DO NOT OPEN THIS BOOKLET UNTIL INSTRUCTED.

50 QUESTIONS

TIME ALLOWED: 50 MINUTES

STUDENT'S NAME:

Read the instructions on the **ANSWER SHEET** and fill in your **NAME, SCHOOL** and **OTHER INFORMATION**.

Use a 2B or B pencil.

Do **NOT** use a pen.

Rub out any mistakes completely.

You **MUST** record your answers on the **ANSWER SHEET**.

Mark only **ONE** answer for each question.

Your score will be the number of correct answers.

Marks are **NOT** deducted for incorrect answers.

There are **50 MULTIPLE-CHOICE QUESTIONS** (1–50).

Use the information provided to choose the **BEST** answer from the four possible options.

On your **ANSWER SHEET** fill in the oval that matches your answer.

Questions may sometimes be placed next to each other.

Make sure you read **ACROSS** the page and answer the questions in the correct order.

You are **NOT** allowed to use a dictionary or an electronic translator.

Reindeer people of Mongolia

'Reindeer boy' is what some people playfully call Munkh-Erdene, a happy 10-year-old from a family of reindeer herders. Munkh-Erdene lives in a region in north-western Mongolia only accessible by horseback or helicopter. In the morning, Munkh-Erdene awakes to the sound of water trickling over smooth river pebbles. He crawls out the door of his tepee which is made from branches and walks to the stream. Cupping his hands, he bends over and splashes the clear running water over his face. The place feels like a peaceful paradise, reflected in Munkh-Erdene's name which means 'eternal treasure'.

Munkh-Erdene's diet consists mainly of hunted meat, rice and flour. In the winter when the snow has frozen everything, his mother, Byambasurn, collects water by melting blocks of ice she has chopped from the frozen river.

Their herd of reindeer grazes on wild mushrooms, leaves from red and yellow shrubs and leaves from willow trees. The reindeer provide milk and cheese and carry the herders into the forest to hunt. But the reindeer population is shrinking and the wildlife in the forests is disappearing. A family needs at least 100 reindeer to sustain their livelihood. At the moment, families only have an average of 14 reindeer. Many of the reindeer people, also known as the Tsaatan people, have given up hope and abandoned their lifestyle, which dates back to China's Tang dynasty.

Munkh-Erdene doesn't think about his family's hardships. He is helpful around the tepee, cleaning, chopping firewood and milking the reindeer. When the snow has melted, he likes to ride a reindeer while it is trotting. He enjoys chasing the reindeer and trying to catch them.

1. What is the meaning of Munkh-Erdene's name?
 - (A) Mongolia
 - (B) reindeer boy
 - (C) eternal treasure
 - (D) peaceful paradise
2. In the first paragraph, the word 'river' is used as
 - (A) a conjunction.
 - (B) an adjective.
 - (C) a preposition.
 - (D) an adverb.
3. The Tsaatan homeland in north-western Mongolia can best be described as
 - (A) a frozen wasteland.
 - (B) a wildlife sanctuary.
 - (C) an isolated wilderness.
 - (D) a polluted environment.
4. What is **NOT** mentioned in the text as being part of Munkh-Erdene's diet?
 - (A) meat
 - (B) vegetables
 - (C) rice and flour
 - (D) dairy products
5. The words 'at least' mean
 - (A) no more than.
 - (B) a minimum of.
 - (C) an average of.
 - (D) approximately.
6. According to the text, why are people abandoning the area?
 - (A) The rivers they rely on for water have frozen over.
 - (B) They want to shift their herd of reindeer to a new location.
 - (C) Their homeland is only accessible by helicopter and horseback.
 - (D) Their survival is threatened by the decreasing animal population.
7. Which phrase best describes Munkh-Erdene's attitude?
 - (A) anxious about the reindeer
 - (B) curious about his ancestors
 - (C) unconcerned about the future
 - (D) discouraged by his surroundings

Read the text and answer the questions that follow.

Little master to his big dog

Oh, how greedy you look as you stare at my plate,
Your mouth waters so, and your big tail is drumming
Flop! flop! flop! on the carpet, and yet if you'll wait,
When we have quite finished, your dinner is coming.

- 5 Yes! I know what you mean, though you don't speak a word;
You say that you wish that I kindly would let you
Take your meals with the family, which is absurd,
And on a tall chair like a gentleman set you.

- 10 But how little you think, my dear dog, when you talk;
You've no 'table manners', you bolt meat, you gobble;
And how could you eat bones with a knife, spoon, and fork?
You would be in a most inconvenient hobble.

- 15 And yet, once on a time it is certainly true,
My own manners wanted no little refining;
For I gobbled, and spilled, and was greedy like you,
And had no idea of good manners when dining.

- 20 So that when I consider the tricks you have caught,
To sit or shake paws with the utmost good breeding,
I must own it quite possible you may be taught
The use of a plate, and a nice style of feeding.

Therefore try to learn manners, and eat as I do;
Don't glare at the joint, and as soon as you're able
To behave like the rest, you shall feed with us too,
And dine like a gentleman sitting at table.

- Juliana Horatia Ewing

8. Which word has the same meaning as 'absurd' (line 7)?
- (A) funny
 - (B) pointless
 - (C) unhappy
 - (D) ridiculous
9. In the third stanza, what does the boy describe as an 'inconvenient hobble'?
- (A) eating a bone with utensils
 - (B) eating with one's mouth open
 - (C) making sounds while eating
 - (D) eating a bone while sitting at the table
10. In the fourth stanza, the boy compares the dog's eating habits with
- (A) the way a grown-up eats.
 - (B) the way the rest of the family eats.
 - (C) his current eating habits.
 - (D) his own eating habits when he was younger.
11. When a word sounds like its meaning (for example, 'hiss'), it is known as onomatopoeia.
- Which word used in the poem is an example of onomatopoeia?
- (A) 'drumming' (line 2)
 - (B) 'flop' (line 3)
 - (C) 'spilled' (line 15)
 - (D) 'shake' (line 18)
12. Why does the boy think it is possible for the dog to learn table manners?
- (A) The dog has been taught how to sit and shake paws.
 - (B) The boy explains things patiently to the dog.
 - (C) The boy always knows what the dog is thinking.
 - (D) The dog will do whatever the boy tells him to do.
13. The way the poem is written suggests that the boy is
- (A) reading it aloud.
 - (B) speaking to his pet.
 - (C) writing it down.
 - (D) entertaining his family.

Fear of flying

The security people sit me in my seat, click my seatbelt, and lock it using a secret lock. Which is good. I once read online how a plane hit an air pocket over Uzbekistan and plummeted two thousand metres in six seconds and the seatbelt of a 37-year-old man popped open completely of its own accord. After the plane had landed, luckily, but still.

The wait for take-off isn't easy.

Wobbly thoughts buzz around in my head like an airplane with a faulty entertainment system and no reading lights and only one wing. Have they greased the handbrake cable on both sides? I wonder. Will they remember to replace the fuel cap? Which is our nearest exit? How can I be sure without a tape measure?

Suddenly we're moving, rolling backwards, and then speeding down the runway with no time to inspect the life jackets for dry-cleaning damage or blow into the oxygen mask to dislodge any airline food that might be blocking the tube. Before I can ask a flight attendant to bring me an emergency dinghy and inflate it so I can see how it's done, there's a roar and everything shudders, and I'm pressed back into my seat, and not by a flight attendant.

Suddenly we're up in the air.

I sit there, keeping my eyes closed for a long time.

A very long time.

Then I remove the in-flight magazine from between my teeth and say a silent prayer of thanks that somebody has obviously remembered to check the fanbelt. I glance across the aisle at Mum and Dad, who are both calmly reading. Next to me, Amon is folding his air-safety card into a fighter plane. All around us, other passengers are looking just as relaxed.

I take a few deep breaths. Actually, this isn't so bad. I'm starting to feel sort of relaxed too. I unclick my seatbelt and lean forward and slide my backpack out from under the seat in front. I pull the book Dad bought me out of the seat pocket and put it away in the backpack. I check that my wallet is in there too. It is, with all my holiday money in it. I'm glad I didn't waste my savings buying a torch or a tyre-pressure gauge.

It's a brilliant book, *Overcoming Your Fear of Flying*, specially about using your imagination to distract yourself in the minutes leading up to take-off. But I won't be needing the book anymore, because it worked. Here I am, my first time up in a plane, six thousand metres in the air without a ladder or a parachute or a big pile of fluffy cushions, sitting here with my eyes wide open, and suddenly I'm not scared of flying at all.

Imagine that.

14. Which word is closest in meaning to 'plummeted' as it is used in the text?
- (A) dropped
 - (B) bounced
 - (C) skidded
 - (D) glided
15. The phrase 'of its own accord' means that the man's seatbelt opened
- (A) by itself.
 - (B) because of the design.
 - (C) when the flight was over.
 - (D) at the same time.
16. In the third paragraph, why has the narrator used a series of questions?
- (A) to suggest that planes often have problems
 - (B) to allow for answers later in the text
 - (C) to change the pace of the story
 - (D) to emphasise his state of mind
17. 'I'm pressed back into my seat'
- What caused this to happen to the narrator?
- (A) his seatbelt holding him down
 - (B) his parents pushing him
 - (C) the flight attendant forcing him to sit
 - (D) the plane taking off
18. The narrator describes the security people fastening his seatbelt with a secret lock. Afterwards, however, he unclicks his own seatbelt.
- What is the most likely explanation for this?
- (A) He must have been given the lock's secret code.
 - (B) The lock on his seatbelt was automatically released.
 - (C) He only pretended that there was a lock.
 - (D) His parents unlocked the seatbelt for him.
19. Which word, as it is used in the text, is a noun?
- (A) 'security'
 - (B) 'runway'
 - (C) 'emergency'
 - (D) 'holiday'
20. The text ends with the phrase 'Imagine that'. This is an expression of
- (A) hope.
 - (B) confusion.
 - (C) determination.
 - (D) triumph.

Tech diving: going deep

At fifty metres down you can't even see the surface. Look up, and the blue around you is lighter; look down and it gets darker and darker, fading into black.

In normal SCUBA (**S**elf-**C**ontained **U**nderwater **B**reathing **A**pparatus) diving, people strap a tank of compressed air to their backs and descend into the water. They breathe from their tanks through a device called a regulator that delivers the air into their mouths. As divers descend, the pressure that the water puts on their bodies continues to increase the deeper they go. At normal 'recreational' depths of 10–20 metres, this pressure doesn't matter so much. When divers start to go deeper, however, that pressure can start to have dangerous effects on the human body. People like police and military divers who do this kind of very deep diving—going down to 50, 70 or even 100 metres—are called technical divers.

Technical diving is a dangerous and highly-skilled activity, as many things can go wrong deep underwater. Under the extreme pressures technical divers experience, it's possible to get nitrogen narcosis, where the nitrogen gas in the compressed air that a diver is breathing causes a diver to feel drunk and confused. There is also the danger of decompression sickness. When this happens, air breathed under pressure while deep underwater expands and forms bubbles in the diver's body as they come back up to the surface. These bubbles can injure or kill them unless they stop on the way up to let the excess gas bubbles which have built up in their bodies escape. Under some deep-water diving situations, it's even possible for divers to be poisoned by the life-giving gas in the air they breathe! This is called oxygen toxicity.

To overcome some of the problems associated with deep-water diving, many technical divers do not breathe compressed air (usually composed of 80% nitrogen and 20% oxygen) like recreational divers do. Instead, they breathe special mixtures of gases like trimix (often 10% oxygen, 20% nitrogen and 70% helium) or heliox (often 10% oxygen, 90% helium). This helps reduce the danger of both oxygen toxicity and nitrogen narcosis.

21. The word 'recreational', as it used in the text, describes the type of diving undertaken for
- (A) personal enjoyment.
 - (B) scientific research.
 - (C) commercial reasons.
 - (D) rescue operations.
22. '(Self-Contained Underwater Breathing Apparatus)'
- Why are the first letters of these words written in **bold**?
- (A) These letters are not meant to be pronounced.
 - (B) These letters are used to form an abbreviation.
 - (C) The letters spell out a code used to communicate during a dive.
 - (D) They are the letters of a word used for signalling an emergency.
23. Which of the underlined words in the third paragraph is used as a verb?
- (A) 'experience'
 - (B) 'compressed'
 - (C) 'confused'
 - (D) 'pressure'
24. Under which set of conditions is a diver most likely to develop nitrogen narcosis?
- (A) doing an underwater rescue at 15 metres while breathing compressed air
 - (B) ascending rapidly from a 50-metre dive while breathing trimix
 - (C) breathing compressed air while doing an underwater repair at 70 metres
 - (D) stopping multiple times while ascending from a 100-metre dive breathing heliox
25. What directly causes the phenomenon of decompression sickness?
- (A) air breathed at surface pressures becoming compressed at depth
 - (B) air breathed at surface pressures becoming poisonous at depth
 - (C) air breathed at depth expanding at lower pressures on the surface
 - (D) air breathed at depth becoming poisonous at lower pressures on the surface
26. According to the text, which gas may poison divers during deep-water dives?
- (A) helium
 - (B) oxygen
 - (C) trimix
 - (D) carbon dioxide
27. In the final sentence, 'This' refers to
- (A) breathing through a regulator.
 - (B) breathing a life-giving gas.
 - (C) breathing compressed air.
 - (D) breathing a special gas mixture.

The Marvellous Boy

There was a small door. It was hidden among the peaked blue waves with their little whitecaps, and in the small door there was a golden keyhole. Ophelia climbed one step up onto the stage and walked across the floorboards. She knelt down to the keyhole and pressed her eye against it to see inside. She did it without thinking. It was the type of girl she was. She did not expect anything unusual. She did not expect to be looking straight into a large blue-green eye.

'Hello,' said the owner of the eye, a boy's voice. 'I come in friendship and mean you no harm.'

Ophelia was on her bottom, crawling backward away from the door. Her heart was leaping inside her chest.

'Who are you?' she said, or at least tried; her words came out squeaky.

'I don't have a name,' said the voice. 'It was taken from me by a protectorate of wizards from the east, west, and middle to keep me safe.'

'But I don't believe in wizards,' Ophelia said.

'Come closer,' said the voice.

Anyone would say, '*Don't go closer.*' Ophelia wasn't stupid. In fact, she belonged to the Children's Science Society of Greater London, which met on Tuesday nights. Of course she wouldn't go closer. It was only common sense. Ophelia knelt, staring at the mural*. The beautiful mountain range, the turquoise sea, the boy with the solemn expression and his sword raised. She pulled down hard on her braids, because that sometimes made her feel better.

'Why can't you come out?' Ophelia asked.

'I'm locked in.'

'A prisoner?'

'Yes,' said the voice.

Ophelia could have walked away. She could have picked herself up and walked backward from the room. She could have followed her feet all the way past the stone angels and across the sea monster mosaic. She could have run down the long hallway of painted girls and squeezed through the crowd in the *Gallery of Time*. She could have raced down, down, down the damp, creaking stairs to her father, cataloguing and classifying swords. When Mr Whittard asked her what she'd been doing, she could have said, 'Absolutely nothing. It's very boring here.'

But she didn't. She walked on her hands and knees slowly toward the keyhole.

'What do you want?' she asked.

*a painting on the wall

28. Which quotation from the first paragraph indicates that Ophelia behaved impulsively?
- (A) 'Ophelia climbed one step up onto the stage'
(B) 'She did it without thinking.'
(C) 'It was the type of girl she was.'
(D) 'She did not expect anything unusual.'
29. What was Ophelia's immediate response to the boy's voice?
- (A) She was worried that he might have been watching her.
(B) She was shocked and retreated from him.
(C) She was irritated that he had found her hiding place.
(D) She was intrigued and wanted to know more about him.
30. 'Anyone would say, "*Don't go closer.*"'
Who is the 'Anyone' referred to in this quotation?
- (A) people at the museum
(B) children who belong to the Science Society
(C) people in general
(D) Ophelia's father
31. Why does the writer mention that Ophelia belonged to the Children's Science Society of Greater London?
- (A) to show that Ophelia was an interesting young person
(B) to prove that Ophelia was sensitive but disobedient
(C) to indicate that Ophelia was smarter than her behaviour made her seem
(D) to reveal that Ophelia would use her science knowledge to impress the boy
32. The word 'solemn' means
- (A) serious. (B) annoyed. (C) fearful. (D) suspicious.
33. 'She could have raced down, down, down the damp, creaking stairs to her father,
_____ cataloguing and classifying swords.'
Which words could be inserted in the space?
- (A) which was
(B) that was
(C) he was
(D) who was
34. At the end of the story, why does the writer list many actions that Ophelia could have taken, but did not?
- (A) to support the impression that Ophelia was making a bold choice
(B) to suggest that Ophelia knew exactly what to do next
(C) to emphasise that Ophelia always carefully considered her course of action
(D) to create the feeling that Ophelia was trying to bother the boy

Read the text and answer the questions that follow.

My rant: Tablets vs Textbooks

As a parent, I've embraced the idea that technology has become an important aspect of children's lives, and school is no exception. Yet even though teachers today use smart boards and internet videos to enrich their lessons, and even though students complete classroom activities using computers every day, a major remnant persists from the bad old days: traditional textbooks. They're heavy, expensive, wasteful and difficult to update, and it's time that old-fashioned printed-paper textbooks were eliminated.

Why carry a huge, heavy lump of paper around when the same textbook can be produced as an e-book and delivered on a lightweight tablet computer? Heavy backpacks full of school texts cause more than 10 000 documented student injuries a year in the United States alone. Surely there's no need for our children to go through this in the digital age!

Opponents may criticise the initial cost of purchasing a tablet, but with prices for the devices already affordable for most families (and falling by nearly 25% each year), who can justify spending \$65 on a printed science textbook that will be obsolete a few years after it is bought? That same text can be bought as an e-book for just 50% of the cost of the printed version and updated with ease. Better still, not a single tree is cut down in the process.

Nor is this reduction in paper waste strictly limited to the elimination of textbooks. With a tablet computer, for example, not only can students hold thousands of separate texts on a single device, but teachers too can deliver homework, quizzes, notes and activities to their students in electronic form. Such work can easily be stored in the digital 'cloud' and downloaded to any tablet from anywhere with an internet connection, eliminating excuses for lost homework. Taking textbooks and other schoolwork online therefore not only reduces waste, but streamlines the entire educational process as well.

Perhaps the strongest argument for getting rid of textbooks is the increasingly technology-dominated world in which students will find themselves. Computer and information technology is one of the fastest-growing and highest-paid fields of employment in the world, and this trend is likely to continue. Students schooled in a high-tech environment, therefore, will be better prepared for the workforce. For this and so many other reasons, we owe it to our kids to ditch the traditional textbook once and for all.

35. What is the writer's point of view about electronic technology in the first paragraph?
- (A) It is overused in schools.
 - (B) It should be balanced with traditional teaching.
 - (C) It is a familiar feature in classrooms.
 - (D) It has not been adequately tested by teachers.
36. The writer suggests that some people might object to replacing textbooks with tablets because they think that
- (A) students learn better from textbooks.
 - (B) tablets are too expensive.
 - (C) tablets are too hard to update.
 - (D) students prefer textbooks.
37. The word 'obsolete', as it is used in the text, means
- (A) outdated.
 - (B) unwanted.
 - (C) worn-out.
 - (D) unused.
38. The writer places the word 'cloud' in inverted commas to show that
- (A) the word is important.
 - (B) a definition will be given for the word.
 - (C) the word is quoted from another source.
 - (D) the word is being used in an unusual way.
39. Which quotation from the text best shows that the writer has negative feelings about textbooks?
- (A) 'traditional textbooks'
 - (B) 'a huge, heavy lump of paper'
 - (C) 'That same text can be bought as an e-book'
 - (D) 'eliminating excuses for lost homework'
40. Which two aspects of tablets are the focus of the fourth paragraph?
- (A) affordability and reliability
 - (B) efficiency and safety
 - (C) environmental impact and reliability
 - (D) convenience and efficiency
41. The writer feels that the best reason to switch from textbooks to tablets is
- (A) to reduce the potential for student injury.
 - (B) to get students ready for the workforce.
 - (C) to decrease the number of trees that need to be cut down.
 - (D) to engage students who like to use computers.
42. What type of text is this?
- (A) narrative
 - (B) persuasive
 - (C) descriptive
 - (D) informative

The Elephant's Child

This text is part of a folktale about animal origins.

'Come hither, Little One,' said the Crocodile, 'for I am the Crocodile,' and he wept crocodile-tears to show it was quite true.

Then the Elephant's Child became breathless, and panted, and knelt down on the riverbank and said, 'You are the very person I have been looking for all these long days. Will you please tell me what you have for dinner?'

'Come hither, Little One,' said the Crocodile, 'and I'll whisper.'

Then the Elephant's Child put his head down close to the Crocodile's musky, tusky mouth, and the Crocodile caught him by his little nose, which up to that very week, day, hour, and minute, had been no bigger than a boot, though much more useful.

'I think,' said the Crocodile—and he said it between his teeth, like this—'I think to-day I will begin with Elephant's Child!'

At this, O Best Beloved, the Elephant's Child was much annoyed, and he said, speaking through his nose, like this, 'Led go! You are hurtig be!'

Then the Bi-Coloured-Python-Rock-Snake scuffled down from the bank and said, 'My young friend, if you do not now, immediately and instantly,

pull as hard as ever you can, it is my opinion that your acquaintance in the large-pattern leather ulster' (and by this he meant the Crocodile) 'will jerk you into yonder limpid stream before you can say Jack Robinson.'

This is the way Bi-Coloured-Python-Rock-Snakes always talk.

Then the Elephant's Child sat back on his little haunches, and pulled, and pulled, and pulled, and his nose began to stretch. And the Crocodile floundered into the water, making it all creamy with great sweeps of his tail, and he pulled, and pulled, and pulled.

And the Elephant's Child's nose kept on stretching; and the Elephant's Child spread all his little four legs and pulled, and pulled, and pulled, and his nose kept on stretching; and the Crocodile threshed his tail like an oar, and he pulled, and pulled, and pulled, and at each pull the Elephant's Child's nose grew longer and longer—and it hurt him hijjus!

Then the Elephant's Child felt his legs slipping, and he said through his nose, which was now nearly five feet long, 'This is too butch for be!'

[Editor's note: Don't worry—the Elephant's Child gets away in the end!]

43. 'Come hither, Little One... and I'll whisper.'
When the Crocodile says this, he is being
(A) cruel. (B) violent. (C) cunning. (D) intimidating.
44. In this story, the Elephant's Child ends up in a dangerous situation mainly because of his
(A) curiosity. (B) generosity. (C) pride. (D) laziness.
45. 'Led go! You are hurtig be!'
Why are the Elephant's Child's words written in this way?
(A) because he is very frustrated
(B) because he is speaking a different form of English
(C) because it is what his speech actually sounds like
(D) because he is speaking directly to the Crocodile
46. '(and by this he meant the Crocodile)'
The words in brackets are said by
(A) the Python-Rock-Snake.
(B) the Elephant's Child.
(C) the Crocodile.
(D) the narrator.
47. From what the Python-Rock-Snake says, you can tell that he thinks that the Elephant's Child's situation is
(A) predictable. (B) thrilling. (C) urgent. (D) unusual.
48. What happens between the Crocodile and the Elephant's Child is most like
(A) a tug of war.
(B) a battle of wits.
(C) a game of chess.
(D) a race to the top.
49. What kind of information is contained in the square brackets [] at the end of the text?
(A) a translation
(B) something a character says
(C) a comment on the story
(D) an alternative ending
50. What main question does this folktale answer?
(A) Where did elephants come from?
(B) Why do crocodiles live in the water?
(C) What do crocodiles eat?
(D) How did the elephant get its trunk?
