison between the worm's glue spray and the water spray from garden hoses. What is being compared?
- the volume of the spray
 - the pattern of the spray
 - the distance of the spray
 - the effects of the spray
18. 'The glue can be propelled up to 10 centimetres; there are some reports of sprays reaching 30 centimetres.'
- Which word could replace the semicolon (;) and retain the meaning of the sentence?
- but
 - then
 - since
 - still
19. Which combination of factors would most likely result in hunting success for the worm?

	Factor 1	Factor 2
(A)	There is a distance of 30 cm between the worm and its prey.	The worm's prey is unaware it is being targeted.
(B)	There is a distance of 8 cm between the worm and its prey.	The worm has not hunted for 3 weeks.
(C)	There is a distance of 10 cm between the worm and its prey.	The worm has sprayed glue twice in the last 24 hours.
(D)	There is a distance of 15 cm between the worm and its prey.	The worm's prey is moving.

20. One way that the worm speeds up its production of glue is by
- mixing it with water, sugar and fats.
 - spraying glue on its prey at close range.
 - hiding during the day.
 - eating the glue that trapped its prey.
21. The final sentence of this text is best described as
- a scientist's attempt to summarise studies of the worm.
 - details based on the writer's experience.
 - the writer's humorous comment on a gruesome detail.
 - a lighthearted comment taken from an interview with Giribet.
22. The image of the worm is used to support information in the text about
- why it only hunts at night and what happens to its prey.
 - when it hunts its prey and the main components of its glue.
 - how sticky its glue is and which prey it likes to trap.
 - how it got its name and the way it traps its prey.

EMILY

Emily drummed her fingers on the armrest, absent-mindedly keeping time with the chugging rhythm of the steam train as it made its way over Kicking Horse Pass. There was nothing to do except gaze out of the window at beautiful tree-topped mountains, stunning emerald green lakes, breathtaking waterfalls and steep rocky slopes; she'd been doing that for the last two days. Why had her papa accepted a job in this wild place? She knew better than to ask him for an explanation.

It was still oppressively hot in the compartment, even though she had opened the window and left the door ajar. To make matters worse she was hungry, but dinner wouldn't be served for another three hours. So, when the chugging slowed and the train lurched to a clumsy halt, Emily felt thankful for the change of pace. She stuck her head out of the window and gasped. Hundreds of tribal people lined the side of the train track, young and old, male and female. Feathered headdresses, bows and arrows, leather clothes, beads and unfamiliar sounds—Emily struggled to make sense of the scene, not knowing what to think or how to feel. For her, these native North-American people had only existed as black-and-white pictures in the pages of her school history books.

A knock at the door made her lift her head and she yelped in pain when she banged it on the half-open window. Emily rubbed her head while the engine driver, who was covered in soot and smelling of smoke, told her they would stop for an hour. The people of the Cree nation had travelled many miles to welcome the train passengers to their land, he explained. Emily tried to concentrate on what he was saying, but with the white skin around his eyes where his goggles had been and his sooty face, he looked like a racoon in reverse. If her head hadn't been quite so sore, she probably would've smiled at the sight.

She poked her head gingerly out of the window and looked down at a girl about the same age as her. The girl smiled and beckoned. Emily clambered down the steps of the carriage and onto the tracks. Accustomed to the swaying motion of the train, she now felt strangely unsteady on land. The girl held out a pair of moccasins to Emily.

'Thank you. My name is Emily,' she said to her new friend. 'Em-ill-ee,' she repeated more slowly pointing to herself and nodding at the girl to see if she understood.

'My name is Still Water,' the young girl replied. 'Still-War-ter,' she mimicked Emily's sing-song pronunciation, and smiled. 'I belong to the Cree people. Welcome to our land.'

23. The writer introduces the setting and the main character by contrasting
- (A) the sameness of the views and Emily's numerous fears.
 - (B) the magnificent views and Emily's lack of appreciation for them.
 - (C) the pace of the train and the rhythm of Emily's drumming fingers.
 - (D) the untamed wilderness of the region and the strictness of Emily's father.
24. Which option could replace the phrase 'even though' in the second paragraph and retain the same meaning?
- (A) however
 - (B) as a consequence
 - (C) despite the fact that
 - (D) because
25. Emily's initial response when she saw the native people suggests that she felt
- (A) anxious.
 - (B) overwhelmed.
 - (C) fearful.
 - (D) annoyed.
26. Why did Emily poke her head 'gingerly' out of the window?
- (A) She didn't want to annoy the engine driver.
 - (B) She didn't want to offend the Cree girl.
 - (C) She didn't want the Cree people to think that she was staring.
 - (D) She didn't want to hurt her head again.
27. In the fourth paragraph, what does the word 'strangely' tell readers about Emily's struggle to keep steady?
- (A) It suggests that Emily found it unexpectedly difficult to stand still.
 - (B) It emphasises that Emily's behaviour looked peculiar to Still Water.
 - (C) It suggests that Emily felt embarrassed at being unable to stand.
 - (D) It emphasises that Emily's sore head was affecting her balance.
28. When Emily introduced herself to Still Water, what assumption did she make?
- (A) that Still Water would expect a gift
 - (B) that Still Water would not be friendly
 - (C) that Still Water would struggle to understand English
 - (D) that Still Water would be curious about Emily's clothes
29. The word 'mimicked' means
- (A) conversed.
 - (B) stuttered.
 - (C) adjusted.
 - (D) imitated.

Read the text and answer the questions that follow.

Book review: **The Treasure** by Dennis Bowman

Dennis Bowman really knows how to tell a great story. In his debut adventure novel for young readers, he has tinkered with the typical find-the-lost-treasure tale to produce a rollicking adventure story. His choice of a strong young character who takes control will appeal to younger readers.

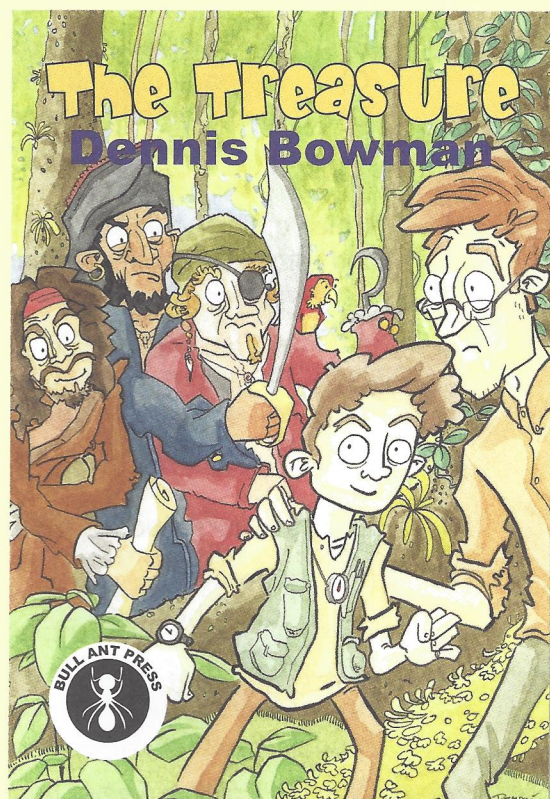

History teacher Benny Baxter discovers an old treasure map and decides to travel to the Borneo jungle to find the gold. Just as he is about to leave, his favourite nephew, Sam, turns up and needs a place to stay. Uncle Benny has no choice but to include Sam in his travel plans.

On arrival in Borneo, the pace of the story picks up remarkably, while Uncle Benny loses his grip on the search for gold with equal speed. Sam learns that his uncle is not the brave adventurer he imagined himself to be. He's clumsy, forgetful, and petrified of everything that moves—and there are plenty of things that move in the Borneo jungle! When Uncle Benny loses the treasure map, Sam really starts to have serious doubts. Those doubts turn to real fear when they cross a raging river, encounter a large snake and meet a gang of ferocious pirates who have found the misplaced treasure map! Bowman's jungle pirates are a bunch of bumbling bullies who, in a twist on a regular pirate tale, travel around the jungle's rivers in canoes. Sam is intelligently characterised and the reader learns more about his strengths as the story unfolds. Some of Uncle Benny's ideas about how to get out of sticky situations are unhelpful while others are riotously funny. Thankfully, Sam is there to take control, recover the map, and return Uncle Benny safely to his little cottage in the country. Quite a lot of responsibility for a 10-year-old.

Bowman is particularly skilled at creating nailbiting action and unexpected twists. He is one of the few authors who can develop a plot that has the reader hanging on every word. The reader truly shares the adventure, experiencing everything the characters do and everything they think. *The Treasure* is a book that takes you on an exhilarating journey in the safety and comfort of your living room. There are rumours that Bowman is working on a sequel to *The Treasure*, set in space with unfriendly aliens and an out-of-control robot. Sounds exciting, but surely Uncle Benny wouldn't venture out again?

Bull Ant Press, \$12.99, Age guide: 7–10 years

Reviewed by Catherine Pelosi ★★★★★

30. Which option could replace 'tinkered with' and retain the same meaning?
- (A) connected with
 - (B) borrowed
 - (C) adjusted
 - (D) persevered with
31. Who is Benny Baxter?
- (A) Sam's uncle
 - (B) author of *The Treasure*
 - (C) Sam's teacher
 - (D) Dennis Bowman's uncle
32. Which two things are being compared in the first sentence of the third paragraph?
- (A) the pace of life in the Borneo jungle and the pace of Uncle Benny's life
 - (B) the hardship of the Borneo jungle and the challenges of Uncle Benny's search for gold
 - (C) the speed that events unfold and the rate at which Uncle Benny loses control of the treasure hunt
 - (D) the challenging environment of Borneo and Uncle Benny's difficult personality
33. Which statement best describes the content of the third paragraph?
- (A) a detailed recount of events from Uncle Benny's perspective
 - (B) a description of the main characters with a focus on their faults
 - (C) a plot summary with highlights and information about characters
 - (D) an overview of the story from Sam's perspective
34. 'Bowman is particularly skilled at creating nailbiting action and unexpected twists.'
- In this sentence, the word 'nailbiting' is
- (A) an adjective. (B) a verb. (C) an adverb. (D) a noun.
35. The phrase 'hanging on every word' means that readers will be
- (A) mindful of every word.
 - (B) struggling with the vocabulary.
 - (C) excited by the story.
 - (D) analysing the language used in the story.
36. The purpose of the reviewer's question in the final sentence is to
- (A) indicate that she thinks Bowman should develop a new character.
 - (B) hint at her knowledge about changes the writer is considering.
 - (C) emphasise that she has analysed Uncle Benny's character.
 - (D) create interest in the sequel by referring to an existing character.

MR SARAMAGO

Tim pushed the small of Lucy's back, propelling her forward. 'You go first,' he said. 'You're a girl so you won't get in trouble.'

Lucy snorted. 'And you're my brother so you're probably just naturally annoying.' She then slipped through the doorway and disappeared from view.

Tim heard a gasp, then silence. 'What is it?' he whispered. 'Lucy!'

Then he heard Mr Saramago's voice. They had not expected him to be there.

Tim took a breath and pushed himself through the gap.

'How delightful to see both of you!' said Mr Saramago.

Mr Saramago was sitting in his wheelchair. He stared at them intently as Tim sidled up to Lucy. A patchwork quilt covered his knees and legs. Tim tried to make out the words formed by the letters picked out in the multi-coloured squares.

Mr Saramago cleared his throat. 'I *knew* that you would visit me. I knew it the very first time I saw you. It was just a feeling,' the white-haired man continued, 'but my instincts are seldom wrong. And what is instinct anyway? You can also learn a lot just by looking.' Mr Saramago studied his hands. 'Observing, listening.' He looked up and smiled at Lucy. 'I'm not sure that your brother is *naturally* annoying—I think he may have to work at it sometimes.'

Tim looked at the pictures on the walls: Mr Saramago in uniform, old newspaper clippings and certificates of commendation. *You solved one of the most baffling crimes of the decade. You worked with the Commissioner.*

Lucy took a breath. 'Can you help us, Mr Saramago?' and she began to explain why they had come.

37. Why did Lucy gasp?
- (A) She was surprised to see Mr Saramago.
 - (B) She realised she was separated from Tim.
 - (C) She was happy to meet Mr Saramago.
 - (D) She had become angry with Tim.
38. In the third paragraph, how was Tim feeling?
- (A) angry
 - (B) excited
 - (C) worried
 - (D) irritated
39. Why is the word '*knew*' written in italics?
- (A) to place special emphasis on the word
 - (B) to indicate the writer's response to the characters
 - (C) to show a character's thoughts
 - (D) to highlight a familiar word
40. Which quotation proves that Mr Saramago overheard Tim and Lucy talking outside his door?
- (A) "It was just a feeling"
 - (B) "but my instincts are seldom wrong"
 - (C) "Observing, listening."
 - (D) "I'm not sure that your brother is *naturally* annoying"
41. Which quotation tells the reader that Mr Saramago was once important?
- (A) 'He stared at them intently'
 - (B) 'Mr Saramago cleared his throat.'
 - (C) 'the white-haired man continued'
 - (D) 'old newspaper clippings and certificates of commendation'
42. Tim and Lucy went to see Mr Saramago to ask him
- (A) about the newspaper article.
 - (B) about the crimes he had solved.
 - (C) for assistance in solving a problem.
 - (D) for advice about contacting the police.

Why do peppermints feel ^{❄️}cold to eat and peppers feel [🔥]hot?

Strangely enough, the answer to this question is the same for peppermints and peppers: put simply, the brain is tricked into thinking that ____ (43) ____ a change in temperature. In peppermint, a chemical known as menthol is responsible for this trick, whereas in hot peppers the chemical is known as capsaicin. ____ (44) ____ you pop a pepper or a peppermint into your mouth, the chemicals cause certain nerves to become more sensitive. In the case of peppermints, the menthol triggers a cold sensation, although there is no actual change in temperature. For peppers, the capsaicin causes certain nerves ____ (45) ____ that something is hot, when again there is no change in temperature.

43. (A) there was to be
(B) there was being
(C) there is to be
(D) there has been

44. (A) When
(B) Until
(C) Since
(D) While

45. (A) which send the signal
(B) to send the signal
(C) that send the signal
(D) sending the signal
