16. (A) (B) (C) (D)

17. (A) (B) (C) (D)

18. (A) (B) (C) (D)

19. (A) (B) (C) (D)

20. (A) (B) (C) (D)

21. (A) (B) (C) (D)

22. (A) (B) (C) (D)

23. (A) (B) (C) (D)

24. (A) (B) (C) (D)

25. (A) (B) (C) (D)

26. (A) (B) (C) (D)

27. (A) (B) (C) (D)

28. (A) (B) (C) (D)

SECTION C

There are eight (8) spelling errors in the following passage. Read the passage first. Then fill in the ovals under the words which have been spelt INCORRECTLY.

Fill in only EIGHT ovals. If you fill in more than eight ovals, only the first eight will be marked.

When animals or plants die, they are often burried by sand, silt or mud. Over thousands
of years, the sediment sometimes hardens into rock. Moving water, wind, and rain course
erosion, which may expose the rocks. It is then possable to see the presurved remains
of the animal or plant in the rock. These are called fossils. Only a tiny pecentage of
things that once lived on Earth are converted into fossils. This is because the environmental
conditions where they died were not sutable for them to be fossilised.

Scientists who study fossils are able to provide explanations about life on our planet
millions of years ago, such as what dinosaurs looked like and what food they ate.

The activites of various ancient creatures may also be recorded in the form of fossils.

These fossil records, which are of great value and interest to researchers, include footprints,
eggshells and even nests.

SECTION D

For questions 37 to 45 read the following passage. The nine (9) words in the shaded boxes are spelt incorrectly. Print each word **CORRECTLY** next to the matching number.

OFFICE USE ONLY

When you travel far away from the bright lights of the city, it is **37. fenomenal** how much more you can see in the night sky. **38. Ocasionaly**, you might even see a meteor streaking across the sky. This happens when a piece of space debris (a meteoroid) enters our **39. atmosphear** and **40. plummits** towards Earth, **41. culliding** with air particles along the way. The friction causes the meteoroid to leave a brilliant, **42. firey** trail. Most meteoroids **43. dissintergrate** completely on their **44. dessent**, but if one does survive, it is called a meteorite.

When Earth's orbit around the Sun takes it through a field of meteoroids, we may see a meteor shower. This is a **45. spectacle** as brilliant as a New Year's Eve fireworks display!
