

Answers

Question Number	Area Assessed	Description	Correct Answer
1	Measures & Units	Read an analogue clock	B
2	Algebra & Patterns	Identify the last term in a number pattern	A
3	Number & Arithmetic	Count up by threes	D
4	Measures & Units	Calculate the difference between two heights	B
5	Space & Geometry	Follow directions to a familiar location	B
6	Space & Geometry	Locate a position on a map after taking left and right turns	D
7	Number & Arithmetic	Group shapes in lots of six and count the remainder	B
8	Chance & Data	Identify the event that won't happen	C
9	Measures & Units	Compare the areas of 2-D shapes using informal units	D
10	Number & Arithmetic	Solve a number problem given a conversion table	B
11	Number & Arithmetic	Use a number line to identify a half-way point	A
12	Measures & Units	Convert fractions of an hour to minutes to solve a time problem	C
13	Chance & Data	Identify the spinner with the best chance of landing on a 2	A
14	Space & Geometry	Identify a direction on a map	B
15	Space & Geometry	Identify a shape after repeated folding and cutting	D
16	Algebra & Patterns	Calculate a missing element in a number line pattern	A
17	Measures & Units	Identify the cup that held an object after it is removed from the water	C
18	Number & Arithmetic	Match multiplication to repeated addition on the number line	D
19	Chance & Data	Complete a table that has missing values	C
20	Space & Geometry	Determine the number of joined faces on a solid	D
21	Algebra & Patterns	Solve a number puzzle using equivalence	A
22	Measures & Units	Determine the mass of an object on a balance scale	A
23	Number & Arithmetic	Solve a problem involving remainders	C
24	Number & Arithmetic	Solve a problem involving time and multiplication by three and five	B
25	Measures & Units	Compare the lengths of folded ropes	B
26	Measures & Units	Compare shapes based on length	C
27	Space & Geometry	Identify the shapes on the surface of a solid	D

28	Space & Geometry	Determine the number of edges on a triangular prism	C
29	Chance & Data	Match a double bar graph to raw data	D
30	Algebra & Patterns	Calculate the difference between two terms missing from two sequences	C
31	Number & Arithmetic	Use a strategy involving even and odd numbers to solve a problem	A
32	Measures & Units	Solve a problem involving reading a scale with increments of ten	C
33	Number & Arithmetic	Apply logic to solve a problem involving fractions and the number line	B
34	Measures & Units	Solve a problem involving time	D
35	Space & Geometry	Use the axis of symmetry to create a new shape	B
36	Space & Geometry	Interpret a map of a familiar location and identify the relative positions of objects	C
37	Measures & Units	Find the difference between two routes using a scale	B
38	Chance & Data	Use an appropriate strategy to solve a problem	D
39	Number & Arithmetic	Model numbers up to 999 using a code	D
40	Algebra & Patterns	Make a number sentence with a multiple of 3 and a single-digit subtraction	A
