# Interview with an author

Meet Catherine Pelosi. She loves reading and writing, so it's no surprise she decided to write a book of her own. Her novel, *Quark's Academy*, is for young readers and is jam-packed with science, inventions and mystery. Catherine answers some questions about writing a book and gives us a peek inside *Quark's Academy*.

***Quark's Academy* is a story about a group of students who spend a week at a mysterious science summer camp where they compete in the Best Invention Competition. How did you come up with this idea?**

Not long ago, I enrolled in an astronomy course at the Sydney Observatory. Each week we learned about the planets and looked through a huge telescope. I saw Saturn, which was incredible! However, it was the discussion on how much we don't know about the universe that sparked the concept for the story. I like the idea of using imagination *and* science to solve problems. *Quark's Academy* is full of out-of-the-box ideas and useful inventions like time travel, weather machines and even bionic bees.

**How did you decide which inventions to include in the story?**

The story follows three students at *Quark's Academy*: Augustine, Oscar and Celeste. They each have different motivations, fears and family upbringings. These factors influence the inventions they create for the competition. For example, Celeste is extremely ambitious, which is why she wants to invent a time machine, something that has never been achieved before. Augustine is kind-hearted and her Weather Maker invention will help those experiencing problems such as floods and droughts. Oscar, on the other hand, is quite mischievous. He wants to create stink bombs with terrible smells like wet dog and twelve-day-old socks.

### **Is it important for young people to learn about science?**

Everyone should learn about science! Science has advanced the world in so many ways including medical research and technology. However, I don't think we can rely on science alone. We need to become critical thinkers and use our imagination to solve problems in order to further improve how we live.

### **What is your best piece of advice to aspiring writers?**

Write what interests you. If you're not interested in what you're writing about, there's a good chance you will lose motivation and not finish it. Don't worry about trying to write what you think other people might like or the next bestseller. When you enjoy what you're writing, the words will flow more easily and there will be an energy to your writing that readers will notice. Stay true to yourself.

**Next**

What inspired Catherine Pelosi to write *Quark's Academy*?

- ☐ learning about the planets
- ☐ looking through a telescope
- ☒ discussing the universe with others
- ☐ entering the Best Invention Competition

'I like the idea of using imagination *and* science to solve problems.'

Why has the writer put the word '*and*' in italics?

- ☐ to show it is a quote from *Quark's Academy*
- ☒ to show the spoken emphasis given to a word
- ☐ to avoid using a comma for punctuation
- ☐ to illustrate how creativity is used in writing

The phrase 'out-of-the-box' means

☐

assembled.

☒

unusual.

☐

complicated.

☐

educational.

'They each have different motivations, fears and family upbringings.'

Which word is an adjective?

☐

'each'

☐

'motivations'

☐

'fears'

☒

'family'

Celeste can be best described as

- ☒ determined.
- ☐ devious.
- ☐ optimistic.
- ☐ practical.

What most clearly affects the characters' inventions in *Quark's Academy*?

- ☐ their academic skills
- ☒ their personalities
- ☐ their natural talents
- ☐ their friendships

Choose **three** reasons why Pelosi advises aspiring writers to 'write what interests you'.

- ☐ They will use critical thinking skills.
- ☒ They will be motivated to finish their writing.
- ☐ They will write a bestseller.
- ☒ The words will flow more easily.
- ☒ Their writing will have an energy about it.

# Starlight

The forest was silent. No wind blew. Even the birds seemed to have deserted the thick canopy of foliage in the woodland.

But behind a row of gum trees that lined the road, hidden by the vast trunks, stood a band of men dressed from head to toe in saddle-soap brown. As still as the forest itself, they were like statues. Or predators poised to pounce on their unsuspecting prey.

Suddenly, in the distance, horses' hooves could be heard, pounding along the hardened dirt track that formed the road. A grand carriage came into view. Immediately, the six men sprang out of hiding, blocking the horses' path. As the animals reared up in fright, the leader of the men swung the carriage door open and out stumbled a figure, richly dressed, with a pointed beard and a scowl on his face.

'Good morning, Lord Bradford,' the leader said cheerfully. His men moved closer, forming a barricade.

'How dare you interrupt my journey, Captain Starlight,' Lord Bradford began. 'There'll be retribution for this.' He looked around at his coachman. 'Can't you do something?' he shouted. 'Why did you stop for these outlaws?'

The coachman shook his head but said nothing. Out of the corner of his eye he saw Starlight give him a wink.

'Enough of the pleasantries.' Starlight pointed to the coach. 'Get the gold,' he commanded one of his men, a stocky fellow named Shorty.

Shorty climbed into the carriage and threw the bulging pouches out through the open window. 'One, two, three,' he counted until he reached twelve. The other men caught them in quick succession. They examined the contents. Each one was filled with gold coins.

**Back**

**ICAS.**

**Next**

‘Excellent,’ Starlight grinned. ‘You’ve stolen from hard-working farmers and their families,’ he said. ‘Land tax, you call it, from people who have barely enough to eat.’

‘There’ll be a price to pay for this, Starlight, you and your men,’ Lord Bradford shouted, his face reddened with rage. But he was talking to the trees. The bushranger and his band had melted into the forest, with the gold deep in their coat pockets.

And Lord Bradford began his long walk home.

Text and images: © Janison Solutions Pty Limited

The writer compares the band of men to statues in order to highlight

- ☐ the stony look on their faces.
- ☐ the dull colour of their clothes.
- ☐ that they were not a natural part of the forest.
- ☒ that they were not moving while they waited.

Captain Starlight and Lord Bradford greet each other using their names. This suggests that they

- ☐ are trying to appear clever.
- ☐ had arranged the meeting.
- ☒ know of each other.
- ☐ want to appear polite.

In the second paragraph, which character does the description 'unsuspecting prey' refer to?

- ☒ Lord Bradford
- ☐ Captain Starlight
- ☐ the coachman
- ☐ Shorty

Which phrase could best replace the word 'retribution' in the text?

- ☐ 'a scowl'
- ☐ 'bulging pouches'
- ☐ 'barely enough to eat'
- ☒ 'a price to pay'

Captain Starlight most likely gave the coachman 'a wink' in order to

- ☐ threaten him into keeping silent.
- ☒ acknowledge his cooperation.
- ☐ invite him to join the band of men.
- ☐ signal that his plan would commence.

'Enough of the pleasantries.' (paragraph 7)  
What is the most likely reason that Captain Starlight said this?

- ☐ He had noticed that the coachman was in a hurry.
- ☒ He was being sarcastic towards Lord Bradford.
- ☐ He was ignoring Lord Bradford's questions.
- ☐ He was unhappy with the way events had unfolded.

'They examined the contents. Each one was filled with gold coins.' (paragraph 8)

Which option would correctly link these two sentences?

- ☐ and so then
- ☐ so that only
- ☒ and saw that
- ☐ but they saw

# Spacious Shell for Sale

This is a unique opportunity for a young yellow-footed or striped-leg hermit crab to acquire a charming shell. It provides very suitable accommodation with a generous living area for you to draw your body inside, with room on the outer lip for both pincers.

Offering great protection against predators, this attractive winkle with only one previous owner would suit a growing hermit crab. It is clean and ready for occupation.

The architecture of this shell is magnificent, with a well-sculptured spiral. This striped periwinkle is nearly two centimetres long and pale yellow in colour. It is cone-shaped, with rounded whorls, and a distinctive pattern of brown and white bands, like zebra stripes.

Only recently vacated, it was much loved by its previous owner and remains in excellent condition.

You will be able to scuttle across the bottom of the seabed, taking this delightful home with you. We guarantee that it will not be too heavy in the water.

Your new shell inhabits a shallow tidal pool and has excellent water views. The area surrounding this shell home provides a pleasant environment to live in, close to food sources such as plankton and worms.

The shell's surface comes with the bonus of several species of sponges and a sea anemone attached. These guests will give protection and provide camouflage for the new owner. Or, if you prefer, you can bring your own decorative disguises!

Please take time to examine this stately residence, which would provide a wonderful hermitage for any hermit crab. But hurry to make your inspection of this pre-loved seaside dwelling before another young equal-handed crab snaps it up!

*Spacious Shell for Sale*

Which word from the first paragraph is used as a synonym for '*Spacious*'?

- ☐ 'unique'
- ☐ 'charming'
- ☐ 'suitable'
- ☒ 'generous'

According to Seashores Real Estate, the shell for sale is most suitable for a

- ☐ shy crab.
- ☒ young crab.
- ☐ wealthy crab.
- ☐ family of crabs.

Which feature is **not** described as an advantage of the shell?

- ☒ It is newly built.
- ☐ It is well designed.
- ☐ It is lightweight.
- ☐ It is well located.

'The shell's surface comes with the bonus of several species of sponges and a sea anemone attached.' (paragraph 7)

According to the text, why is this a 'bonus'?

- ☐ The crab will have other sea creatures for company.
- ☐ The shell will be more attractive with decorations included.
- ☐ There will be plenty of food for the crab to eat.
- ☒ There will be greater security for the new owner of the shell.

Which phrase from the text refers to the shell home for sale?

- ☐ 'a growing hermit crab'
- ☐ 'a shallow tidal pool'
- ☐ 'a pleasant environment'
- ☒ 'a wonderful hermitage'

In the final paragraph, there are two meanings of the phrase 'snaps it up'. The first refers to the snap of a crab's pincers.

What is the second meaning?

- ☒ to grab something quickly
- ☐ to break an agreement
- ☐ to lift something into the air
- ☐ to share a prize fairly

Apart from writing to persuade, the main purpose of the text is to

- ☐ provide readers with useful instructions.
- ☒ entertain readers with a humorous idea.
- ☐ interest readers using scientific explanations.
- ☐ inform readers of an exciting adventure.

## Tech know: **Microwave oven**

### **Accidental discovery**

During the 1940s, US engineer Percy Spencer was designing and testing parts for radar transmitters. While he was working near an active microwave transmitter, a chocolate bar in his pocket melted. Thinking that the microwaves may have caused it to melt, he placed popcorn kernels in front of the transmitter, which caused the kernels to pop.

Percy's discovery led to the invention of the microwave oven. Within 40 years, the 'microwave' had become one of the most popular appliances in the kitchen.

### **How does it work?**

A microwave oven consists of a box lined with aluminium shielding and a magnetron which emits microwaves. When the microwave oven is operating, microwaves 'fire' out of the magnetron. Some of the microwaves are absorbed by the food and those that are not, reflect off the metal inner casing back towards the food. When they are absorbed by the food, they are converted directly into heat in a process known as dielectric heating.

Dielectric molecules inside the food have a positive and a negative end—like a magnet. When these molecules absorb microwaves, they align themselves with the microwave's electric field. Because microwaves are moving in all directions and the food is rotating, the molecules in the food continuously turn to align with the incoming microwaves. This constant turning and twisting of the molecules heats them and the surrounding region, resulting in cooking.

Fats and sugars inside food are dielectric molecules, but water is the most affected by microwaves. The more moisture there is in the food, the quicker it will be heated in the microwave oven. Water molecules in ice are frozen and cannot move easily. This is why it is best to partially thaw or break apart and add a small amount of water to frozen food before cooking it in a microwave oven.

Finally, you may have noticed the holes in the aluminium shielding that line the door. The wavelength of the microwaves used for cooking is approximately 12 centimetres in length. This wavelength means the microwaves cannot 'squeeze' through the holes. But light has a smaller wavelength and fits through the holes. This allows you to watch your food cook.

### **What is wavelength?**

Imagine electromagnetic waves as waves on the ocean. The distance between the top of one wave and the next is called the wavelength.

Text: 'Tech know: Microwave oven' with Darren Osborne, [www.csiro.au/doublehelix](http://www.csiro.au/doublehelix) © CSIRO. Reproduced with permission. Images: © Janison Solutions Pty Limited

**Back**

**ICAS.**

**Next**

Why did Percy Spencer do a test using popcorn kernels?

- ☐ to find out whether it was safe to heat food with a transmitter
- ☐ to determine which transmitter had caused the chocolate bar to melt
- ☐ to observe if popping corn required the same energy as melting chocolate
- ☒ to investigate whether placing food near a transmitter would heat and cook it

Why is the word 'fire' written in quotation marks in the text?

- ☐ It shows that the writer is exaggerating.
- ☒ It is a less technical way to explain what happens.
- ☐ It explains that the microwaves travel at high speed.
- ☐ It emphasises the heat which is created by microwaves.

According to the text, what is the main purpose of the aluminium shielding inside a microwave oven?

- ☐ It retains the heat that comes from cooking the food.
- ☐ It allows light waves out so that the user can see the food cook.
- ☐ It protects the user from being exposed to too many microwaves.
- ☒ It reflects the microwaves that have not yet been absorbed by the food.

In the text, the word 'converted' can be replaced by

- ☒ changed.
- ☐ transferred.
- ☐ adjusted.
- ☐ created.

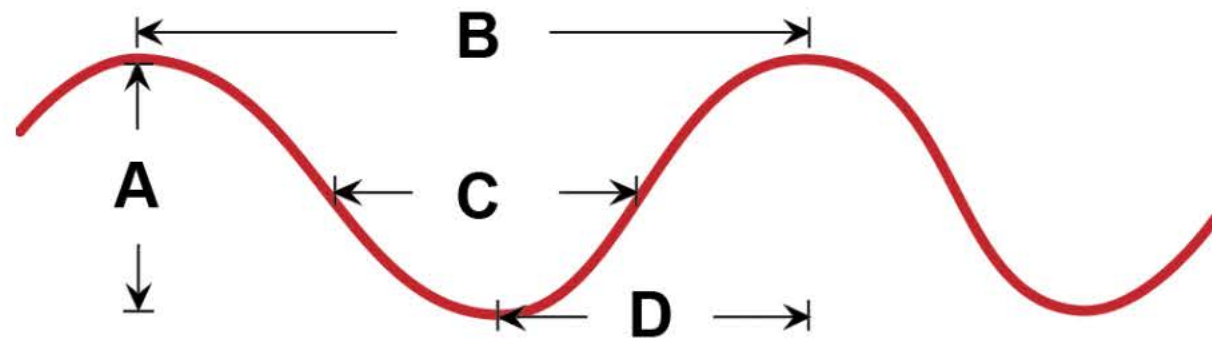

What is the purpose of the rotating dish inside the microwave oven?

- ☐ to create an electric field in the microwave oven
- ☐ to allow the microwaves to reach the centre of food
- ☒ to increase the movement of the molecules inside the food
- ☐ to ensure that both ends of the molecules respond to the microwaves

In the sixth paragraph, how does the writer's style change?

- ☐ The writer gives instructions to readers.
- ☐ The writer recounts readers' experiences.
- ☒ The writer directly addresses readers.
- ☐ The writer provides a warning to readers.

Which option correctly shows what a wavelength is?

- ☐ A
- ☒ B
- ☐ C
- ☐ D

# The Elephant's Child

This text is part of a folktale about animal origins.

'Come hither, Little One,' said the Crocodile, 'for I am the Crocodile,' and he wept crocodile-tears to show it was quite true.

Then the Elephant's Child became breathless, and panted, and knelt down on the riverbank and said, 'You are the very person I have been looking for all these long days. Will you please tell me what you have for dinner?'

'Come hither, Little One,' said the Crocodile, 'and I'll whisper.'

Then the Elephant's Child put his head down close to the Crocodile's musky, tusky mouth, and the Crocodile caught him by his little nose, which up to that very week, day, hour, and minute, had been no bigger than a boot, though much more useful.

'I think,' said the Crocodile—and he said it between his teeth, like this—'I think to-day I will begin with Elephant's Child!'

At this, O Best Beloved, the Elephant's Child was much annoyed, and he said, speaking through his nose, like this, 'Led go! You are hurtig be!'

Then the Bi-Coloured-Python-Rock-Snake scuffled down from the bank and said, 'My young friend, if you do not now, immediately and instantly, pull as hard as ever you can, it is my opinion that your acquaintance in the large-pattern leather ulster' (and by this he meant the Crocodile) 'will jerk you into yonder limpid stream before you can say Jack Robinson.'

This is the way Bi-Coloured-Python-Rock-Snakes always talk.

Then the Elephant's Child sat back on his little haunches, and pulled, and pulled, and pulled, and his nose began to stretch. And the Crocodile floundered into the water, making it all creamy with great sweeps of his tail, and he pulled, and pulled, and pulled.

**Back**

**ICAS.**

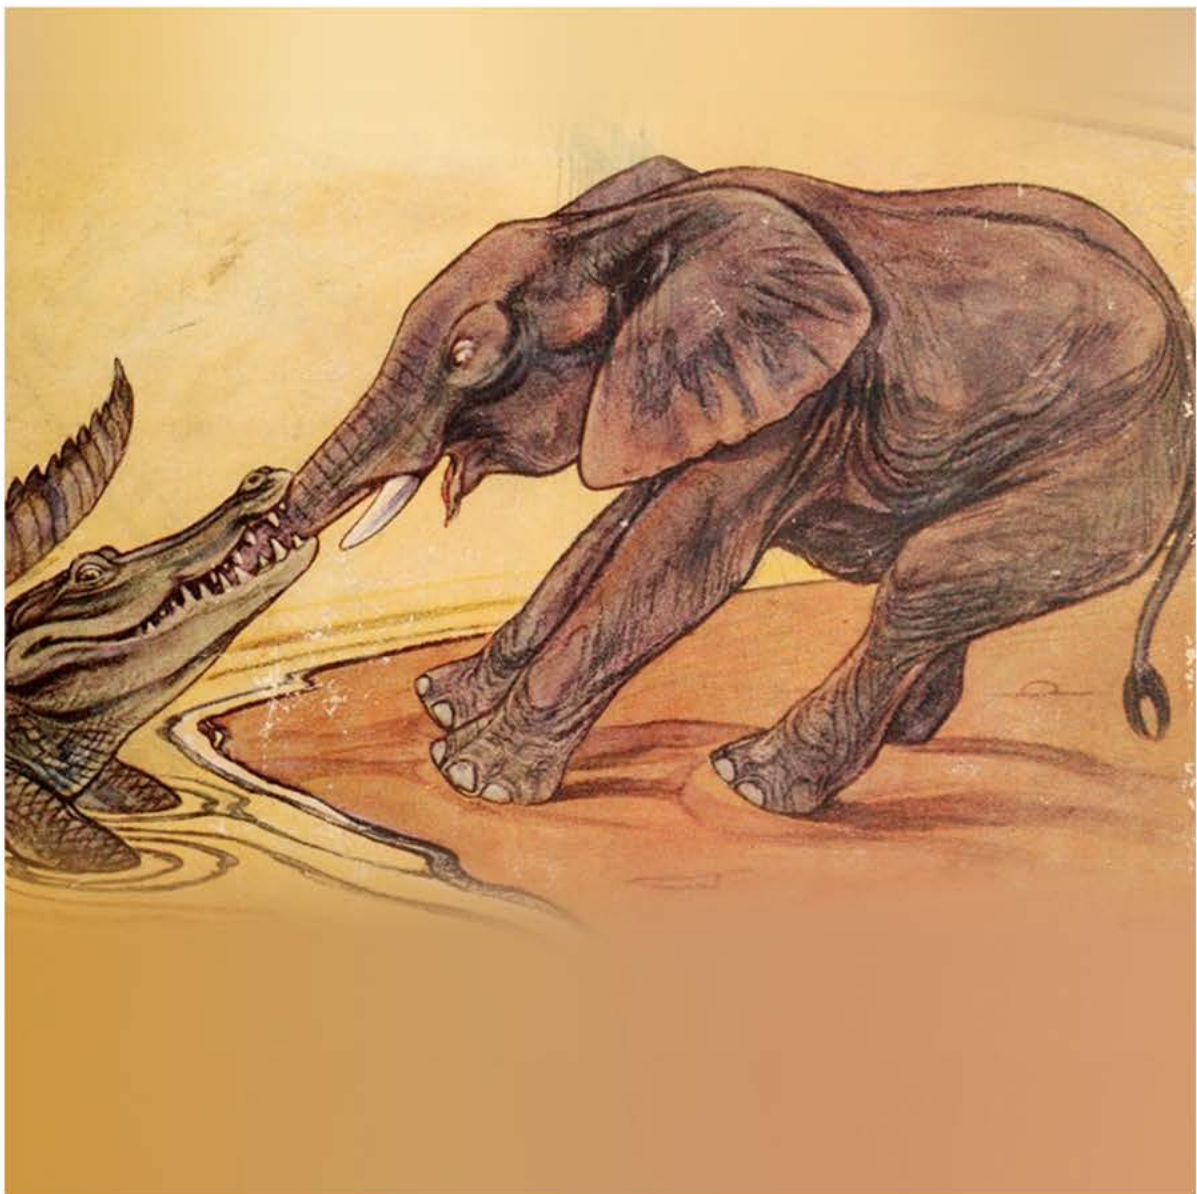

**Next**

And the Elephant's Child's nose kept on stretching; and the Elephant's Child spread all his little four legs and pulled, and pulled, and pulled, and his nose kept on stretching; and the Crocodile threshed his tail like an oar, and he pulled, and pulled, and pulled, and at each pull the Elephant's Child's nose grew longer and longer—and it hurt him hijjus!

Then the Elephant's Child felt his legs slipping, and he said through his nose, which was now nearly five feet long, 'This is too butch for be!'

[Editor's note: Don't worry—the Elephant's Child gets away in the end!]

Text and images: "The Elephant's Child" text and image from 'Just So Stories' by Rudyard Kipling.  
Text first published in 1902. Cover image first published in 1912.

**Next**

'and he wept crocodile-tears' (paragraph 1)  
Which part of speech is the word 'wept'?

- ☐ noun
- ☒ verb
- ☐ adverb
- ☐ adjective

'Come hither, Little One ... and I'll whisper.'  
When the Crocodile says this, he is being

- ☐ cruel.
- ☐ violent.
- ☒ cunning.
- ☐ intimidating.

In this story, the Elephant's Child ends up in a dangerous situation mainly because of his

- ☒ curiosity.
- ☐ generosity.
- ☐ pride.
- ☐ laziness.

'Led go! You are hurtig be!'

Why are the Elephant's Child's words written in this way?

- ☐ because he is very frustrated
- ☐ because he is speaking a different form of English
- ☒ because it is what his speech actually sounds like
- ☐ because he is speaking directly to the Crocodile

'(and by this he meant the Crocodile)'  
The words in brackets are said by

- ☐ the Python-Rock-Snake.
- ☐ the Elephant's Child.
- ☐ the Crocodile.
- ☒ the narrator.

What happens between the Crocodile and the  
Elephant's Child is most like

- ☒ a tug of war.
- ☐ a battle of wits.
- ☐ a game of chess.
- ☐ a race to the top.

What kind of information is contained in the square brackets [ ] at the end of the text?

- ☐ a translation
- ☐ something a character says
- ☒ a comment on the story
- ☐ an alternative ending

What main question does this folktale answer?

- ☐ Where did elephants come from?
- ☐ Why do crocodiles live in the water?
- ☐ What do crocodiles eat?
- ☒ How did the elephant get its trunk?

# *The last stand of trees*

The Kerikeri River rolls  
towards the bay, rapids splashing  
over rocks rhythmically.

5 Immersed in the pristine habitat  
we trek towards the Rainbow Falls  
admiring epiphytes  
entwining the trunks of native trees.  
Ferns, stretching upwards,  
fan sunlight through their fronds.

10 At the proposed new 'heritage' highway  
we look up to a stand of kauri pines  
frowning on man's handiwork.  
The land is already turned and churned.  
Soon the locals will confuse the hum  
15 of traffic with the thunder of the falls.

A pair of ducks circle the stream.  
Trees huddle together on the river's edge,  
awaiting their fatal fall.

*Elli Housden*

'rapids splashing / over rocks rhythmically.'  
(lines 2–3)

Which literary device is used in this quotation?

- ☐ pun
- ☐ simile
- ☐ exaggeration
- ☒ alliteration

The word 'pristine' in line 4 means that the habitat was

- ☐ full of ancient plants.
- ☒ in its original state.
- ☐ vast in distance.
- ☐ appreciated by many.

'fan sunlight through their fronds.' (line 9)

What does the word 'their' refer to?

- ☐ the epiphytes
- ☐ the trunks
- ☐ the trees
- ☒ the ferns

Why does the poet use inverted commas ( ' ' ) around the word 'heritage' in line 10?

- ☐ to emphasise the significance of the word
- ☐ to reveal that the word is a direct quotation
- ☐ to indicate that the word is part of a longer title
- ☒ to show that the word is being used in an ironic way

The description of the kauri pines in the third stanza suggests that they are

- ☒ disturbed by what has happened.
- ☐ confused over what has happened.
- ☐ surprised by what has happened.
- ☐ curious about what has happened.

The use of the words 'last stand' in the title has a double meaning. One meaning refers to the final group of trees.

What is the other meaning?

- ☐ growing tall despite intense competition from other trees
- ☐ marking the final location of the trees near the Falls
- ☒ holding a defensive position when faced with overwhelming odds
- ☐ giving into the realisation that destruction is inevitable

What is the overall tone of the poem?

☐

romantic

☐

angry

☒

sorrowful

☐

mysterious

# Finding treasure

---

Sometimes a human being is labelled ‘a national treasure’, a term of high regard. Sometimes they may even be termed ‘an international treasure’. David Attenborough is one such man. In 2016, the British naturalist and environmental conservationist turned 90—but that’s not what earned him this prestigious title.

Perhaps Attenborough is best known as a television broadcaster: writing and presenting numerous series about the wonders of the natural world such as *Life on Earth* and *The Living Planet*. Through his documentaries, millions of people around the globe have been introduced to the incredible diversity of plants and animals that inhabit Earth.

Not only have his productions delighted audiences with visually spectacular and often thrilling footage, but in the process, Attenborough and his team have developed many innovative film-making techniques through patience, ingenuity and the use of cutting-edge technology.

**Back**

**ICAS.**

**Next**

Sometimes it takes months to capture a single image, but in the end, we are presented with rare creatures found in extreme or remote settings, or intriguing animal behaviour never before recorded. A ground-breaking approach takes viewers even deeper into the secret lives of animals with the use of specially developed 'on-board' cameras now able to film from an animal's perspective in places humans cannot travel. Such dedication has raised the benchmark in documentary film-making and his productions have received countless awards.

Collecting fossils, stones and other natural specimens as a child, Attenborough developed a passion that set the course of his life's journey. Today, at least 14 species of plants and animals bear his name, including an echidna, a lizard, a spider and a carnivorous pitcher plant. He has also received the rare honour of having an entire genus named after him, a genus with just one member—a colourful species of slug, 35-45 mm in length, found only in a small patch of south-east Tasmania. To have a slimy mollusc named after you would not be everyone's idea of a tribute, but Attenborough said it was a tremendous compliment.

He speaks widely about the importance of conservation: 'I seriously think that wildlife programming and film-making is of crucial importance to the future of the world ... If the natural world is in peril, we are in peril. People should be aware of the way the natural world works to understand when they're damaging it.'

According to the Macquarie Dictionary, a national treasure is defined as '*a person, place, or thing deemed to be of such significance to the nation as to warrant protection and preservation*'. David Attenborough reminds us that the real treasures are not just for the nation, but the whole world, and they are, most importantly, 'natural' treasures.

**Next**

'but that's not what earned him this prestigious title' (paragraph 1)

The effect of these words is

- ☒ to draw readers in by providing only some of the information.
- ☐ to impress readers with the significance of the title.
- ☐ to hint at criticisms about Attenborough's achievements.
- ☐ to start a discussion about why titles are awarded.

According to the third paragraph, what **two** characteristics have helped Attenborough to create his 'visually spectacular and often thrilling footage'?

- ☐ wealth
- ☒ a willingness to try new things
- ☒ patience
- ☐ fearlessness
- ☐ a sense of humour

Why do so many species of plants and animals bear Attenborough's name?

- ☐ These are the species that he has discovered.
- ☐ He is the only film-maker to have featured them in his productions.
- ☒ That is a way of honouring his contribution to environmental conservation.
- ☐ Their names enable them to receive protection.

In the fourth paragraph, the word 'rare' means that the honour is something which

- ☐ has a global impact.
- ☐ very few people know about.
- ☒ happens infrequently.
- ☐ is extremely special.

'I seriously think that wildlife programming and film-making is of crucial importance to the future of the world'. (paragraph 5)

Attenborough's motivation for saying this is the survival of

- ☒ humans.
- ☐ conservation.
- ☐ endangered species.
- ☐ wildlife documentaries.

'People should be aware of the way the natural world works to understand when they're damaging it.' (paragraph 5)

What are the correct words to replace 'to'?

- ☐ as they have to
- ☒ in order to
- ☐ when they need to
- ☐ therefore to

What point is the writer making in the last paragraph?

- ☒ that natural treasures are vital not just for individual nations but for the whole world
- ☐ that Attenborough is the global authority on what constitutes a national treasure
- ☐ that Attenborough is a real treasure because of his work in saving the natural world
- ☐ that attention should be focused on natural treasures rather than on a single person
