PAPER

C

INTERNATIONAL COMPETITIONS AND ASSESSMENTS FOR SCHOOLS ENGLISH 2006

50 QUESTIONS

TIME ALLOWED: 50 MINUTES

STUDENT'S NAME: <http://anzexams.com>

DO NOT OPEN THIS BOOKLET UNTIL INSTRUCTED.

Read the instructions on the **ANSWER SHEET** and fill in your **NAME, SCHOOL** and **OTHER INFORMATION**.

Use a 2B or B pencil.

Do **NOT** use a pen.

Rub out any mistakes completely.

You are **NOT** allowed to use a dictionary.

You **MUST** record your answers on the **ANSWER SHEET**.

Read each text carefully. Use the information provided to choose the **BEST** answer from the four possible options.

On your **ANSWER SHEET** fill in the oval that matches your answer. Mark only **ONE** answer for each question.

Questions may sometimes be placed next to each other. Make sure you read **ACROSS** the page and answer the questions in the correct order.

Your score will be the number of correct answers. Marks are **NOT** deducted for incorrect answers.

**PLEASE SEE BACK COVER FOR A LIST
OF THE YEAR LEVELS THAT SHOULD
SIT THIS PAPER**

Read *The Biggest Kite in the World* and answer questions 1 to 6.

The BIGGEST Kite in the World

Peter Lynn has built Megabite, the biggest kite in the world. He talks about it to John Bonallack – and attempts a launch.

Peter, can you tell me about Megabite?

Sure. But first, go inside, if you like.

That was amazing!

Is it really the biggest kite in the world?

Yes, it really is. Five hundred and fifty-five square metres of lifting area. The next biggest is 553 square metres. I'll just get these bridles untangled ... And we'll check that there are no children hiding inside Megabite.

How did you come to be making kites?

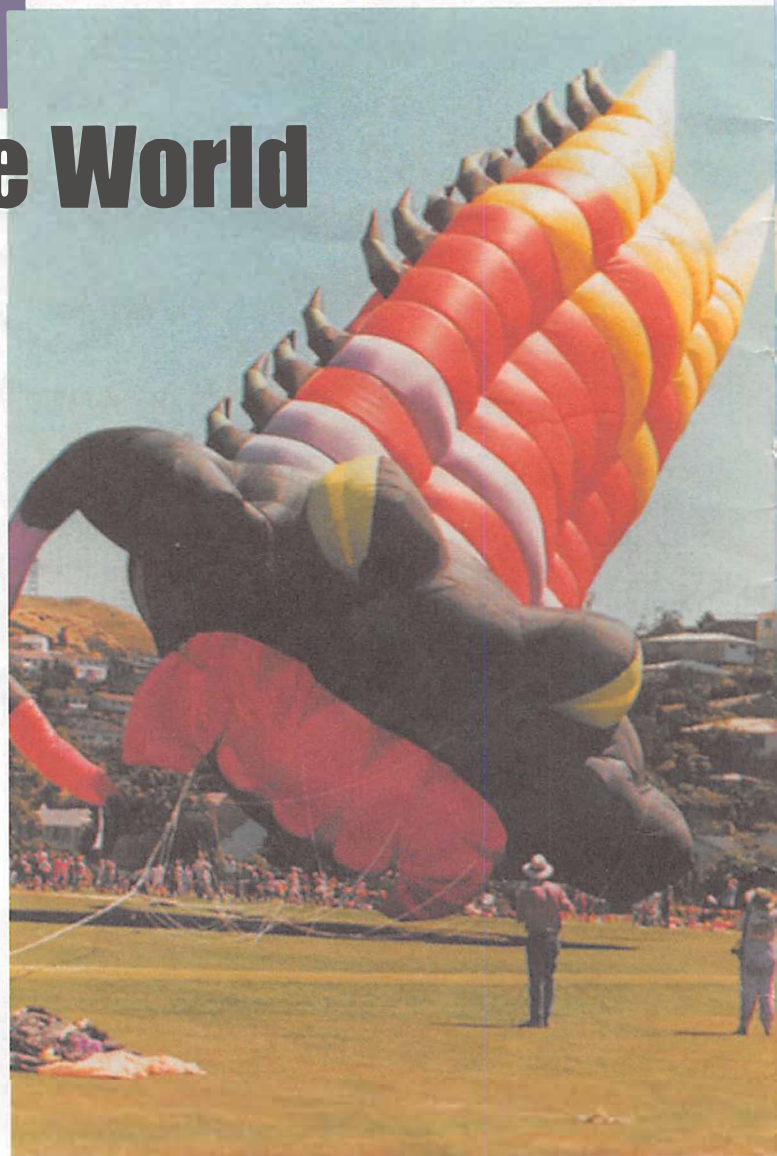

I got interested in kites when I was at primary school. At university, I studied engineering. I passed my exams but for ten years I did almost nothing but make and fly kites! I couldn't stop. I was always crazy about kites! And after a while, people started asking me to design and build kites for them, so it became my job. We make over ten thousand kites a year and we fly them all around the world. We'll be in Hawaii next week.

How do you launch the kite?

First, we let some air blow into it so that it inflates, like a balloon. Then Philip takes the tail and runs forwards with it. It's what we call 'running the tail'. This pushes a great bubble of air to the head and floats it. The 'mouth' opens, and if there is enough wind to fill the kite, up it goes ... and sometimes, down! We'll wait for a bit more wind.

Is it dangerous?

Kite flying is a dangerous job. If we could choose our times and places it would be safe. But we can't control the weather, can we? And if we've gone overseas, and thousands of people have come to see the kites, we have to do our best.

We've got a truck to anchor it to today, and it's fairly calm. But in a strong wind, that truck wouldn't hold Megabite. So we have to be very careful about safety.

What gave you the idea for Megabite's shape?

The idea came from a prehistoric animal called a trilobite. The trilobite wasn't big like this, but it was this shape ... That's better. Now we have some good wind. Up it goes!

Could you fly on a kite like Megabite?

I have done, and some people do. But I don't do it now. I'm against it. I fly kites every week. If I went up on them, sooner or later we'd crash and I'd get killed. It's enough fun designing them, building them, flying them – and watching the pleasure people get out of seeing them.

1. John Bonallack says 'That was amazing!' after
 - (A) going inside the kite.
 - (B) seeing the kite launched.
 - (C) hearing about the size of the kite.
 - (D) finding children hiding in the kite.

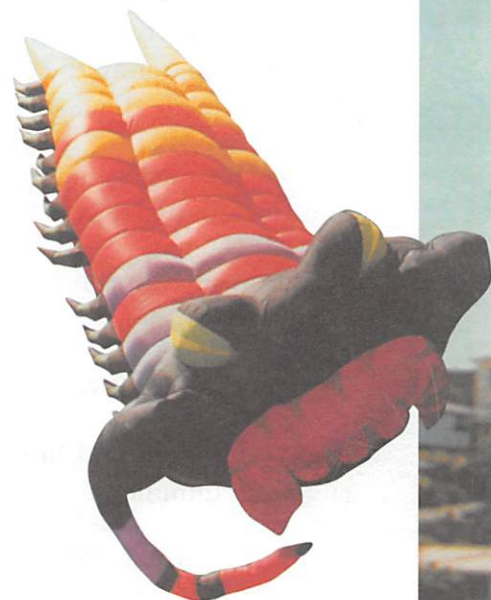

2. The text suggests that Peter Lynn began making kites as a career because he
 - (A) wasn't making much money.
 - (B) loved designing and flying kites.
 - (C) studied engineering at university.
 - (D) wanted to be a famous kite maker.

3. What is the sequence of events required to launch Megabite?
 - 1 The mouth opens.
 - 2 Someone runs the tail.
 - 3 Air is blown into the kite to inflate it.
 - 4 A great bubble of air is pushed to the head.
 - (A) 3, 2, 1, 4
 - (B) 3, 2, 4, 1
 - (C) 1, 3, 2, 4
 - (D) 1, 2, 4, 3

4. Peter Lynn says 'Kite flying is a dangerous job' because
 - (A) kite flyers need to travel overseas.
 - (B) the weather cannot be controlled.
 - (C) a truck is needed to anchor the kites.
 - (D) thousands of people gather to watch the kites.

5. In the statement 'I'd get killed', the contraction 'I'd' is made up of the words
 - (A) I did.
 - (B) I had.
 - (C) I would.
 - (D) I should.

6. Which of the following sentences tells us that Peter Lynn is being interviewed during a kite launch?
 - (A) 'I fly kites every week.'
 - (B) 'We'll be in Hawaii next week.'
 - (C) 'We'll wait for a bit more wind.'
 - (D) 'I was always crazy about kites.'

Read *Calum* and answer questions 7 to 12.

Calum

Calum spent every spare minute at the harbour with the fishermen. He was there in the mornings as they unloaded their catch, cascades of fish glittering silver among the crushed ice. He knew every lane around the port; the old cottages, painted white, pale blue, cream and green, with their red roofs. The lobster pots and orange nets stretched in front. When he was small he would watch for the *Rose of Sharon* making harbour. Then he would run to meet his Uncle Fintry who would grab him and swing him high among the masts and crying gulls and, placing Calum on his shoulder, would stride home up Shore Road.

And now he was here! Actually on board the *Rose of Sharon* and working as hard as he could to prove, as much to himself as any of the rest, that he could do it. They winched out the nets and he struggled to keep his balance on the wet deck as he ran back and forth at the crew's bidding. This was no sailboat trip, no inshore fishing excursion set up for the summer tourists. The ache in his arms from operating the gear told him this. The sea spray stung his face and salt on his eyelids and his mouth made them sore and raw.

He took his uncle some food and a mug of tea. The radio was tuned to the weather reports. At home Calum had always listened to them before falling asleep.

'Attention all shipping. Attention all shipping. The Met Office has issued the following gale warning.'

Fintry put down his half-eaten sandwich, leaned over and turned up the sound.

'...three hundred and fifty miles west. Veering west, north-west, wintry showers, storm ten, severe gale nine. Imminent.'

His uncle frowned. 'What d'ye say? Ride it out, or run for home?'

7. As a small boy, whenever Uncle Fintry's boat came into the harbour, Calum felt
- (A) excited.
 - (B) surprised.
 - (C) concerned.
 - (D) disappointed.
8. Calum was prepared to put up with physical pain on the boat. This shows his
- (A) attention to detail.
 - (B) experience as a fisherman.
 - (C) response to an emergency.
 - (D) determination to be accepted.
9. What has changed in the time between the events described in paragraphs one and two?
- (A) the dangers faced at sea
 - (B) the size of the *Rose of Sharon*
 - (C) the work done by the fishermen on the boat
 - (D) the role Calum plays in the fishing community
10. Who broadcast the storm warning?
- (A) Calum
 - (B) the crew
 - (C) Uncle Fintry
 - (D) the radio station
11. The last line indicates that Uncle Fintry was
- (A) impatient with the crew.
 - (B) seeking Calum's opinion.
 - (C) hoping the situation would improve.
 - (D) frustrated because no-one was listening.
12. How many verb groups does this sentence have?
- 'Fintry put down his half-eaten sandwich, leaned over and turned up the sound.'
- (A) 2
 - (B) 3
 - (C) 4
 - (D) 6

Caught red-handed

A priceless piece of art has been stolen from a museum and detectives are called in to investigate the crime. The thieves were very clever – they avoided security cameras, guards and laser beams and their getaway car was never found. However, they left behind one important clue: a single perfect fingerprint. For a top detective, this is more than enough information to solve the crime.

Our fingerprints are very special. You might have the same eye colour as someone else, the same shaped nose and, if you're an identical twin, you might even have a face that looks the same, but not a single person on earth has the same fingerprints as you.

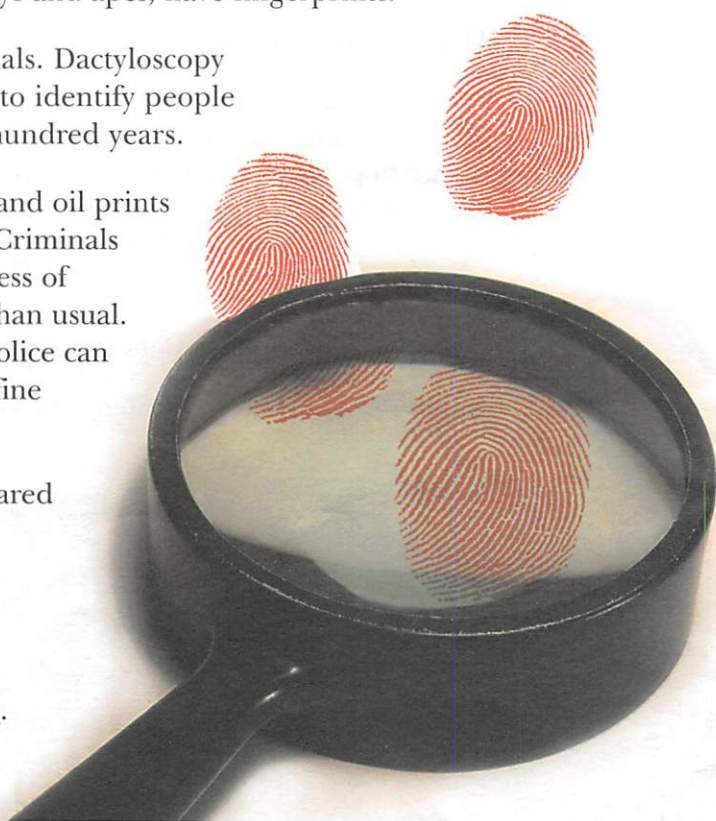

Fingerprints are the patterns on the pads of your fingers made by tiny ridges in the outer layer of your skin, called the epidermis (ep-ee-DER-miss). These ridges help you get a better grip on smooth things. This is particularly important if you're climbing trees and swinging between branches. All primates, including monkeys and apes, have fingerprints.

Most importantly, fingerprints help catch criminals. Dactyloscopy (DACK-till-oss-kop-ae) is the use of fingerprints to identify people and it has been used by police for more than a hundred years.

Every time you touch something you leave sweat and oil prints which are the same pattern as your fingerprints. Criminals often leave very clear fingerprints because the stress of carrying out a crime causes them to sweat more than usual. While these fingerprints are normally invisible, police can make them visible either by dusting them with a fine powder or spraying them with fine chemicals.

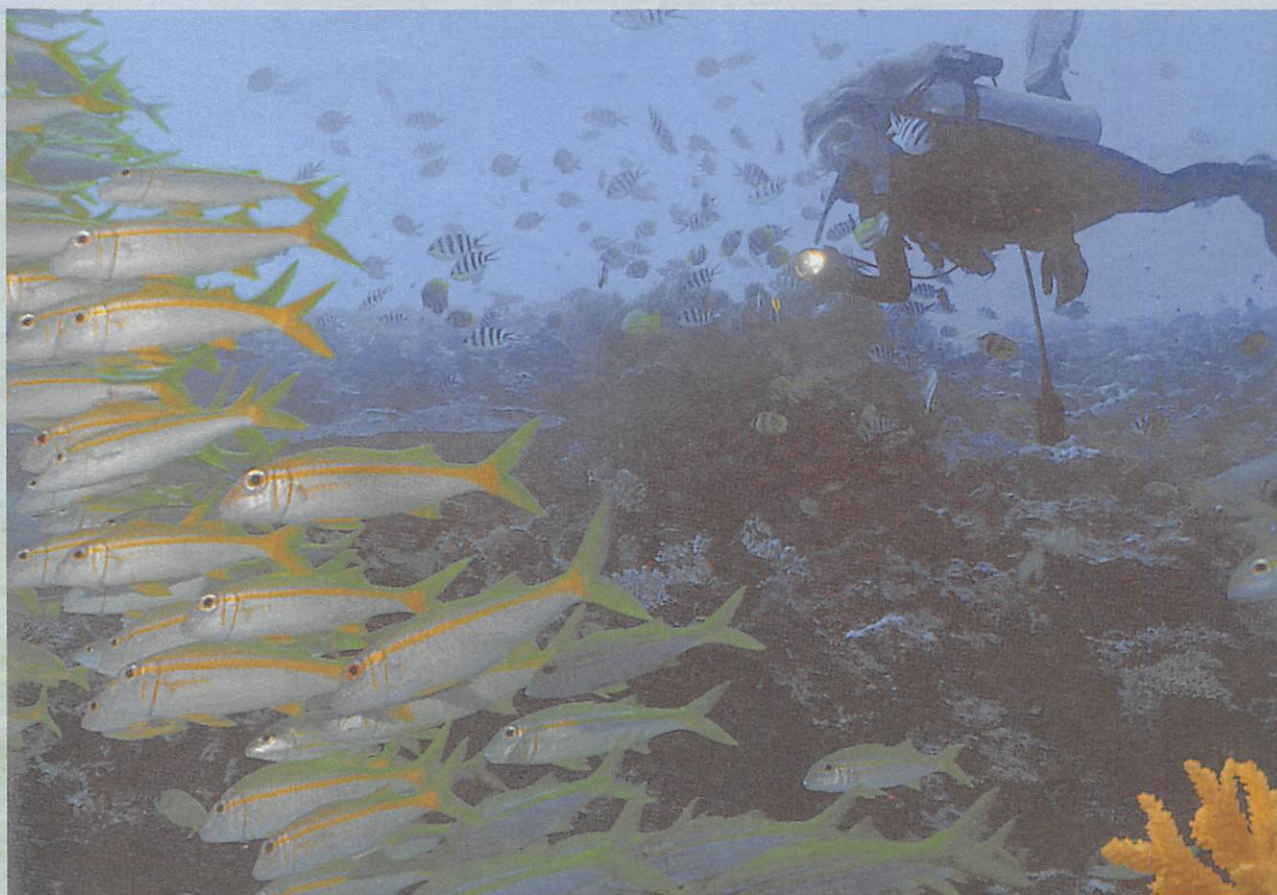

Once a fingerprint is developed, it can be compared with images on police files. When comparing fingerprints, police look for particular patterns called arches, loops and whorls.

Many famous crimes have been solved using fingerprints. Unlike people, fingerprints don't lie.

13. Why does the text begin by describing the theft of a piece of art?
- (A) to give an example of a famous crime
 - (B) to emphasise how clever the thieves were
 - (C) to praise the skills of the investigating detective
 - (D) to provide a context for the information which follows
14. A 'priceless piece of art' is one which
- (A) cannot be sold at auction.
 - (B) is too fragile to be displayed.
 - (C) is more beautiful than any other.
 - (D) has a value which cannot be calculated.
15. Part of 'ep-ee-DER-miss' has been written in upper case to show
- (A) it is an abbreviation.
 - (B) an alternative spelling.
 - (C) which part of the word is stressed.
 - (D) the division of the word into syllables.
16. Which of the following are **NOT** used by police to identify a fingerprint pattern?
- (A) loops
 - (B) ridges
 - (C) arches
 - (D) whorls
17. Sequence these events in the order in which they would occur.
1. The fingerprints are dusted.
 2. The fingerprints are located at the scene.
 3. The fingerprints are used to convict the criminals.
 4. The fingerprints are checked against police records.
- (A) 2, 1, 4, 3 (B) 1, 2, 4, 3 (C) 1, 4, 3, 2 (D) 2, 1, 3, 4
18. The writer says 'fingerprints don't lie' in order to emphasise that fingerprints
- (A) provide reliable evidence.
 - (B) have irregular patterns.
 - (C) are always available.
 - (D) can be developed.
19. According to the text, which statement is **INCORRECT**?
- (A) All monkeys have fingerprints.
 - (B) Fingerprints are sometimes invisible.
 - (C) Identical twins have the same fingerprints.
 - (D) Police sometimes spray fingerprints with chemicals.

Samantha's Sea

The first time I saw the sea, I knew I had to sink below its surface and explore its hidden secrets. Never in my wildest dreams had I imagined what bizarre and exotic creatures lived within it. Some of them seemed to me as alien as life on a faraway planet. I guess that's why some people call it 'inner space'.

If I had been born with gills and a tail, moving and breathing in this watery world would have been easy. Instead, I had a lot to learn before I could begin to explore.

First, I had to wait until I was twelve years old, which is the minimum age to get a junior scuba-diving qualification. Then, I had to convince my parents that it was something I really wanted to do. That took another year. Finally I was able to sign up for a scuba-diving course.

'SCUBA' stands for self-contained underwater breathing apparatus, and learning how to use it took six weeks of intensive training. My instructor showed me how to assemble my equipment, how to use it, and why each piece is necessary. He helped me to understand why staying under the water too long and going too deep can be dangerous. I learned about buoyancy and boat handling, floats and flags, entries and exits, rescues and resuscitation. After many hours of studying and plenty of practice in the pool, I finally received my 'licence to dive'.

When I sank below the surface of the sea for the first time, the golden rule of scuba-diving pounded through my mind. 'Breathe normally; never hold your breath.' I was so busy thinking about what to do, I hardly noticed the life around me.

20. The first time Samantha saw the sea she knew she
- (A) had to explore its mysteries.
 - (B) wanted to swim like a fish.
 - (C) needed to overcome her fear.
 - (D) would always dream about it.
21. The word closest in meaning to 'exotic', as it is used in the text, is
- (A) frightening.
 - (B) secretive.
 - (C) fragile.
 - (D) unusual.
22. The word 'SCUBA' is written in capital letters because it is
- (A) something Samantha said.
 - (B) a word taken from another language.
 - (C) made up of the first letters of other words.
 - (D) a brand name.
23. Samantha thought some people may compare under the sea to 'inner space' because
- (A) it is a dangerous and unknown environment.
 - (B) many of the creatures living there appear strange.
 - (C) only specially trained people can go there.
 - (D) the deeper people dive the darker it becomes.
24. Before Samantha received her 'licence to dive' she had to
- (A) practise her diving techniques in the pool.
 - (B) dive with her parents for a year.
 - (C) find a partner to dive with.
 - (D) wait until she was fourteen years old.
25. Why did Samantha not notice the marine life around her on her first dive?
- (A) She needed to follow her instructor very closely.
 - (B) She was worried that her equipment would not work.
 - (C) She was too busy remembering everything she had been taught.
 - (D) She had already seen all the underwater creatures during her lessons.

For questions 26 to 29 choose the correct option to complete the passage.

Asleep in the mud

There are three main types of lungfish in the world. They live in the fresh waters _____ (26) _____ Amazonian South America, central and southern Africa and north-eastern Australia. If its waters dry up, the African lungfish wriggles into the mud and produces a slimy bag around itself. This hardens into a cocoon case _____ (27) _____ the fish can survive in this condition for two or three years.

The lungfish 'gulps' air into its lungs. The lung cavities have _____ (28) _____ blood vessels in their _____ (29) _____ absorb oxygen from the air.

African lungfish asleep in the mud

26. (A) of
(B) at
(C) from
(D) on

27. (A) until
(B) since
(C) while
(D) and

28. (A) much
(B) these
(C) many
(D) those

29. (A) linings these
(B) linings, these
(C) linings! These
(D) linings. These

For questions 30 to 33 choose the word CLOSEST IN MEANING to the underlined word.

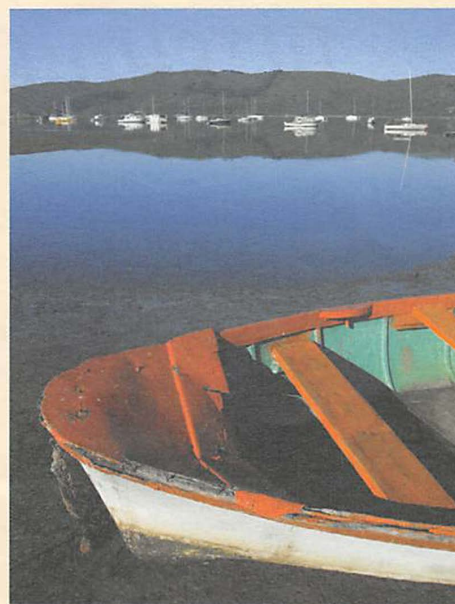

The Race

Last Sunday, members of our local community (30) congregated on the riverbank to witness the annual speed boat race.

We sheltered from the (31) searing heat under the (32) majestic oak trees, waiting anxiously for the first boat to come into view.

Finally the bow of a boat rounded the bend.

A cheer went up, followed by shrieks of laughter as we realised it was only old Fred the fisherman, out in his (33) battered rowboat.

30. (A) relaxed
(B) watched
(C) gathered
(D) positioned

- 31 (A) humid
(B) soaring
(C) scorching
(D) uncomfortable

32. (A) shady
(B) ancient
(C) massive
(D) magnificent

33. (A) trusty
(B) shabby
(C) familiar
(D) colourful

For questions 34 and 35 choose the option which is PUNCTUATED CORRECTLY.

34. (A) 'Are Kim's suitcase's packed and ready to go, asked Jack.'
(B) 'Are Kim's suitcases packed and ready to go?' asked Jack.
(C) 'Are Kims suitcases packed and ready to go asked Jack?'
(D) 'Are Kims' suitcases packed, and ready to go?' asked Jack.
35. (A) 'What a day,' exclaimed our teacher! 'The wind's so strong that my umbrella has blown away.'
(B) 'What a day!' exclaimed our teacher. 'The winds' so strong that my umbrella has blown away.'
(C) 'What a day!' exclaimed our teacher. 'The wind's so strong that my umbrella has blown away.'
(D) 'What a day!' exclaimed our teacher. 'The winds so strong that my umbrella has blown away!'

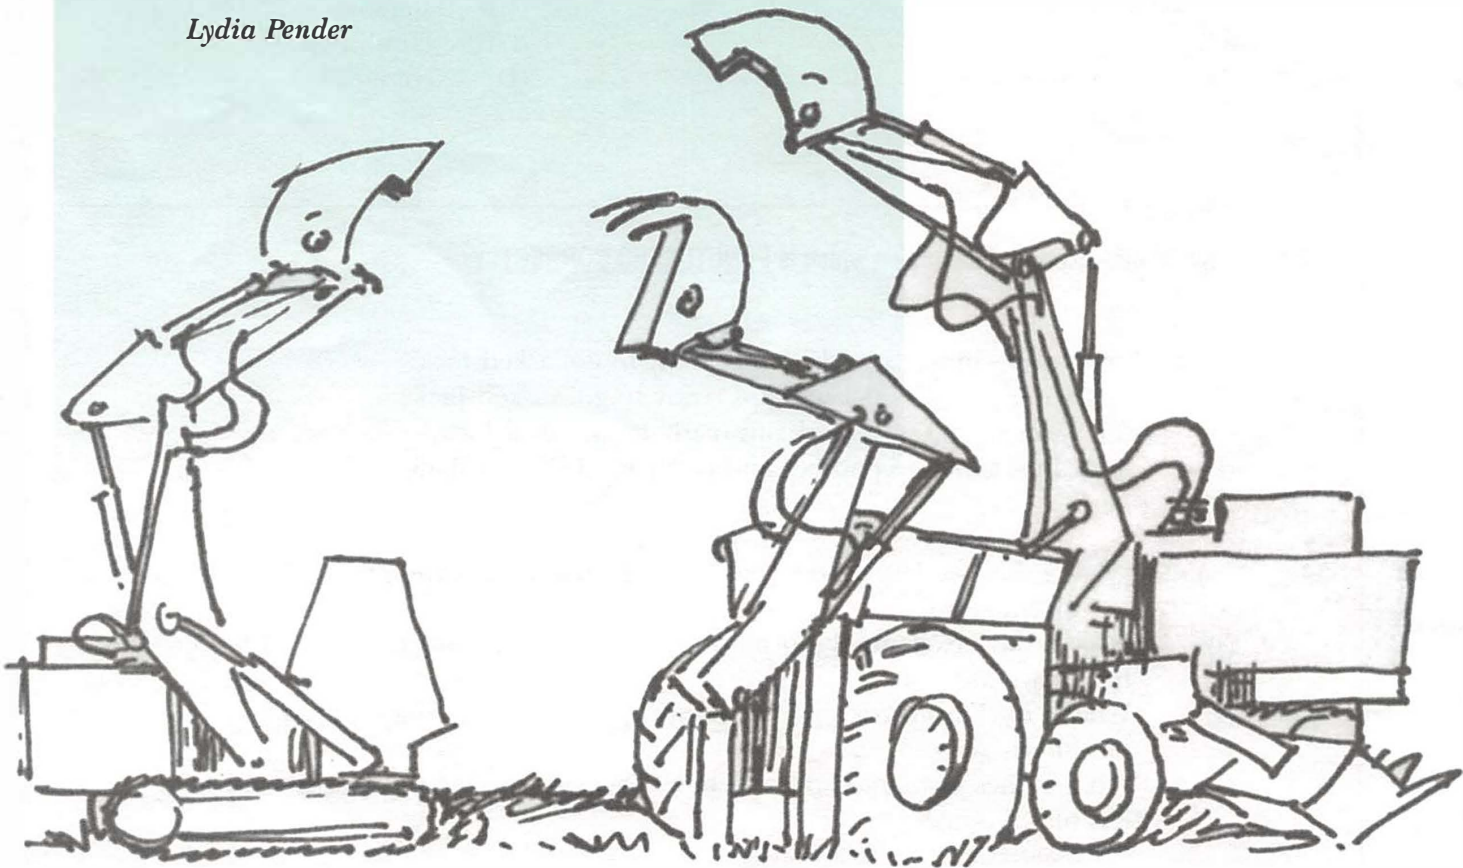

DITCHDIGGERS

Like lean giraffes about the building site,
With questing noses tilted to the sky,
They stand, a still and silent little herd,
And let the world go by ...

Until the whistle blows. And then they turn
With lowered heads, travel and work and wheel,
Grabbing great gobbets of the yellow clay
To toss it into trucks, tireless as steel ...

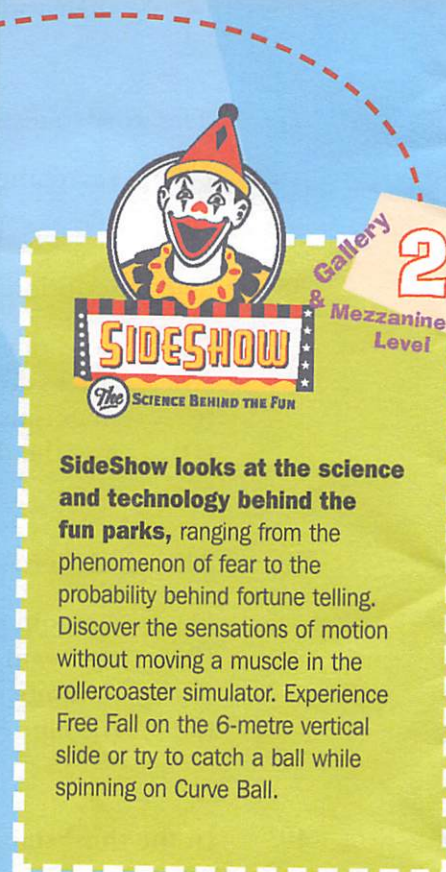

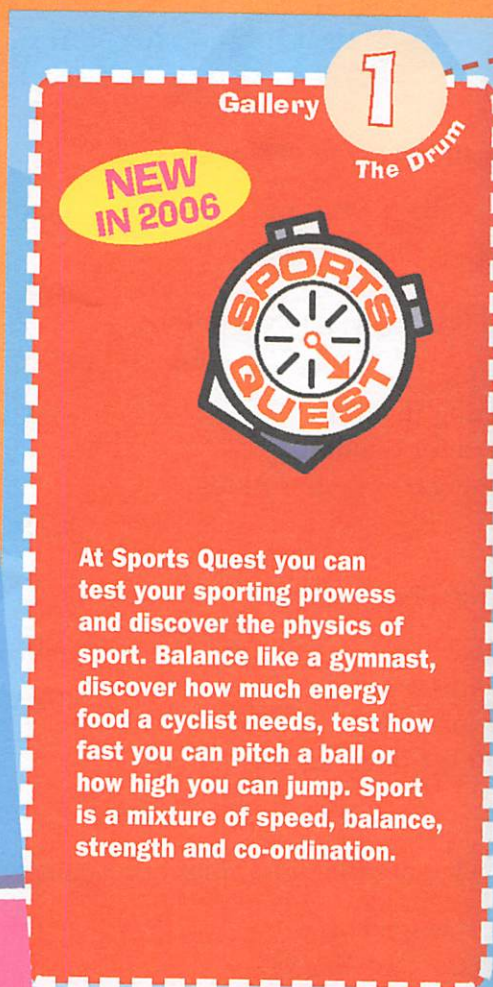

Until the whistle blows again. And then,
With noses tilted up against the sky,
They stand, a still and silent little herd,
And let the world go by.

Lydia Pender

36. Which feature of ditchdiggers and giraffes does the poet compare?
 (A) their width (B) their height (C) their length (D) their weight
37. The word 'questing' in the poem means
 (A) searching. (B) waiting. (C) crooked. (D) damaged.
38. The description 'tireless as steel' refers to the
 (A) herd of giraffes.
 (B) trucks collecting the soil.
 (C) materials used for building.
 (D) way the ditchdiggers keep working.
39. The word 'herd' in the poem refers to
 (A) a clump of clay.
 (B) the team of workers.
 (C) a number of machines.
 (D) the clutter on the building site.
40. In the third stanza, what are the 'noses tilted up against the sky'?
 (A) the long, narrow steel arms
 (B) the wheels of the ditchdiggers
 (C) the metal scoops used for digging
 (D) the rods that connect the steel arms
41. When writers use alliteration they repeat initial consonant sounds to create an effect.
 In which of the following lines has the poet used alliteration?
 (A) 'travel and work'
 (B) 'and let the world'
 (C) 'the whistle blows'
 (D) 'grabbing great gobbets'
42. Repetition of lines in the poem is used to emphasise the
 (A) constant turning of the wheels.
 (B) work performed by the truck drivers.
 (C) length of time it is taking to finish the building.
 (D) routine nature of the work done by the machines.
43. The writer gives the impression that she thinks 'Ditchdiggers' are
 (A) fascinating machines.
 (B) greedy and inefficient.
 (C) harmful to the environment.
 (D) frightening because of their size.

44. The illustration on the front cover represents
- (A) science as an enjoyable experience.
 - (B) the animations used in exhibitions.
 - (C) the variety of shows at Questacon.
 - (D) some facilities available at Questacon.
45. Which of the following two words from the text are similar in meaning?
- (A) 'build' and 'perform'
 - (B) 'eruptions' and 'collisions'
 - (C) 'spectacular' and 'awesome'
 - (D) 'sensations' and 'phenomena'
-
46. Which Questacon exhibition is intended for five year olds?
- (A) Mini Q
 - (B) SideShow
 - (C) Strike a Chord
 - (D) Excited Particles
47. What is featured in the 'Awesome Earth' exhibition?
- (A) crashing atoms
 - (B) natural disasters
 - (C) unusual butterflies
 - (D) simulated rocket flights

Gallery

3

Questacon's exciting exhibition inspires children aged 0-6 years to see, hear, feel and do amazing things. Mini Q encourages babies and kids to explore, splash, perform, build, climb and role play in areas designed especially for little people.

Open 9 am to 5 pm every day except Christmas Day

Q-By-Night: Groups can visit the Questacon galleries at night for a two hour period from 5 pm to 7 pm or 7 pm to 9 pm.

Q Sleepover: School groups can sleep over in the Questacon galleries and enjoy fully supervised science activities.

Information: 1800 020 603
Bookings: (02) 6270 2893
Facsimile: (02) 6270 2808
www.questacon.edu.au

King Edward Terrace Canberra ACT 2600 Australia

The Excited Particles Present

Spectacular science SHOWS

STOP LAUGHING, THIS IS SERIOUSLY EDUCATIONAL

These explosive science shows cover themes from predators, sub-zero temperatures, earthquakes and natural disasters, rockets, crashes and collisions of atoms, balloons and the science behind the sideshow. Don't miss the music-themed show full of crazy sounds, based on Questacon's blockbuster exhibition *Strike a Chord*.

OPENING IN AUGUST

Science On The Move – Amaze your ears with sound experiments.

Get an eyeful of lenses, reflections and colours. Test your brain with spatial puzzles. Compare your reaction times and fitness with friends or fiddle with forces.

Gallery 6

AWESOME EARTH

The Power and Beauty

Experience earthquakes in a realistic house. View volcanic eruptions, crashing continental plates, tornadoes, lightning strikes and other awesome natural phenomena. In this amazing gallery you will discover the impact of these phenomena on our planet.

Gallery 5

48. Which attraction will be opened in the near future?

- (A) Free Fall
- (B) Q-By-Night
- (C) Sports Quest
- (D) Science On The Move

49. The main purpose of this brochure is to

- (A) discuss environmental issues.
- (B) promote Questacon's exhibits.
- (C) provide scientific information.
- (D) describe Questacon's location.

50. Why has this image been included in the brochure?

- (A) to show the time that Questacon opens
- (B) to explain how a special effect is achieved
- (C) to provide a visual link to the exhibition information
- (D) to warn parents that some of the activities may be dangerous
