

ICAS

PAPER B

2017 ENGLISH

**DO NOT OPEN THIS BOOKLET
UNTIL INSTRUCTED.**

45 QUESTIONS

TIME ALLOWED: 45 MINUTES

STUDENT'S NAME:

Read the instructions on the **ANSWER SHEET** and fill in your **NAME, SCHOOL** and **OTHER INFORMATION**.

Use a pencil. Do **NOT** use a coloured pencil or a pen.

Rub out any mistakes completely.

You **MUST** record your answers on the **ANSWER SHEET**.

Mark only **ONE** answer for each question.

Your score will be the number of correct answers.

Marks are **NOT** deducted for incorrect answers.

There are **45 MULTIPLE-CHOICE QUESTIONS** (1–45).

Use the information provided to choose the **BEST** answer from the four possible options.

On your **ANSWER SHEET** fill in the oval that matches your answer.

Questions may sometimes be placed next to each other. Make sure you read **ACROSS** the page and answer the questions in the correct order.

You are **NOT** allowed to use a dictionary or an electronic translator.

Writer

Vee was lying on her bed in her room, with her laptop open in front of her. Someone was knocking loudly on the door, but she didn't hear it. Not because she was wearing earphones, listening to music, but because her mind was far away, deep in another world. All the things around her—her bed, the cracks in the ceiling, the poster on the wall, the window and the street outside—had disappeared from sight and sound. She was writing a story.

'Vee! Can I come in?'

She heard nothing. She kept tapping on the keyboard. Her thoughts were bouncing and leaping about, then slipping from her mind, down her arm, into her fingers, spreading across the keys and then finally onto the screen. Words words words, like hundreds of leaves spinning in a whirlwind.

The door pushed slowly open. In sidled Vee's little brother Max. He took fairy steps, expecting any moment that Vee would look up crossly and tell him to go away. She hated being disturbed when she was writing. Max knew that, but he was bored and lonely. He got down on his hands and knees and crawled towards a patchwork quilt that lay on the floor next to the bed. He curled up in a ball and concealed himself under it.

He listened to the continuous rhythmic tapping of her fingers, like a faint little drum. He tried to imagine what all the words were saying. Vee would never read him her stories. 'Private!' she would snap if he dared to ask.

He wriggled under the quilt. It was not that comfortable, lying on the floor. 'This must be what it feels like to be a cat,' he thought. 'No wonder Ginger is always jumping up on the sofa.' He stretched out his arms and legs, pretending he was a cat. He wrinkled his nose and blinked slowly, the way Ginger did. If he had had a tail, he would have raised it in the air.

Suddenly the tapping came to a dead stop. 'Oh I'm stuck!' cried Vee, dramatically. 'What on earth could happen next?'

Under the blanket, following his own train of thought, Max said: 'Meow.'

There was a silence. Max froze. Why had he said that? Vee was going to be so angry with him! He waited, trembling inside.

Then Vee said: 'Yes! That's it! Of course! A cat!' And the furious tapping started again.

Max felt his limbs relax and he let his breath out. He smiled to himself. He had helped her! He might never get to hear the story, but he couldn't help feeling proud that just a little part of it belonged to him. He purred.

1. Vee didn't respond to the knocking on her door because
 - (A) she knew it was her younger brother.
 - (B) she was focused on her writing.
 - (C) she was playing her music too loudly.
 - (D) she was in a bad mood and didn't want to see anybody.

2. In the third paragraph, Vee's words are compared to
 - (A) thoughts.
 - (B) fingers.
 - (C) keys.
 - (D) leaves.

3. Vee's brother 'sidled' into the room.
This means that he
 - (A) crawled slowly.
 - (B) ran quickly.
 - (C) sneaked quietly.
 - (D) walked briskly.

4. Max decided that Ginger always jumped onto the sofa because
 - (A) Ginger wanted to get Vee's attention.
 - (B) the sofa was much warmer than the floor.
 - (C) Vee would not let Ginger sleep on her quilt.
 - (D) the floor was so uncomfortable.

5. Vee's tapping came to a 'dead stop' because
 - (A) she was surprised to see her brother in her room.
 - (B) she forgot what she wanted to say.
 - (C) she did not know what to write about next.
 - (D) she had come to the end of her story.

6. The word 'furious' in the second last paragraph tells readers that
 - (A) Vee's tapping was repetitive.
 - (B) Vee's tapping was annoying.
 - (C) Vee had started again.
 - (D) Vee had put in a lot of energy.

7. Which word best describes both Vee and Max in the text?
 - (A) cheeky
 - (B) imaginative
 - (C) confident
 - (D) lonely

Brine shrimp life cycle

Brine shrimp are distant relatives of shrimp, crabs and lobsters. Like these creatures, brine shrimp are crustaceans, which means they have a hard but flexible shell (exoskeleton) for protection. Brine shrimp shed their exoskeleton 14 to 17 times as they grow. An adult reaches approximately 15 millimetres in length. In natural conditions they eat microscopic algae (plants) in salt lakes and live for about four months. Humans use brine shrimp as live food for aquariums and fish farms.

Hands holding brine shrimp.

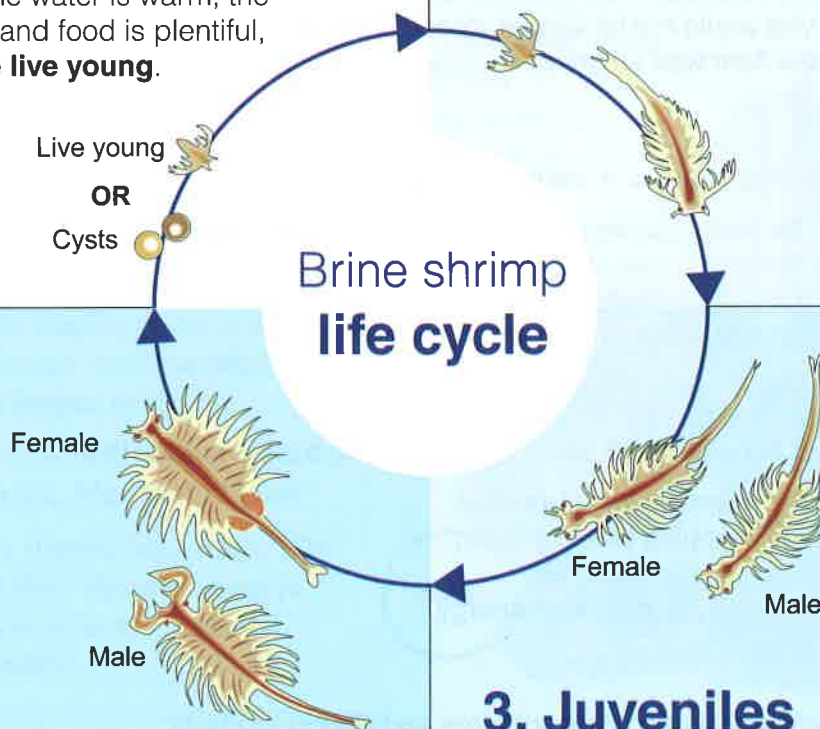

1. Embryos

The adult brine shrimp release embryos in different forms depending on the condition of the water. If the temperature, oxygen level or salt level is not right, females release **dormant cysts**. Dormant cysts have shells that enable them to survive until the conditions are right, before hatching into larvae. In fact, they can survive for up to 10 years in dry desert lakes. The worse the conditions, the harder and thicker the shells of the cysts. When the water is warm, the oxygen level is high and food is plentiful, females will produce **live young**.

2. Larvae

Brine shrimp larvae are called nauplii (NAW-plee-ee). They have single eyes to help them move towards the light to find food. At first, young nauplii use their antennae to swim and catch food. But as their legs grow, they use their legs instead. They also use gills on their legs to breathe. Later on, nauplii grow two more eyes.

Brine shrimp life cycle

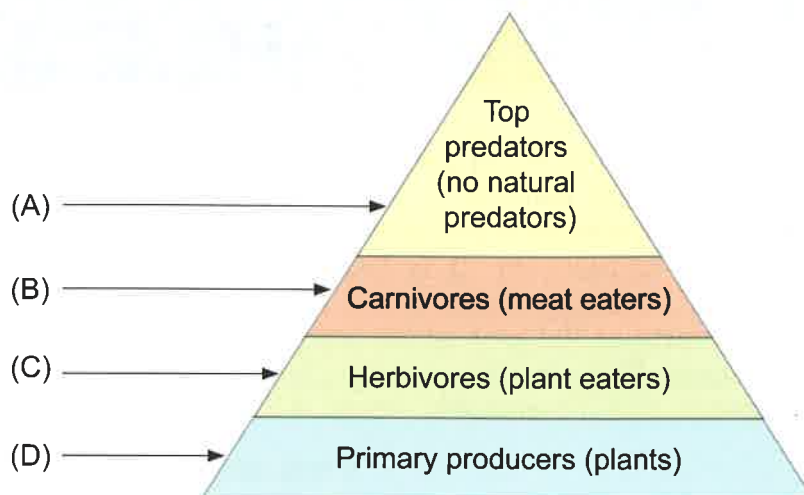

4. Adults

Adult males have large claspers on their heads. Adult females have egg sacs and are slightly larger than males. Females can produce up to 300 nauplii every four days.

3. Juveniles

The antennae of young brine shrimp shrink as their 11 pairs of legs grow. The differences between males and females become more obvious as they grow.

8. What do brine shrimp have in common with shrimp, crabs and lobsters?
- (A) All live in freshwater lakes.
 - (B) All have protective shells.
 - (C) All live for a long time.
 - (D) All eat tiny animals.
9. According to the text, where would brine shrimp fit on this diagram?

10. According to the text, what do people use brine shrimp for?
- (A) as bait to catch fish
 - (B) as aquarium pets
 - (C) as food for fish
 - (D) as food to eat
11. The word **Embryos** is written this way in the text to show that it is
- (A) a subheading.
 - (B) a caption.
 - (C) a label.
 - (D) a title.
12. Female brine shrimp produce
- (A) live young if food is in short supply.
 - (B) hard-shelled eggs that hatch in a few days.
 - (C) different embryos to suit external conditions.
 - (D) thin-shelled cysts when temperatures are extreme.
13. What type of brine shrimp is shown in the diagram below?
- (A) juvenile female
 - (B) juvenile male
 - (C) adult male
 - (D) adult female

14. Why have the hands been included in the photograph?
- (A) to give an idea of the size of brine shrimp
 - (B) to show that brine shrimp like to swim together
 - (C) to illustrate the role of humans in the brine shrimp's life cycle
 - (D) to illustrate the different types of brine shrimp a human can find

Hardly out of this world

The latest *Tyranno* movie, *Tyranno 2: Earth defence*, has just taken a nosedive and crash-landed at a cinema near you—all in 3D! While the original *Tyranno* was a visual feast with strong characters and a gripping story, *Tyranno 2* has failed miserably as so many sequels do. It is loosely based on the second book in the excellent series by Lillian Sidle, but it has mutated into a truly awful movie. In particular, parts of the plot which were significant in the book have been left out of the script. This plot-thinning has had the effect of creating characters that are somewhat one-dimensional—even if they look great in their dinosaur costumes.

Simon Gray, who did such a fabulous job in the first movie, plays Tyro. He is responsible for defending Earth from the evil pirate dinosaur Piratopod. Help with this mission is provided by a couple of velociraptor co-stars named Barry (Evan Green) and Kevin (Brian Scott). Piratopod has invented a solar-powered meteor magnet and intends to capture meteors from their space orbits, re-directing them onto a collision course with Earth. Tyro must mobilise the Earth Defence Team to locate and disable Piratopod's secret weapon. It's a typical 'good-guy-fights-bad-guy-and-overcomes-a-few-problems-along-the-way-while-winning-in-the-end' sort of movie. Usually this is a reasonable formula for success. However, the plot is mind-numbingly predictable, with gaps in the story that become obvious quite early on. This also means that the story tends to jolt strangely from one scene to the next.

I often use a 'spoiler alert' to warn readers when I intend to provide key details about a movie. In this case however, the story is so under-developed that there aren't many key details to reveal. You would think the director might have considered borrowing ideas from Sidle's books to make the characters more interesting—for instance Piratopod's twisted personality was actually explained as the result of traumatic events in his past. But no.

It is clearly in special effects that all the time and energy were invested in this movie, and if you love this sort of thing you will be enthralled. The views of Earth and the Moon are spectacular. I wasn't sitting in a cinema wearing 3D glasses; I was out there in space! Although the story is weak and the characters under-developed, the special effects are brilliant. They are the icing on a stale cake!

If the movie makers had followed Lillian Sidle's work more closely, this movie could have been a success. My suggestion to fans is to save your money on this movie and buy the book instead.

Rated: PG

Reviewed by *Lee Evan*

15. What does the word 'mutated' mean?
- (A) changed
 - (B) shifted
 - (C) progressed
 - (D) decreased
16. Why does the reviewer describe the characters as 'one-dimensional'?
- (A) This is how the characters are portrayed in the book.
 - (B) The actors did not have the experience to play the parts.
 - (C) There is a lack of character development in the movie.
 - (D) The characters are played by unknown actors in the movie.
17. What is a 'spoiler alert'?
- (A) a suggestion to change the plot
 - (B) a hint that a negative comment will be made
 - (C) a warning that key parts of the plot will be exposed
 - (D) a clue that links the movie with the book
18. The word 'enthralled' means
- (A) curious.
 - (B) fascinated.
 - (C) puzzled.
 - (D) amused.
19. Which statement would the reviewer most likely agree with?
- (A) The audience will disregard the changes to the storyline.
 - (B) The changes in the plot weakened the special effects.
 - (C) The cast was more inexperienced than expected.
 - (D) The movie was more show than substance.
20. What is the main technique used by the reviewer to persuade readers not to watch the movie?
- (A) describing what it is like to view the movie in 3D
 - (B) exaggerating the strengths of the book
 - (C) contrasting the movie with the book
 - (D) including humour
21. The overall tone of the review is
- (A) angry.
 - (B) rude.
 - (C) dissatisfied.
 - (D) arrogant.

Storm

The wind hissed at my window and I shrank beneath the bedcovers. A storm was coming. I snatched up my old teddy bear—now only used for such emergencies. My room flashed ghostly white, then *boom, crash, rumble*. Were the clouds bumping together? Then *flack, flack, flack* knocked the rain at my window. Each drop was looking for a way in. *Yoooooooooooo*. The wind joined in, moaning and groaning and screeching. I peeked out from behind my curtains just as the backyard was lit up by a flash of lightning: the trampoline and the swings were bleached white. The trees thrashed wildly.

‘It’s just a storm,’ I said to no-one in particular. My voice wobbled and I squeezed poor teddy tighter. His other eye was sure to pop off soon.

The air smelt damp and I had a bitter taste in my mouth. The thunder blasted again. Was it a giant stomping in the clouds?

No. I had to stop thinking like this! I shook my head and I raised my chin at the storm. I was safe in my house. ‘It’s *just* a storm,’ I said, pelting out the words. In fact, it wasn’t just a storm. Flash, *boom*! It was a light-and-sound show just for me. At that moment lightning lit up the night sky as if it was day—everything was brilliant white, each detail of the backyard intensified. The trees whipped about in the wind. I could feel the power of the storm.

I watched the performance for a while longer, captivated by the fury of it all. Before long, the rain increased its drumming and the thunder and lightning trailed off. The steady rhythm of the deluge comforted me and I soon found sleep tugging at my eyes and leading me back to my dreams.

22. The writer's teddy bear was 'now only used for such emergencies'.
What is the most likely explanation for this?
- (A) The old bear had been replaced by a newer teddy bear.
 - (B) The writer considered herself too grown up for teddy bears.
 - (C) The writer did not like her old teddy bear anymore.
 - (D) The teddy bear was too fragile to be held anymore.
23. In the first paragraph, the storm is mainly described in terms of how it
- (A) sounds.
 - (B) smells.
 - (C) looks.
 - (D) feels.
24. What is the purpose of the questions in the text?
- (A) to give an insight into what the writer is thinking
 - (B) to show that the writer doesn't know everything
 - (C) to highlight that the writer has no one to ask
 - (D) to emphasise the writer's curiosity
25. 'I shook my head and I raised my chin at the storm.'
This sentence signals the writer's mood changed from
- (A) surprise to acceptance.
 - (B) confusion to rage.
 - (C) terror to happiness.
 - (D) fear to defiance.
26. Personification is a way of using human qualities to describe something that is not human.
Which quotation from the text is an example of personification?
- (A) 'Each drop was looking for a way in.'
 - (B) 'I said, pelting out the words'
 - (C) 'lightning lit up the night sky as if it was day'
 - (D) 'I could feel the power of the storm.'
27. In the final paragraph, what does the 'steady rhythm' refer to?
- (A) the wind
 - (B) the thunder
 - (C) the lightning
 - (D) the rain

Capture the flag

I was the first to stop running. I had to stop. My lungs felt ready to explode; burning with every breath I took. Bent forward, head down, hands on my knees, I tried to focus on slowing my breathing and calming down. Then Maudie and Jacob were there, red-faced and breathing hard. We looked at each other and then back at the way we'd come. There was no one in sight; that had to be a good thing.

After all the planning and conniving we'd done to get to this point, I was pretty confident no one would ever guess which route we'd taken.

'We'd better not stop here,' said Maudie, her voice quiet but resolute. 'We're too close and it's too open. We'll stop for a bit when we get to the river, ok? Think things through.'

We looked at each other before nodding in silent agreement.

We walked three abreast now, like equals, with steady, measured steps. No one spoke. I, for one, was glad of the silence. I was still trying to come to terms with what we had done and getting it all straight in my head.

I glanced to my right and then my left. Maudie's serious face lit up momentarily as she flashed me a quick, reassuring smile. Her face was grimed with dirt and dust but she looked strong. Jacob was on autopilot, his face not giving anything away. His little feet in their well-worn boots marched on, uncomplaining. Brave, now that I thought of it; they both were.

Reaching the top of a long incline, we all stopped and turned as if by arrangement. Far off in the distance, the school, cars and ant-sized people in the village spread out like a half-played, abandoned board game. Not too far from the truth, I thought, and found myself grinning. As we watched, a trio of tiny, red-clad figures broke away from the slow monotony of the scene. They were too far away to be individually recognisable but I had a fair inkling who they were. I wondered whether a quick glance upwards on their part might be enough to give us away but then almost laughed at the thought. We'd left nothing to chance this time and there was no way that the Greens were going to lose again.

We turned as one and resumed walking but something had changed. Something had shifted in our collective mood. No longer the underdog, every step we took seemed to lighten and energise us, buoying us up in anticipation of the victory that lay ahead.

28. At the beginning of the text, what caused the writer to stop?
- (A) He was waiting for the others to catch up.
 (B) He did not know where he was going.
 (C) He was out of breath after running a long way.
 (D) He had reached his destination.
29. Which word could best replace 'resolute'?
- (A) determined (B) distressed (C) stubborn (D) aggressive
30. Jacob was described as being 'on autopilot' because he
- (A) tried to ignore what was happening.
 (B) appeared to be walking without thinking.
 (C) was unsure of what he should be doing.
 (D) felt scared about what might happen next.
31. Which option correctly shows what the village was described as and what technique the writer used?

	The village was described as	Technique
(A)	a board game.	simile
(B)	an ant colony.	exaggeration
(C)	a landscape.	metaphor
(D)	game pieces.	alliteration

32. Who were the 'trio of tiny, red-clad figures'?
- (A) Jacob, Maudie and the writer
 (B) visitors to the village
 (C) friends from the writer's school
 (D) members of an opposing team
33. 'there was no way that the Greens were going to lose again'
 Which pronoun could be used to replace 'the Greens'?
- (A) you (B) I (C) they (D) we
34. Which option best describes an 'underdog' in the text?
- (A) someone who refuses to take part
 (B) a participant who is unlikely to win
 (C) a person who is less privileged
 (D) someone who always tries their best
35. What were the characters most likely doing in the text?
- (A) They were acting in a movie.
 (B) They were on a challenging hike.
 (C) They were performing a military operation.
 (D) They were playing an organised game.

Read the text and answer the questions that follow.

Everything has a time

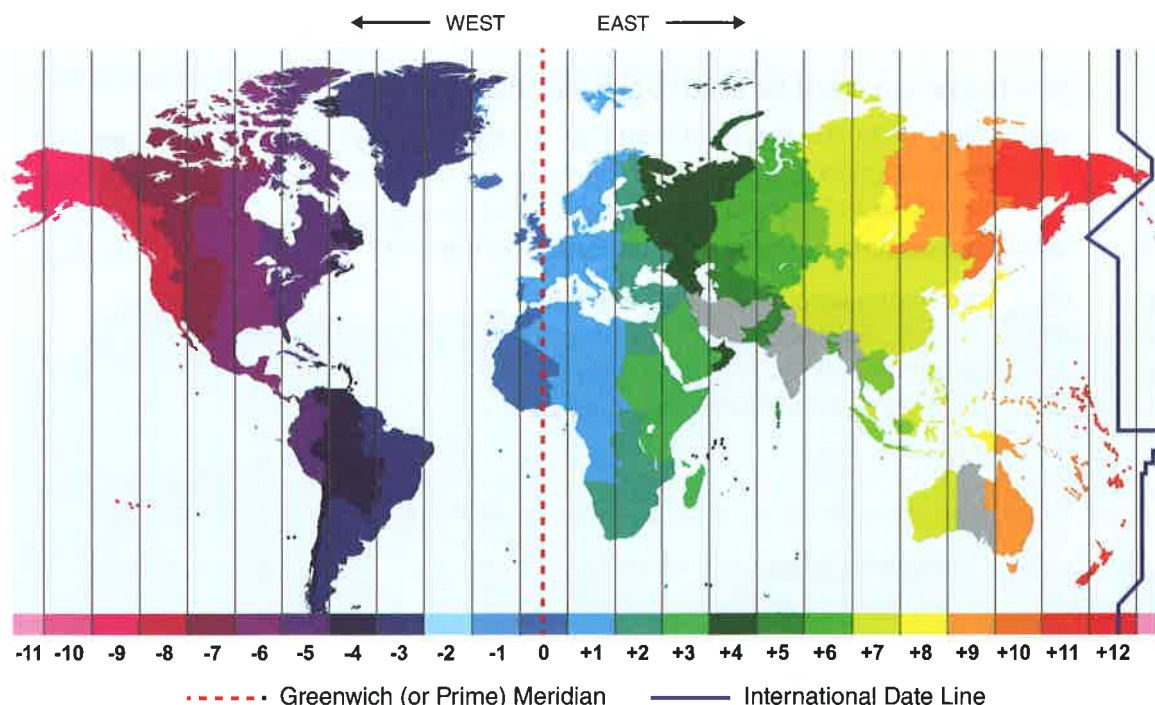

How different would it be not having to worry about seconds, minutes, hours, and being on time *all* the time? Up until the middle of the nineteenth century, people were much more relaxed about time. They were happy to divide the day up into four general periods, depending on where the Sun was in the sky: morning, afternoon, evening and night. For the most part, this was accurate enough and if different towns or regions had a different idea of what the actual time was, it didn't matter.

But with the invention of the railway, and in particular railway timetables, it became necessary for anybody wanting to travel to know exactly when the train would arrive and depart. Can you imagine turning up for the *morning* train? You could be ready and waiting from 6 am through to midday! It also became necessary to make sure that every town and station that the train passed through had its clock set to the same time. With some trains travelling not only through communities but also across whole countries, it became necessary to standardise time across the world. It was not a straightforward task but in 1884, with delegates from 26 nations, the International Meridian Conference reached agreement on how it could be done.

Earth had long been divided by astronomers into *meridians*, which are imaginary lines drawn from the North Pole to the South Pole. It was decided to divide Earth into 24 meridians. Each of these meridians would become a separate *time zone*, each set one hour apart. As an 'initial meridian', the delegates chose the one situated at the Royal Observatory in Greenwich, London. It became known as *the Prime Meridian* and the time there became known as Greenwich Mean Time or GMT.

Each meridian or time zone could then be counted as either ahead of GMT if it was east of Greenwich, or behind GMT if it was west. For instance, the time in Istanbul, Turkey is GMT+2, meaning it is 2 hours ahead of GMT, whereas Salvador, Brazil is GMT-3, meaning it is 3 hours behind GMT. So when it is 6 am in London, it is 8 am in Istanbul and 3 am in Salvador.

The meridian directly opposite from the Prime Meridian is known as the International Date Line (IDL). This is the point where the date changes. It is conveniently situated almost completely within the ocean so that things don't get too confusing. If you cross the IDL going east, the date moves forward by a day e.g. from 1 January to 2 January. You lose a whole day! But if you go west over the IDL, you gain a whole day.

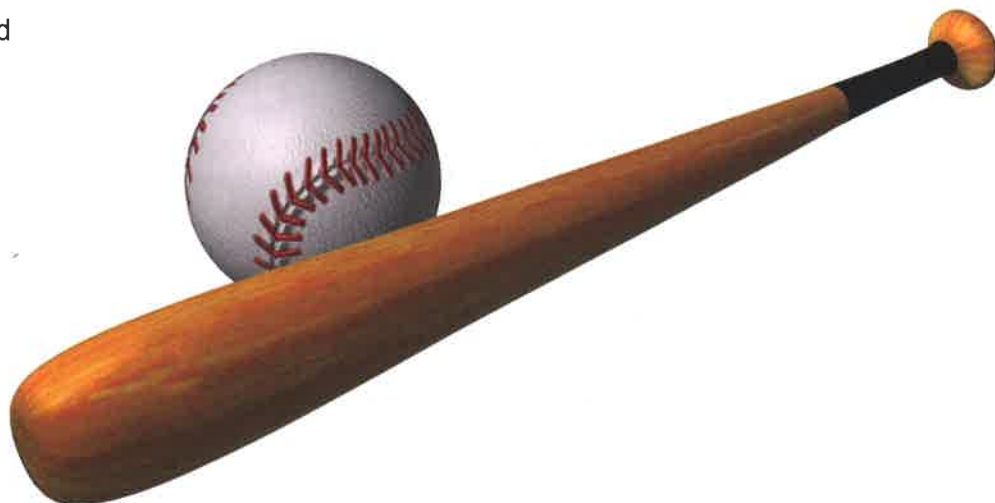

36. In the first paragraph, which words can replace the colon (:)?
- (A) therefore (B) that is (C) to sum up (D) in fact
37. 'With some trains travelling not only through communities but also across whole countries'
- Which option retains the meaning of the quotation?
- (A) With some trains travelling through communities in spite of whole countries
- (B) With some trains travelling either through communities or across whole countries
- (C) With some trains travelling through communities as well as whole countries
- (D) With some trains travelling wherever through communities and across whole countries
38. Some of the words in the text are written in *italics*. In which of the following are *italics* **NOT** used to show technical words?
- (A) 'morning'
- (B) 'meridians'
- (C) 'time zone'
- (D) 'the Prime Meridian'
39. To gain an extra day, a traveller would need to
- (A) cross the IDL in an easterly direction.
- (B) travel across all 24 time zones.
- (C) cross the IDL in a westerly direction.
- (D) travel the length of the IDL.
40. Based on information in the map, which of the following is true?
- (A) There are more time zones west of the Prime Meridian than east.
- (B) The number of countries in each time zone is equal.
- (C) Countries do not use the meridians strictly to decide on their time zone.
- (D) An area that stretches west to east is more likely to share a time zone than one that stretches north to south.
41. The IDL is a crooked line, as can be seen on the map. It is crooked because
- (A) it has a special effect on time.
- (B) it shows where night ends and day begins.
- (C) it shows which continents have to be separated.
- (D) it avoids land areas where people live.
42. The main purpose of this text is to
- (A) explain the introduction of time zones.
- (B) describe the difficulties of keeping time accurately.
- (C) show how different countries measure time.
- (D) persuade people of the importance of time.

A famous loss in baseball history

It ____ (43) ____ a moment of triumph. In the 1986 World Series, the baseball team, the Boston Red Sox, ____ (44) ____ their opponents, the New York Mets, 5–4 near the end of the game. They only had to get one more player out to win the World Series but a bad throw by the pitcher let a Mets runner score, tying the game. On the next throw, the Mets batter hit the ball weakly to a Red Sox fielder—a sure out—but it rolled right between his legs! Another runner ____ (45) ____ and the Red Sox lost the game.

They lost the next game and the World Series. So close, but so far away!

43. (A) will have been
(B) must have been
(C) may have been
(D) could have been
44. (A) had led
(B) were leading
(C) are leading
(D) would have led
45. (A) scores
(B) scored
(C) had scored
(D) will score

ANALYSIS BY QUESTION

The following table shows the questions you answered correctly ☒ and shades the questions that you answered incorrectly ☐. The questions are ranked from hardest at the top to easiest at the bottom.

	Question content	Area assessed	Question number	Correct answer
Difficult Questions	Analyse a movie review to identify a statement the reviewer would agree with	Text comprehension	19	D
	Interpret information on a map from a factual text to identify a true statement	Text comprehension	40	C
	Synthesise information from text and a map in a factual text	Text comprehension	41	D
	Identify a simile in a narrative	Writer's craft	2	D
	Interpret the use of a colon in a factual text and replace with a connective	Syntax	36	B
	Explain key information in a scientific text	Text comprehension	12	C
	Identify the correct modal auxiliary to complete a passage	Syntax	43	D
	Identify the correct verb to complete a passage	Syntax	45	B
	Locate specific information in a factual text	Text comprehension	39	C
	Understand different uses of italics in a factual text	Syntax	38	A
	Analyse a factual text to state its main purpose	Text comprehension	42	A
	Identify an example of personification in a descriptive narrative	Writer's craft	26	A
	Use different connectives to paraphrase information in a factual text	Syntax	37	C
	Explain a character's behaviour in an action narrative	Text comprehension	30	B
	Interpret idiomatic language use in an action narrative	Vocabulary	34	B
	Interpret the meaning of a word from its context: furious	Vocabulary	6	D
	Identify the correct verb group to complete a passage	Syntax	44	B
	Interpret a character's reasons for an action in a descriptive narrative	Text comprehension	22	B
	Analyse a descriptive narrative to identify the purpose of using questions	Writer's craft	24	A
	Interpret a noun phrase in a descriptive narrative	Text comprehension	27	D
	Determine the identity of characters from a description in an action narrative	Text comprehension	32	D
	Identify the meaning of a word in a movie review: enthralled	Vocabulary	18	B
	Interpret a descriptive reference in a movie review	Text comprehension	16	C
	Synthesise a text to draw a conclusion from an action narrative	Text comprehension	35	D
	Identify a persuasive technique used by the reviewer in a movie review	Writer's craft	20	C
	Identify a comparison and its literary technique in an action narrative	Writer's craft	31	A
	Identify specific information in a scientific text	Text comprehension	10	C
	Replace a noun group with a pronoun in an action narrative	Syntax	33	D
	Make an inference from information in a scientific text and show it on a diagram	Text comprehension	9	C
	Identify a synonym for a word from an action narrative: resolute	Vocabulary	29	A
Easy Questions	Analyse a narrative to infer a character trait shared by two characters	Text comprehension	7	B
	Understand a phrase commonly used in a movie review	Text comprehension	17	C
	Identify the meaning of a word in a movie review: mutated	Vocabulary	15	A
	Interpret the meaning of a word from its context: sidled	Vocabulary	3	C
	Identify a sub-heading in a scientific text	Writer's craft	11	A
	Synthesise a movie review to identify its tone	Writer's craft	21	C
	Infer a key change in character's mood in a descriptive narrative	Text comprehension	25	D
	Analyse part of a descriptive narrative to identify the main sense used	Writer's craft	23	A
	Interpret what a character thinks about another character's behaviour in a narrative	Text comprehension	4	D
	Interpret the purpose of including hands in a photograph to indicate size	Writer's craft	14	A
	Identify why a character stops an action in a narrative	Text comprehension	5	C
	Match information to a diagram in a scientific text	Text comprehension	13	B
	Find the reason for a character's behaviour in a narrative	Text comprehension	1	B
	Identify the cause for character's behaviour in an action narrative	Text comprehension	28	C
	Identify specific information in a scientific text	Text comprehension	8	B
